## Wireless Global Limit Switch

The Limitless™ product line combines the best of MICRO SWITCH™ global limit switches with the latest commercial off-the-shelf wireless technology. Wireless enabled limit switches can be used for position sensing and presence/absence detection for a vast number of applications.

The Limitless™ Series is especially beneficial for remote monitoring applications where wiring or wire maintenance is not physically possible or economically feasible. Combining this greater flexibility with proven harsh duty packaging can result in increased efficiencies and improved protection for machines, equipment, OEMs, and operators.

### ***What makes our wireless solutions better?***

- Enables control and/or position notification in remote parts of machinery or manufacturing plants, where wiring is too costly or not possible
- Provides the ability to reconfigure and network multiple interfaces, or point-to-point with unique addresses which allows for adding, subtracting, or relocating Limitless™ inputs with ease
- Lowers installation/maintenance costs by removing the need to wire Limitless™ switches making conduit, strain relief, clips, connectors, and junction boxes unnecessary
- May decrease issues with wire connection integrity and cable degradation on moving equipment

## Features and Benefits

### WIRELESS DESIGN

Radio (license-free and global): WPAN 802.15.4, 2.4 GHz, point-to-point to deliver **reliable, flexible, and secure wireless transmission**. Enables control and monitoring from remote locations where wiring is too costly or not practical (up to 305 m [1000 ft]).

### SEALED FOR HARSH ENVIRONMENTS

The WGLA Series features **IP67, NEMA 1, 4, 12, and 13 sealing**. Sealed zinc die-cast and powder coated enclosure designed to meet the common dimensions and characteristics defined in **EN50041** for easy installation and compatibility with other products in the field.

*Range of 305 m [1000 ft]*

### REMOTE CONTROL AND MONITORING

Enables users to monitor and/or control equipment, access points, and presence/absence detection in remote locations where wiring is too costly or impractical to install. The WGLA Series consumes ultra-low power to prolong battery life and has **direct or remote mounted antenna options**.

*Consumes ultra-low power to prolong battery life*

### DESIGN OPTIONS

Actuator heads can be **rotated in 90° increments** to allow for flexibility in applications. Multiple actuators can also be applied to any side rotary WGLA Limitless™ switch.

### CONFIGURABILITY

**Able to configure** multiple WGLA options which easily allows for adding, removing, or relocating Limitless™ WGLA switches. Helps to eliminate issues with wire connection integrity on moving equipment.

### MINIMIZES COSTS

**Minimizes installation/maintenance costs** with no wires, conduit, strain relief, clips, connectors, or connection boxes to install or maintain.
