## 1. General Description

AWT-320240T35N02 is a transmissive type a-Si TFT-LCD (amorphous silicon thin film transistor liquid crystal display) module, which is composed of a TFT-LCD panel, a driver circuit and a backlight unit. The panel size is 3.5 inch and the resolution is 320x240, the panel can display up to 262K colors. The LCM can be easily accessed by micro-controller via parallel interface.

## 2. Physical Features

|                   |  |
|-------------------|--|
| Display Mode      | TFT-LCD Module                           |
|                   | Active matrix TFT, Transmissive type     |
| Display Format    | Graphic 320×RGB×240 Dot-matrix           |
| Input Data        | 24 bit RGB with Serial Interface\CCIR656 |
| Viewing Direction | 6 O'clock                                |
| Drive             | HX8238-A                                 |

## 3. Mechanical Specification

| Item                | Contents          | Unit |
|---------------------|-------------------|------|
| Module size (W×H×T) | 63.9 × 76.9 × 3.3 | mm   |
| Number of dots      | 320(RGB) × 240    | ---  |
| Active area (W×H)   | 70.08 × 52.56     | mm   |

|                       |        |                  |          |              |        |

|-----------------------|--------|------------------|----------|--------------|--------|
| Product Specification | Model: | AWT-320240T35N02 | Rev. No. | Issued Date. | Page.  |
|                       |        |                  | B        | 2012/03/05   | 5 / 20 |

## 5. Absolute Maximum Ratings

| Item                  | Symbol | Min  | Max     | Unit | Remark          |
|-----------------------|--------|------|---------|------|-----------------|
| Power Voltage         | VCC    | -0.3 | 3.6     | V    | Note1、<br>Note2 |
| Input Voltage         | VIN    | -0.3 | VCC+0.3 | V    |                 |
| Operating temperature | TOPR   | -20  | 70      | °C   |                 |
| Storage temperature   | TSTR   | -30  | 80      | °C   |                 |
| Humidity              | ---    | ---  | 90      | %RH  | ---             |

Remark:

Note 1) The HX8238 may be permanently damaged if it is used under the condition exceeding the above absolute maximum values. It is also recommended to use the HX8238 within the limit of its electric characteristics during normal operation. Exceeding the conditions may lead to malfunction of HX8238 and affect its credibility.

Note 2) The voltage from VSS.

## 6. Electrical Characteristics

| Item                    |         | Symbol | Rating   |      |         | Unit | Remark            |
|-------------------------|---------|--------|----------|------|---------|------|-------------------|
|                         |         |        | Min      | Typ  | Max     |      |                   |
| Power Voltage           | Logic   | VCC    | 2.5      | 3.3  | 3.6     | V    | Note1             |
| Input Voltage           | L level | VIL    | -0.3     | ---- | 0.2*VCC | V    | VCC=2.5<br>~ 3.6V |
|                         | H level | VIH    | 0.8* VCC | ---  | ---     | V    |                   |
| LCD Drive Power current |         | ILCD   | ---      | ---  | 15      | mA   | ---               |

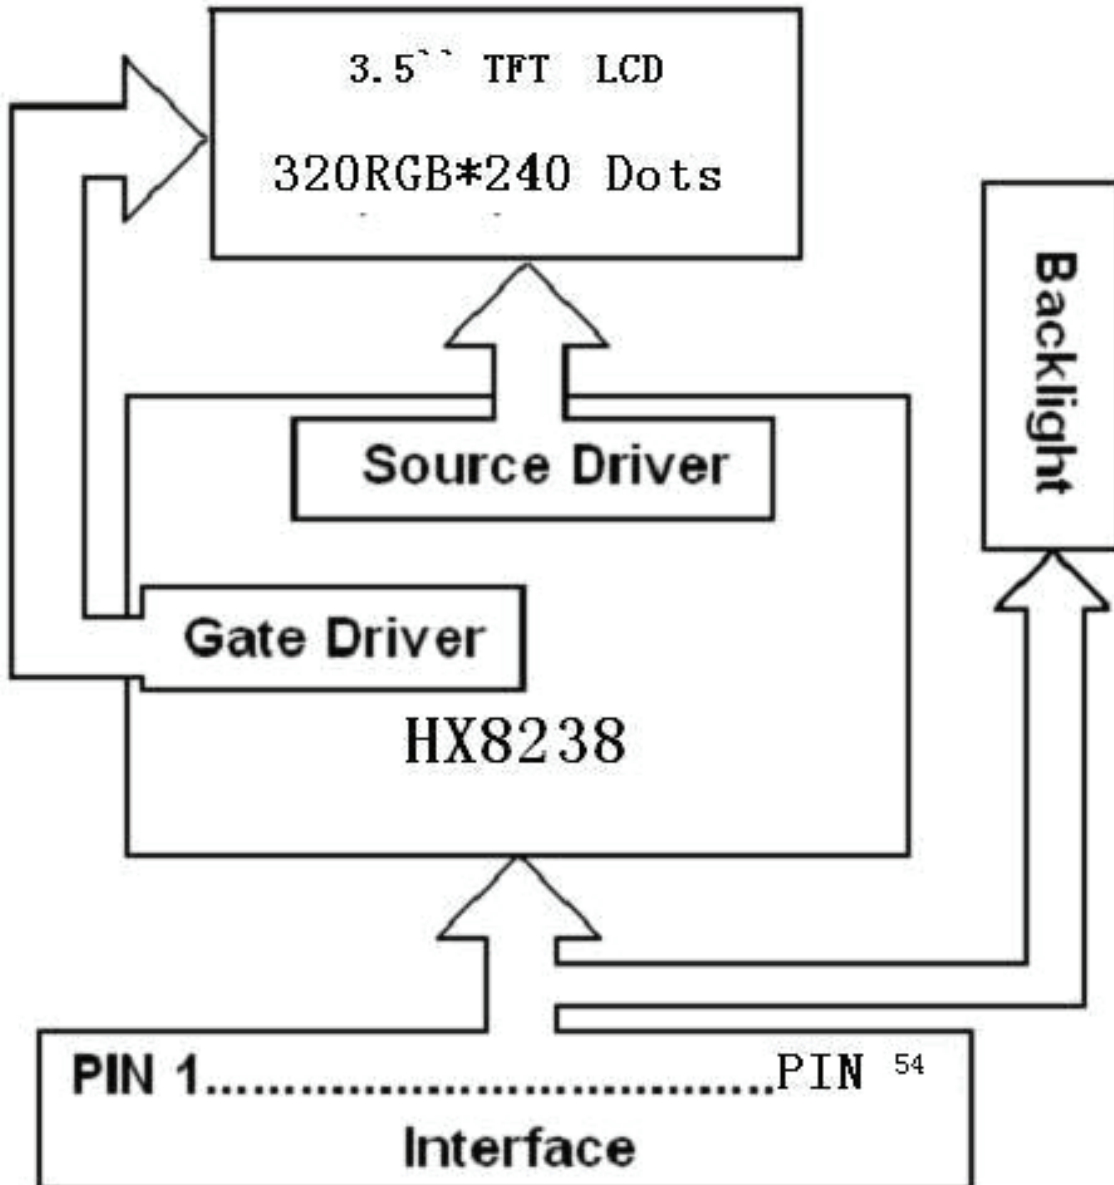

Remark:

Note1:Vcom must be adjusted to optimize display quality: Cross-talk, Contrast Ratio and etc.

|                       |        |                  |          |              |        |

## 8. Backlight Characteristics

| Item            | Symbol   | Min  | Typ  | Max  | Unit              | Remark |
|-----------------|----------|------|------|------|-------------------|--------|
| Forward voltage | $V_{BL}$ | 18   | 19.2 | 20   | V                 | -      |
| Current         | $I_{BL}$ | -    | 15   | -    | mA/chip           | -      |
| ICE             | X        | 0.26 | -    | 0.32 | -                 | -      |
|                 | Y        | 0.26 | -    | 0.32 | -                 |        |
| Brightness      | -        | 2600 | -    | -    | cd/m <sup>2</sup> | ★1     |
| Uniformity      | -        | 80   | -    | -    | %                 | ★2     |

★1 Test condition is :

- (a) Center point on active area
- (b) Best Contrast

★2 Uniform measure condition :

- (1) Measure 9 point. Measure location is show below :
- (2) Uniform = (Min. brightness / Max. brightness) × 100%
- (3) Best Contrast.

|                       |        |                  |          |              |         |
|-----------------------|--------|------------------|----------|--------------|---------|
| Product Specification | Model: | AWT-320240T35N02 | Rev. No. | Issued Date. | Page.   |
|                       |        |                  | B        | 2012/03/05   | 10 / 20 |

## 9. Electro-Optical Characteristics

| Item               |       | Symbol        | Condition                 | Min.  | Typ.  | Max.  | Unit | Remark         |

## 10. Reliability

### 10.1. MTBF

The LCD module shall be designed to meet a minimum MTBF value of 50000 hours with normal. (25°C in the room without sunlight)

### 10.2. Test condition

| NO. | ITEM   | CONDITION                               | CRITERION   |
|-----|--|---|---|
| 1   | High Temperature Non-Operating Test          | 80°C * 240Hrs                           | <ul style="list-style-type: none"> <li>◦ No Defect Of Operational Function In Room Temperature Are Allowable.</li> <li>◦ IDD of LCM in Pre-and Post-Test Should Follow Specification</li> </ul> |
| 2   | Low Temperature Non-Operating Test           | -30°C * 240Hrs                          |   |
| 3   | High Temperature/Humidity Non-Operating Test | 50°C * 90%RH * 240 Hrs                  |   |
| 4   | High Temperature Operating Test              | 70°C * 240Hrs                           |   |
| 5   | Low Temperature Operating Test               | -20°C * 240Hrs                          |   |
| 6   | Thermal Shock Test                           | -30°C (30Min) ↔ 80(30Min)*<br>10 Cycles |   |

#### Notes:

1. Judgments should be made after exposure in room temperature for two hours.
2. The distill water is used for the high temperature / humidity test.
3. The sample above is individually for every reliability tests condition.

|                       |        |                  |          |              |         |

|                       |        |                  | B        | 2012/03/05   | 13 / 20 |

# 11. Inspection Standards

1. AQL(Acceptable Quality Level)  
AQL of major and minor defect

|                  | MAJOR DEFECT | MINOR DEFECT | MAJOR+MINOR |
|------------------|--------------|--------------|-------------|
| APPEARANCE       | 0.40%        | 1.0%         | 1.0%        |
| ELECTRIC-OPTICAL | 0.15%        | 0.15%        | 0.15%       |

## 2. Basic conditions for inspection

The LCM face to us, in normal environment, the lux is  $1000\pm 200$ . (Darkroom's lux:  $100\pm 50$ ),

About an angle of incidence 30, a distance of 30cm with normal eye, with an angle of 45 degree to check the products without uncovering the film!

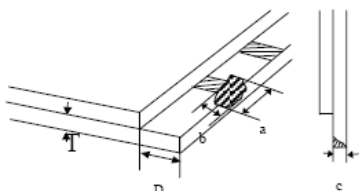

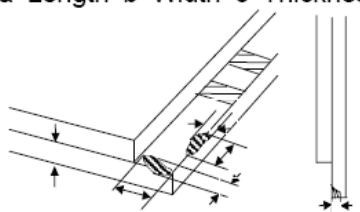

(As shown below)

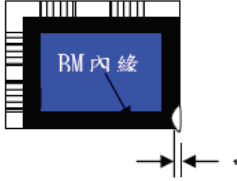

3. Inspection item and criteria
  - 3.1 Visual inspection criterion in immobility
    - 3.1.1 Glass defect

| No | Defect item                              | Criteria               | Remark |

## 12. Precautions For Using LCD Modules

Please pay attentions to the followings as using the LCD module.

### 12.1 Handling

- (a) Do not apply strong mechanical stress like drop, shock or any force to LCD module. It may cause improper operation, even damage.
- (b) Because the ITO film very fragile and easy to be damaged, do not hit, press or rub the display surface with hard materials.
- (c) Do not put heavy or hard material on the display surface, and do not stack LCD modules.
- (d) If the display surface is dirty, please wipe the surface softly with cotton swab or clean cloth.
- (e) Wipe off water droplets or oil immediately.
- (f) Protect the LCD module from ESD. It will damage the LSI and the electronic circuit.
- (g) Do not touch the output pins directly with bare hands.
- (h) Do not disassemble the LCD module.

### 12.2 Storage

- (a) Do not leave the LCD modules in high temperature, especially in high humidity for a long time.
- (b) Do not expose the LCD modules to sunlight directly.
- (c) The liquid crystal is deteriorated by ultraviolet. Do not leave it in strong ultraviolet ray for a long time.
- (d) Avoid condensation of water. It may cause improper operation.
- (e) Please stack only up to the number stated on carton box for storage and transportation. Excessive weight will cause deformation and damage of carton box.

### 12.3 Operation

- (a) When mounting or dismounting the LCD modules, turn the power off.
- (b) Protect the LCD modules from electric shock.
- (c) The Driver IC control algorithms stated above should always obeyed to avoid damaging the LSI and electronic circuit.
- (d) Be careful to avoid mixing up the polarity of power supply for backlight.

|                              |               |                         |                 |                     |                |
|------------------------------|---------------|-------------------------|-----------------|---------------------|----------------|
| <i>Product Specification</i> | <i>Model:</i> | <i>AWT-320240T35N02</i> | <i>Rev. No.</i> | <i>Issued Date.</i> | <i>Page.</i>   |
|                              |               |                         | <i>B</i>        | <i>2012/03/05</i>   | <i>20 / 20</i> |

- (e) Absolute maximum rating specified above has to be always kept in any case. Exceeding it may cause non-recoverable damage of electronic components or, nevertheless, burning.
- (f) When a static image is displayed for a long time, remnant image is likely to occur.
- (g) Be sure to avoid bending the FPC to an acute shape, it might break FPC.

#### 12.4 Others

- (a) If the liquid crystal leaks from the panel, it should be kept away from the eyes or mouth.
- (b) It is recommended to peel off the protection film on the ITO film slowly so that the electrostatic charge can be minimized.
- (c) It is recommended to peel off the protection film on the polarizer slowly so that the electrostatic charge can be minimized.

## 13. Records Of Version

| <b>Version</b> | <b>Revise Date</b> | <b>Page</b> | <b>Content</b>                 |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
