Notes

- For U-bracket format, replace suffix '-C' with suffix '-B'.
- Output 2 peak current is 12 A on +12 V, 9 A on +15 V, and 6 A on +24 V. Maximum 2 s duration with total load <200 W.
- Output 4 is floating and can be connected externally for positive or negative output.
- 200 W for '-C' version with a cover and fan assembly. 100 W for '-B' version with convection cooling (maximum current of output 1 & 2 derated to 50%). 200 W for '-B' version with 25 CFM forced air provided by user.

- Zero minimum load for outputs 2, 3 & 4. 10% minimum load required on output 1 for all outputs to meet regulation.
- When the Remote Sense facility is not used, +Sense must be connected to +V, and -Sense to return, on P2 connector.
- Total regulation includes initial tolerance, line regulation and load regulation.
- Peak current for single output models is 110% of I_{max}. Maximum 2 s duration with 10% duty cycle.
