

Dual-Output, Multimode CD-RW/DVD Laser-Diode Drivers

MAX9483/MAX9484

General Description

The MAX9483/MAX9484 high-performance, multimode, laser-diode drivers (LDDs) are designed for CD and DVD combination pickup heads. The drivers consist of three input channels, an RF oscillator, and two precision current-amplifier outputs to drive the CD and DVD laser diodes. The MAX9483/MAX9484 support multiple CD and DVD read/write standards, such as CD-R/RW, DVD-R, DVD+R, DVD-RW, DVD+RW, and DVD-RAM by choosing the writing control signals and input currents on these input channels. The peak total output current is 400mA with a current gain of 100 at each channel. External resistors set the oscillation frequency and output swing. The MAX9484 features an extra resistor input allowing the oscillation frequencies of the two outputs to be set separately. Additionally, the MAX9484 allows the writing control signals to be received in low-voltage differential signal (LVDS) mode or single-ended mode to provide reliable high-speed writing.

The MAX9483 is offered in 16-pin QSOP and 4mm x 4mm 16-pin thin QFN packages. The MAX9484 is offered in a 4mm x 4mm 20-pin thin QFN package. Both devices are specified for 4.5V to 5.5V supply and 0°C to +70°C temperature range.

Applications

Laser Diode Driver for CD-RW and DVD
Combos: CD-R/RW, DVD-R, DVD+R, DVD-RW,
DVD+RW, DVD-RAM
DVD Video Recorders
High-Power and High-Speed Laser-Writable
Device Drivers

Features

- ◆ Dual Output Ports with Three Controlled-Current Channels
- ◆ Support Various Laser-Diode Driver Standards
CD-R/RW, DVD-R, DVD+R, DVD-RW, DVD+RW,
DVD-RAM, and DVD Video
- ◆ MAX9483 is Pin and Function Compatible
with ATMEL T0806
- ◆ Independent Frequency Setting for the
Two Output Ports (MAX9484)
- ◆ Accepts Differential (LVDS) or Single-Ended
Inputs for Writing Data (MAX9484)
- ◆ Enable Control
- ◆ High-Current Swing Up to 270mA for the Reading
Current
- ◆ High 400mA Total Peak Writing Current
- ◆ Adjustable Modulation Frequency from 100MHz
to 600MHz
- ◆ Fast Output-Current Pulse Rise and Fall Time
1.0ns (typ)
- ◆ 4.5V to 5.5V Single-Supply Voltage
- ◆ No External Reference Clock Required
- ◆ 0°C to +70°C Commercial Temperature Range

Pin Configurations

Output Disable Time	t_{DIS}	ENABLE 50% high-low to I_{OUT} at 50% of final value at $I_{OUT} = 40mA$ (read)		60	100	ns
Output Enable Time	t_{EN}	ENABLE 50% low-high to I_{OUT} at 50% of final value at $I_{OUT} = 40mA$ (read)		60	100	ns
Oscillator Disable Time	t_{DISO}	ENOSC 50% high-low to I_{OUT} at 50% of final value at $I_{OUT} = 40mA$ (read)		4	10	ns
Oscillator Enable Time	t_{EHO}	ENOSC 50% high-low to I_{OUT} at 50% of final value at $I_{OUT} = 40mA$ (read)		25	50	ns
Channel-Select Delay	t_{ODH}	OUTSEL 50% low-high to I_{OUT} at 50% of final value measured at OUT1		2.9	10	ns
	t_{ODL}	OUTSEL 50% high-low to I_{OUT} at 50% of final value measured at OUT2		2.9	10	

Note 1: Current into a pin is defined as positive. Current out of a pin is defined as negative. All voltages are referenced to ground except V_{TH} .

Note 2: Maximum and minimum limits over temperature are guaranteed by design and characterization. Devices are production tested at $T_A = +25^\circ C$.

Note 3: Linearity of the amplifier is calculated using a best-fit method at three operating points of I_{OUT} at 20mA, 40mA, and 60mA. $I_{OUT} = (I_{IN} \times GAIN) + I_{OFFSET}$.

Note 4: Guaranteed by design and characterization. Limit set at ± 6 sigma.

Dual-Output, Multimode CD-RW/DVD Laser-Diode Drivers

Typical Operating Characteristics

($V_{CC} = V_{CCO_} = +5V$, $T_A = +25^\circ C$, unless otherwise noted.)

MAX9483/MAX9484

Figure 1. Timing Diagram of Output vs. Control Signals

Detailed Description

Read Channel and Write Channels

The MAX9483/MAX9484 high-performance multimode LDDs are designed for CD and DVD combination pick-up heads. The drivers have three current channels. Each channel has a current input $IN_{_}$ ($_ = 1, 2, \text{ or } 3$) and a channel control signal (ENABLE, NE2, or NE3). IN_1 supplies the reference for the read channel, which provides the read current or the offset current to the lasers. The other two channels are the write channels. The currents of these two channels are superimposed on the read current that serves as the offset current for the laser in write mode. The offset current significantly reduces the laser output ramp-up time. When ENABLE is low, all three channels are disabled. Driving ENABLE high enables the read channel and leaves the other two write channels to be controlled by NE2 and NE3 (see Figure 1). By selecting the input currents at IN_2 and

IN_3 , as well as the signal timing of NE2 and NE3, the drivers can generate various current waveforms for different CD/DVD writing standards. All three channels have a current gain of 100. The maximum total current each output can provide is 400mA.

RF Oscillator

To reduce the laser-mode hopping noise in read mode, modulate the read current with an oscillator with a 100MHz to 600MHz frequency. An external resistor, R_F , determines the oscillator frequency selection. For the MAX9484, two external resistors, R_{F1} and R_{F2} , are used to select the oscillator frequency for CD and DVD lasers separately. The swing amplitude of the oscillator current is set by two external resistors, R_{S1} and R_{S2} , one for CD and one for DVD. The oscillator is enabled when both ENABLE and ENOSC are driven high.

Dual-Output, Multimode CD-RW/DVD Laser-Diode Drivers

Applications Information

LVDS Inputs for MAX9484

The MAX9484 input control signals, NE2₋ and NE3₋, are compatible with LVDS or single-ended inputs. The LVDS inputs allow the driver to handle higher data writing rates. When using single-ended input signals, such as LVTTTL or SSTL₂, connect NE2₋ and NE3₋ to REF.

Laser Safety and IEC 825

Using the MAX9483/MAX9484 laser drivers alone does not ensure that a transmitter design is compliant with IEC 825. The entire transmitter circuit and component selections must be considered. Customers must determine the level of fault tolerance required by their application. Note that Maxim products are not designed or authorized for use as components in systems intended for surgical implantation into the body, for applications intended to support or sustain life, or for any other application where the failure of a Maxim product could create a situation where personal injury or death may occur.

NOTES:

- DIMENSIONING & TOLERANCING CONFORM TO ASME Y14.5M-1994.
- ALL DIMENSIONS ARE IN MILLIMETERS. ANGLES ARE IN DEGREES.
- N IS THE TOTAL NUMBER OF TERMINALS.

△ THE TERMINAL #1 IDENTIFIER AND TERMINAL NUMBERING CONVENTION SHALL CONFORM TO JEDEC 95-1 SPP-012. DETAILS OF TERMINAL #1 IDENTIFIER ARE OPTIONAL, BUT MUST BE LOCATED WITHIN THE ZONE INDICATED. THE TERMINAL #1 IDENTIFIER MAY BE EITHER A MOLD OR MARKED FEATURE.

△ DIMENSION b APPLIES TO METALLIZED TERMINAL AND IS MEASURED BETWEEN 0.25 mm AND 0.30 mm FROM TERMINAL TIP.

△ ND AND NE REFER TO THE NUMBER OF TERMINALS ON EACH D AND E SIDE RESPECTIVELY.

7. DEPOPULATION IS POSSIBLE IN A SYMMETRICAL FASHION.

△ COPLANARITY APPLIES TO THE EXPOSED HEAT SINK SLUG AS WELL AS THE TERMINALS.

9. DRAWING CONFORMS TO JEDEC MO220, EXCEPT FOR T2444-1, T2444-3 AND T2444-4.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
