EV100L-N-00A

Offline Inductor-Less Regulator EV Board

The Future of Analog IC Technology

DESCRIPTION

The MP100L is a compact, inductor-less, good-efficiency, off-line regulator. It steps down the AC line voltage to an adjustable DC output. It is a simple solution to provide a bias voltage to ICs in off-line applications. Its integrated smart-control system uses AC line power only when necessary, thus minimizing device losses to achieve good efficiency. This device can help system designs meet new standby power specifications.

The MP100L provides various protections, such as Thermal Shutdown (TSD), VD Over Voltage Protection (OVP), VD Shrot to GND Protection, Over Load Protection (OLP), Short Circuit Protection (SCP).

The MP100L is available in SOIC8E package.

ELECTRICAL SPECIFICATION

Parameter	Symbol	Value	Units
Supply Voltage	V_{IN}	85~265	VAC
Output Voltage	V_{OUT}	12	V
Output Current	I_{OUT}	20	mA

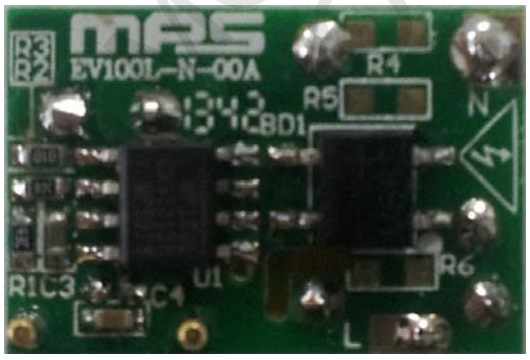
FEATURES

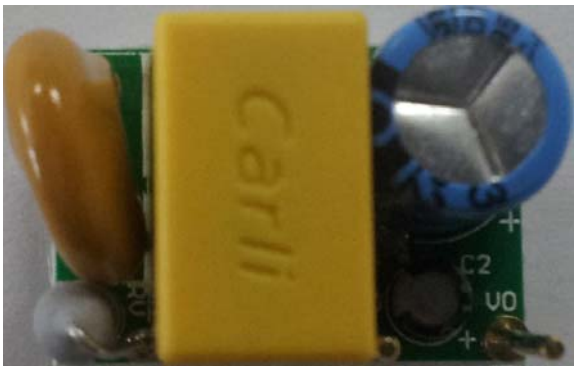
- Universal AC Input (85VAC-to-305VAC)
- Inductor-Less
- Less than 100mW Standby Power
- Excellent EMI
- Low BOM Cost
- Smart Control to Maximum Efficiency
- Adjustable Output Voltage from 1.5V to 15V
- Good Line and Load Regulation
- Thermal Shutdown Protection
- Short-Circuit Protection
- Provide Power-Good Signal

APPLICATIONS

- Wall Switches and Dimmers
- Z-Wave Device and ZigBee Device for Home Automation
- Standby Power for General Off-line Applications

EV100L-N-00A EVALUATION BOARD

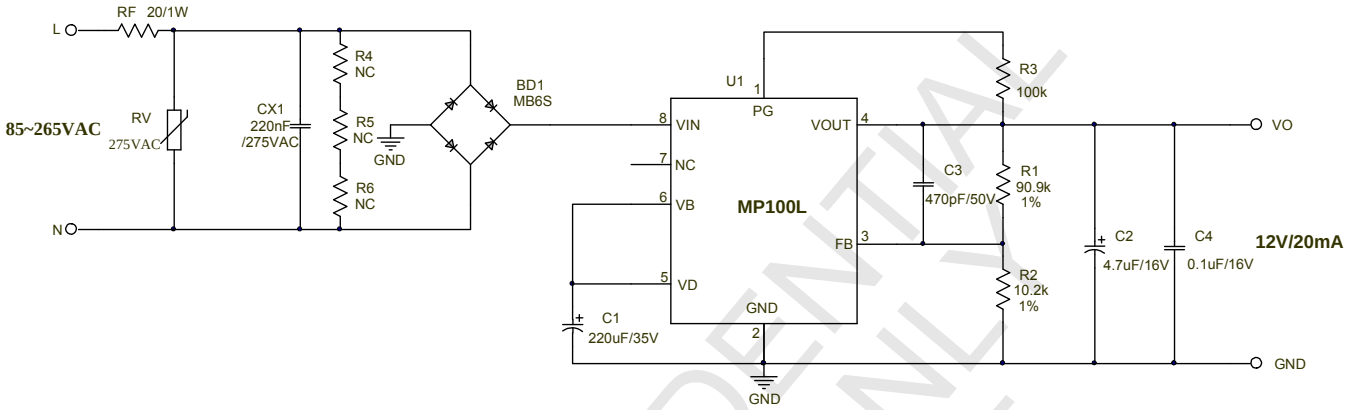




(L x W x H) 21mm x 14mm x 20mm

Board Number	MPS IC Number
EV100L-N-00A	MP100GN

EVALUATION BOARD SCHEMATIC



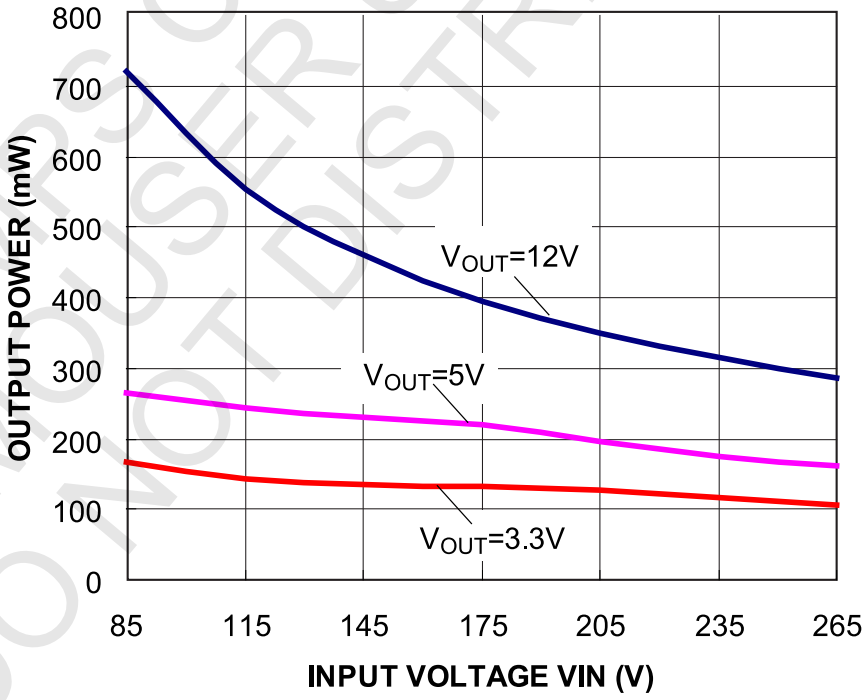
VOUT can be adjusted by choosing the value of R1 and R2, the relationship of them is:

$$VOUT=1.235V*(1+R1/R2)$$

For example, to get 5V output voltage, we can choose, R4=10.2k, R5=30.9k.

The maximum output power of MP100L Vs input voltage is depicted by following chart for 12V, 5V and 3.3V output applications respectively.

The test condition is: in open frame, full bridge rectifier,ambient temperature is 25 °C, the temperature rise of MP100L is less than 60 °C on the test board.



EV100L-N-00A BILL OF MATERIAL

Qty	Ref	Value	Description	Package	Manufacture	Manufacturer_PN
1	BD1	MB6S	Diode;600V;0.5A;	SOIC-4	TaiWan Semiconductor	MB6S

EVB TEST RESULTS

Performance waveforms are tested on the evaluation board.
V_{OUT} = 12V, I_{OUT} = 20mA, T_A = 25ºC, unless otherwise noted.

Efficiency vs. Load

QUICK START GUIDE

1. Preset Power Supply to 85V ≤ V_{IN} ≤ 265V.
2. Turn Power Supply off.
3. Connect the Line and Neutral terminals of the power supply output to L and N ports.
4. Connect Load to VO and GND ports.
5. Turn Power Supply on after making connections.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits,General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
