

**Important notes about Classic Panel Mount Indicator Catalog Pages**

**SCROLL DOWN TO VIEW CATALOG PAGE**

This catalog page is out-of-print and is used with the understanding that the information shown could be out-of-date. In many cases, part numbers shown on this page are discontinued. Most notably, many “Complete Assembly” parts, which consist of a cap and a base, can no longer be ordered by the 14-digit ordering code. To obtain these parts, please order the cap and base part numbers separately. This process provides the components contained with the original “Complete Assembly” part number.

All Dialight Classic Panel Mount Indicators need a leading 3-digit numerical series. In some cases, this catalog will show a 2-digit series. In this case, please add a leading zero. For example, 81-0211-300 becomes 081-0211-300.

Part numbers listed on Dialight catalog pages designate parts with Red lenses. For ordering lens colors other than red, consult the chart below. In most cases, the color is dictated by the 7<sup>th</sup> digit. For example, 095-0932-003 for a green cap.

| Lens Colors |                  |
|-------------|------------------|
| 1 - Red     | 5 - White        |
| 2 - Green   | 6 - Light Yellow |
| 3 - Yellow  | 7 - Clear        |
| 4 - Blue    |                  |

# Neon Indicator Lights

It is possible to provide indicator lights of very small dimensions, that may be applied directly to commercial voltage circuits when T-2 neon lamps are used as the light sources.

These neon glow lamps are very uniform in their performance and exceptionally free of early failures. When recommended series resistors are used, very long minimum life ratings apply. High lamp reliability makes it reasonable to offer these lights with non-replaceable lamps.

Lamp C2A (NE-2H) is used in these lights for all applications on 110-125 volts, alternating current. The necessary current-limiting

resistor is built into the light housing so that the full voltage may be applied to the terminals. Two levels of operation are provided by the choice of the resistor value—either 22K or 33K ohms. Higher light output is provided by the 22K option and minimum life is still long—5,000 hours. For DC circuits of 105-125 volts, the neon lamp used is A9A (NE-2E). Even lower voltages may be accommodated by the use of selected lamps. Data will be provided on application.

249-7866-0931-514

MOUNT FROM REAR IN 3/8" CLEARANCE HOLE

## WITH BUILT-IN RESISTOR

In this series of assemblies, the non-replaceable neon lamp is combined with a built-in current-limiting resistor. Indicator lights are offered with a choice of stovepipe, flat or short cylindrical lens. The latter two may be hot-stamped or engraved if desired. See "Hot-Stamped or Engraved Legends" on Page 25B

See "Materials and Finishes" on facing page.

Hot-Stamped or Engraved Legends: See description on Page 25B.

## PERMANENT LAMP INDICATOR LIGHTS WITH BUILT-IN RESISTOR

| Lens Color          | With Stovepipe Lens Shape |                      | With Short Cylindrical Lens Shape |                      | With Flat Lens Shape     |                      |
|---------------------|---------------------------|----------------------|-----------------------------------|----------------------|--------------------------|----------------------|
|                     | Standard Brightness 56K*  | High Brightness 22K* | Standard Brightness 56K*          | High Brightness 22K* | Standard Brightness 56K* | High Brightness 22K* |
| Red                 | 249-7841-0931-544         | 249-7866-0931-514    | 249-7841-1431-544                 | 249-7866-1431-514    | 249-7841-0331-544        | 249-7866-0331-514    |

## WITH BUILT-IN RESISTOR

# For 110-125V AC or 105-125V DC

## RECOMMENDED RESISTANCE VALUES

| Neon Lamp                          | Volts Applied to Terminals | Bright Light              |            | Long Life                 |             |
|------------------------------------|----------------------------|---------------------------|------------|---------------------------|-------------|
|                                    |                            | Resistor and Approx. Life |            | Resistor and Approx. Life |             |
| C2A (NE-2H)<br>High Brightness     | 110-125 Volts AC           | 22K                       | 5,000 hrs. | 33K                       | 25,000 hrs. |
| A9A (NE-2E)<br>Standard Brightness | 105-125 Volts DC           | 56K                       | 5,000 hrs. | 100K                      | 25,000 hrs. |

Change the second digit in the part number suffix to designate the appropriate built-in resistor. See chart at the right.

## How to designate the three digit part number suffix (-XXX)

| Finish          | Resistor | Hardware   |
|-----------------|----------|------------|
| 5-black anodize | 0-none   | 0-none     |
| 6-clear anodize | 1-22K    | 4-aluminum |
|                 | 3-33K    |            |
|                 | 4-56K    |            |
|                 | 7-100K   |            |

Note: The part numbers given indicate Standard indicator lights. The above table provides the Standard and Optional designations for finish, resistor and hardware (where applicable).

## MOUNT FROM REAR IN 3/8" CLEARANCE HOLE

This series of Permanent Lamp Indicator Lights is similar to those on the facing page—except that they do not contain built-in resistor. The necessary current-limiting resistor must be added externally. See the chart with recommended resistance values above.

Legends: See description on page 25B.

## MATERIALS AND FINISHES

- Mounting bushing and flange ring: Standard—Aluminum, black anodize finish. Optional—clear anodize finish.
- Mounting nut: Brass, white nickel finish.
- Internal-tooth Lockwasher: Phosphor bronze, white nickel finish.
- Terminals: Low carbon steel, solder plated.

## WITHOUT BUILT-IN RESISTOR

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
