■ Easy-to-use Graphic User Interface – “MotionCreatorPro 2”

Easy-to-use Graphic User Interface – “MotionCreatorPro 2” is a Windows-based application development software package included with the PCI-8254/PCI-8258. Applicable time-domain and frequency-domain diagnostic tools are integrated for auto-tuning, frequency response analysis, and motion & I/O data sampling. A Setup Wizard shortens system installation & evaluation time and allows monitoring of onboard DSP & I/O consumption via a system diagnostic page. Powerful sampling pages and graphic tools deliver real-time motion and I/O status and conduct further motion flow analysis.

■ MotionCreatorPro 2 provides:

- Axis configuration
- Parameter table
- Axis control
- Setup wizard (New)
- Frequency analysis (New)
- Auto-tuning (New)
- Point table
- Data sampling (New)

■ DIN-825-GP4 for PCI-8254/8258

To speed system integration and ease wiring of all servo, motion, and general purpose I/O, a dedicated terminal board and several specific cables connect the servos and steppers.
