ECONOMY CLUSTER BLOCKS

Housings and contacts

Designed for compressors

The requirement

Economical connection solutions are required for hermetic compressor applications in refrigerators and air conditioners. Some of these applications require products that are compliant with the Glow Wire test (GWT) per the IEC60335-1 standard.

TE Connectivity's solution

TE Connectivity (TE) has developed new cluster block housings that are used with a new pin receptacle to provide cost effective cluster block connections for hermetic compressors. The housings are offered in both standard glass-filled PBT material and glass-filled PBT material meeting both the GWT and UL 94 V-0 requirement.

KEY FEATURES

- Low contact insertion force permits easy assembly
 - High contact retention force helps assure connection continuity
 - Product design is compatible with automated assembly processes
 - Choice of housings includes model complying with GWT* and UL 94 V-0 for use outside of compressors
- * Compliant with Glow Wire test required by IEC/EN 60335-1 5th edition: Household and Similar Appliances-Safety.

APPLICATIONS

- Refrigerator and freezer compressors
- Air conditioner compressors
