

3M™ Locator Plate 3443-112

3M™ Platens 3442-44, 3442-1A

Instructions for the assembly of 3M™ D Sub Connectors 8250 and 8350

1.0 General

3M manual and pneumatic assembly presses and accessory assembly equipment are recommended for the termination of 3M™ D Sub Connectors. 3M assembly equipment is offered to help reduce set-up time, to provide easier and faster assembly and to help reduce assembly error. The 3M Locator Plate 3443-112 and 3M Platen 3442-44 were designed to assemble the D Sub Connector 8250. The Locator Plate 3443-112 is used with the 3M™ Platen 3443-1A to assemble the D Sub Connector 8350.

Connector Part Number	Locator Plate Number	Platen Part Number	3436-1F Shut Height Setting		Assembly Press
			Assembly Presses 3640/3316	Assembly Presses 3335/3339-1	
8250	*3443-112	3442-44	15	15 1/2	3830
8350	*3443-112	3442-1A	20	20 1/2	3830

*Included with the Locator Plate 3443-112 is a Platen 3442-44. The Platen 3442-44 can also be purchased separately.

2.0 Procedures for Set Up:

2.1 Adjust the shut height setting (see Figures 2 through 4).

Figure 1: 3M™ Locator Plate 3443-112

3.0 Procedures for Adjusting Shut Height

3.1 The shut height should be adjusted from the base before the locator plate is put into place. The 3M™ Assembly Presses 3316 and 3640 are adjusted with a knob at the top of the press. The 3M™ Assembly Press 3335 is adjusted with the collar on the press shaft, and the 3M™ Assembly Press 3830 is self-adjusting.

3.2 The shut height adjustment is made from the base of the assembly press without the locator plate or platen in place.

3.3 Place the shut height gauge across the assembly press base. (See Figures 2 and 3)

Figure 2: Shut Height Adjustment

3.4 Lower the handle of the assembly press until the handle casting makes contact with the press casting.

3.5 Rotate the shut height to lower or raise adjustment feature until the bottom of the shaft contacts the desired position on the shut height gauge. (See Figures 3 and 4)

Figure 3: 3M™ Assembly Press 3640

- 3.6 Install the 3M™ Locator Plate and the appropriate platen on the assembly press. The platen should be positioned parallel with the connector body and cover.

Note: See the chart on page 1 for shut height settings.

Figure 4: 3M™ Assembly Press 3335

4.0 Procedures for Adjusting Shut Height

- 4.1 Grasp a 3M™ D Sub Connector cover strip between the thumb and forefinger of both hands, with the liner facing you. Rotate the outermost cover down against the adjacent cover on the strip, breaking it from the liner. Pull laterally away from the strip. Adhesive should be present on cover. (See Figure 5)

Figure 5

- 4.2 Firmly press the ribbed side of the cable into alignment grooves on cover. The adhesive will help the cable stay in place. Visually inspect to ensure that:
- Cable is properly aligned to cover grooves.
 - Cable end is flush with the cover for end terminations or perpendicular to cover for midspan terminations. (See Figure 6)

Figure 6

- 4.3 Place the cable/cover sub assembly between the guides on the locator plate, cover side down. (See Figure 7)
- 4.4 Position and orient connector body, contacts down, over the cable/cover sub-assembly, aligning with the body. (See Figure 7)

Figure 7

- 4.5 Lower the ASSEMBLY PRESS HANDLE firmly to complete the Cable/Connector Assembly. (See Figure 8.)
- 4.6 Raise the press handle and remove the completed assembly. Visually inspect to ensure that:
 - a. Cover is fully seated and parallel with the body.
 - b. Cable is properly aligned with the cover grooves.
 - c. Cover retaining devices on the body are flush with the cover end.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
