### Block Diagram

### Descriptions

DIO2411 is a low voltage, one channel video amplifier with integrated reconstruction filter and input clamps. DIO2411 provides improved image quality compared with passive LC filters and discrete drivers solution, especially suited for standard definition video signals, such as television and set-top box applications. DIO2411 integrates equivalent SAG function being able to drive 47uF capacitor directly under output AC-coupled mode. This reduces the BOM cost effectively with smaller PCB board size.

DIO2411 can be directly driven by a DC-coupled DAC output or an AC-coupled signal. The output in DIO2411 can also drive AC or DC coupled single (150Ω) or dual (75Ω) loads. The DC coupling capacitors can be removed.

## Absolute Maximum Ratings

Stresses beyond those listed under "Absolute Maximum Rating" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other condition beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Parameter		Rating	Unit
Supply Voltage		0 to 6.0	V
Input Voltage		-0.3 to $V_{CC}+0.3$	V
Storage Temperature Range		-65 to 150	°C
