Description

The GS71116A is a high speed CMOS static RAM organized as 65,536-words by 16-bits. Static design eliminates the need for external clocks or timing strobes. Operating on a single 3.3 V power supply and all inputs and outputs are TTL-compatible. The GS71116A is available in the 6 mm x 8 mm Fine Pitch BGA and 400 mil TSOP Type-II packages.
