Introduction

The chapter “**Generic Cabling**” shows HARTING’s complete cabling portfolio, which simply and efficiently networks machinery, equipment and controllers.

“**Generic**” here stands for profile independent, which means that the cabling infrastructure is laid out with **IEEE 802.3** as the fundamental transfer protocol and consequently all cables and connectors are 8-wire. With this every Ethernet based protocol and / or profile can be carried over the cabling infrastructure.

In order to guarantee that the cabling system is future-proof, the portfolio is oriented towards the current European and International cabling standards, for example **ISO/IEC 24 702** and the draft European standard **prEN 50 173-1: 2006**.

The use of connector types specified in the above standards in all components, for example the **HARTING PushPull RJ45**, offers the user a high degree of compatibility, reduces equipment maintenance and handling, decreases stock of replacement parts and thereby substantially reduces costs.

HARTING’s generic cabling system also allows the seamless integration of machinery, equipment and controller networks into the customer’s existing **IT network**. A large variety of process control functions can now be initiated or monitored from supervisory computers without modification or other efforts. System resources such as databases can be made available to or fed by all network connected devices. Operator workflows and processes can be made continuously simpler, faster and more efficient.

This generic cabling system is part of HARTING’s comprehensive **Automation IT** network solution, which brings together active network technology, cabling and solutions for device and equipment power supply.

The generic cabling system’s product portfolio covers:

- **Distributors and Connector boxes:** Termination and distribution of cables in harsh IP 65 / IP 67 environments, but also within control or distribution cabinets.
- **Panel feed-throughs:** To ensure cable introduction from IP 65 / IP 67 environments into control or distribution cabinets.
- **System cables:** Made-up system cables for quick connection of terminal boxes, distributors or active devices with machines, equipment and controllers.
- **Connectors:** Connector sets to make up specific system cables onsite.
- **Cables:** A comprehensive cable portfolio for the laying out / manufacture of system cables onsite.

The advantages of the HARTING generic cabling system at-a-glance:

- **Profile independent cabling structure**, usable for all Ethernet applications
- Supports all **safety features** and **real-time requirements** of the diverse applications
- Can be expanded and integrated into existing **IT infrastructures** without problems
- Conformance to **ISO/IEC 24 702** makes roll-outs easier in international firms
- Use of **standardised connectors** reduces the variety of parts and makes purchasing and stocking of components easier
- **Future-proof** cabling and connectors allow the problem-free deployment of new technology such as **Gigabit Ethernet** or **PoE**
- The high **quality** of the cabling system guarantees a long **useful life** and **reliable operations**
- Simple planning, installation and reliable operation **saves costs** and delivers a high ROI
- The generic cabling system is part of **HARTING’s one-stop Automation IT** network solution

Distribution modules and Outlets

HARTING Cabinet Outlet RJ45

RJ45 distribution module for IP 20 environments (top-hat rail mounting)

IP 20	☒	IP 65 / IP 67	☐	IP 65 / IP 67 to IP 20	☐	Cat. 5	☐	Cat. 6	☒
-------	-------------------------------------	---------------	--------------------------	------------------------	--------------------------	--------	--------------------------	--------	-------------------------------------

Number of ports, Copper / Termination	2 / RJ45 (Twisted Pair)
Transmission performance	Category 6 / Class E up to 250 MHz according to ISO/IEC 11 801:2002, prEN 50 173-1
Transmission rate	10/100/1000 Mbit/s
Termination	LSA-PLUS module, terminated without special tools
Strand diameter	AWG 24 - 22 (0.5 mm - 0.65 mm) solid and stranded
Strand isolation	0.7 mm - 1.6 mm
Cable diameter	6 mm - 9 mm
Shielding	fully shielded, 360° shielding contact
Mounting	mounting onto 35 mm top-hat mounting rail acc. to DIN EN 60 715, alignable
Dimensions (H x W x D)	82 x 28.4 x 74 mm
Degree of protection	IP 20
Operating temperature range	- 20 °C to + 70 °C
Housing material	Polycarbonate, V0
Colour	light grey RAL 7035

Advantages

Simple mounting
Cable entering ether from bottom or from top
Dust protection covers
Port identification
Angled outputs

Identification	Part number	Drawing	Dimensions in mm

PROFINET Type B cable, Hybrid Industrial Cat. 5 Hybrid cable, 4-wire + 4 x power	C·P 62

Introduction

“**Profile-specific Cabling – PROFINET**” shows HARTING’s complete cabling portfolio, which simply and efficiently networks PROFINET-conformant machines, equipment and controllers.

PROFINET is the continuation of PROFIBUS technology, based on **Ethernet TCP/IP**. There are in principle two different functional classes:

- **PROFINET CBA** (Component-based Automation) for communications between intelligent automation devices
- **PROFINET IO** for communications between a controller and decentralised field devices

Three performance classes are implemented:

- **TCP/IP** – ethernet communications without real-time requirements
- **RT** – real-time communication for I/O data traffic, in particular in automation technology
- **IRT** – isosynchronous real-time communication, especially for all motion control applications

Essentially, all PROFINET applications can transmit over a future-proof generic cabling system. However the PNO (PROFINET User Organisation) has developed special guidelines for cabling components and installation practices and so all PROFINET cables and connectors are implemented with **4 wires**.

In contrast to generic cabling, PROFINET defines interfaces for power supply and/or the general transmission of data and power (so-called **hybrid** solutions). The HARTING PROFINET cabling portfolio includes these connector types, for example the **Han® 3 A Hybrid**.

The use of connector types defined in the PROFINET guidelines, for example the **Han® PushPull RJ45**, that are also recommended by **AIDA** (Automation Initiative German Domestic Automobile Manufacturers), offers customers a high level of compatibility within PROFINET conformant cabling.

HARTING’s PROFINET cabling system consequently allows an easy machine-, equipment- and controller-network enhancement within a customer’s existing PROFINET structure.

This PROFINET cabling system is part of HARTING’s comprehensive **Automation IT** network solution, which brings together active network technology, cabling and solutions for device and equipment power supply.

The PROFINET cabling system’s product portfolio covers:

- **Distributors and Connector boxes:** Termination and distribution of cables in harsh IP 65 / IP 67 environments, but also within control or distribution cabinets.
- **Panel feed-throughs:** To ensure reliable cable introduction from IP 65 / IP 67 environments into control or distribution cabinets.
- **System cables:** Made-up system cables for quick connection of terminal boxes, distributors or active devices with machines, equipment and controllers.
- **Connectors:** Connector sets to make up specific system cables onsite.
- **Cables:** A comprehensive cable portfolio for the laying out / manufacture of system cables onsite.

The advantages of the HARTING PROFINET cabling system at-a-glance

- **PROFINET conformant cabling infrastructure**, usable for all PROFINET functional and performance classes
- Supports all PROFINET **safety features** and **real-time requirements**
- Can be expanded and integrated into existing **PROFINET infrastructures** without problems
- Conformance with AIDA guidelines makes roll-outs in the auto industry easier
- Use of PROFINET conformant **connectors** reduces the variety of parts and makes purchasing and stocking of components easier
- Special solutions for simultaneous (Hybrid) and/or separate power transmission enhances network functionality
- The high **quality** of the cabling system guarantees a long **useful life** and **reliable operations**
- Simple planning, installation and reliable operation **saves costs** and delivers a high ROI
- The PROFINET cabling system is part of **HARTING’s one-stop Automation IT** network solution

Distribution modules and Outlets

HARTING Cabinet Outlet RJ45

RJ45 distribution module for IP 20 environments (top-hat rail mounting)

IP 20	☒	IP 65 / IP 67	☐	IP 65 / IP 67 to IP 20	☐	Cat. 5	☐	Cat. 6	☒
-------	-------------------------------------	---------------	--------------------------	------------------------	--------------------------	--------	--------------------------	--------	-------------------------------------

Number of ports, Copper / Termination	2 / RJ45 (Twisted Pair)
Transmission performance	Category 6 / Class E up to 250 MHz according to ISO/IEC 11 801:2002, prEN 50 173-1
Transmission rate	10/100/1000 Mbit/s
Termination	LSA-PLUS module, terminated without special tools
Strand diameter	AWG 24 - 22 (0.5 mm - 0.65 mm) solid and stranded
Strand isolation	0.7 mm - 1.6 mm
Cable diameter	6 mm - 9 mm
Shielding	fully shielded, 360° shielding contact

Mounting	mounting onto 35 mm top-hat mounting rail acc. to DIN EN 60 715, alignable

Wiring	4-pole, 1:1 (RJ45 contacts 1/2 and 3/6)
Transmission performance	Category 5 / Class D up to 100 MHz according to ISO/IEC 11 801:2002, prEN 50 173-1
Transmission rate	10/100 Mbit/s
Shielding	fully shielded, 360° shielding contact
Standard lengths	0.5 m / 1 m / 1.5 m / 2 m / 3 m / 5 m other lengths on request
Advantages	Robust industrial design For especially space-saving cabling

Identification

Connector types

RJ45 PushPull, overmoulded, angled, one side pre-assembled

Cable types

PROFINET Cable type	Type A	Type B	Type C	Outdoor
Cables	Copper, solid, shielded	Copper, stranded, shielded	Copper, stranded, shielded, trailing cables useable	Copper, stranded, shielded
Wire gauge	2 x 2 x AWG 22/1	2 x 2 x AWG 22/7	2 x 2 x AWG 22/7	2 x 2 x AWG 22/7
Sheath material	PVC	PVC	PUR	PVC
Operating temperature range	– 40 °C to + 70 °C	– 40 °C to + 70 °C	– 40 °C to + 70 °C	– 45 °C to + 60 °C

Wiring

4-pole (RJ45 contacts 1/2 and 3/6)

Transmission performance

Category 5 / Class D up to 100 MHz
according to ISO/IEC 11 801:2002, prEN 50 173-1

Transmission rate

10/100 Mbit/s

Shielding

fully shielded, 360° shielding contact

Standard lengths

1.5 m / 3 m / 5 m / 10 m / 20 m
other lengths on request

Advantages

robust cable duct via overmoulding
For especially space-saving cabling
Exact length can be adjusted
Use HARTING PushPull RJ45 connector (09 45 145 1100)

Introduction

The chapter “**Profile Specific Cabling – EtherNet/IP**” shows the complete HARTING cabling portfolio, that links machinery, equipment and controllers in accordance with the **ODVA guidelines**.

EtherNet/IP together with **DeviceNet™** and **ControlNet™** uses a general application layer – the “**Common Industrial Protocol**” (CIP™). CIP™ makes possible the use of general software and hardware interfaces and consequently the integrated connection of Automation components from the field level over the control level up to the management level. EtherNet/IP demonstrates the implementation of CIP™ over TCP/IP and **Ethernet over IEEE 802.3**.

Fundamentally all EtherNet/IP applications can be carried over a future-proof generic cabling system. ODVA approves of several variants of cabling infrastructure and includes **shielded cabling** (STP) as well as **unshielded** (UTP). Unshielded systems contain a high risk of **EMC** interference and consequently to service reliability. The exact use of UTP systems must be checked – in case of doubt a shielded system is to be preferred.

Together with the possibility of linking 8-wire cables and connectors, EtherNet/IP already leans relatively strongly on the principles of generic cabling.

However in contrast to generic cabling, EtherNet/IP IP 65 / IP 67 infrastructure solutions go back to a special bayonet-interface for connectors and these are also included in the HARTING range of EtherNet/IP cabling, e.g. Han-Max®.

HARTING's EtherNet/IP cabling portfolio consequently allows a simple expansion of the networks for machines, equipment and controllers within customer's existing EtherNet/IP structures.

The portfolio is part of HARTING's comprehensive **Automation IT** network solution, which brings together active network technology, cabling and solutions for device and equipment power supply.

The EtherNet/IP cabling product portfolio covers:

- **Distributors and Connector boxes:** Termination and distribution of cables in harsh IP 65 / IP 67 environments, but also within control or distribution cabinets.
- **Panel feed-throughs:** To ensure cable introduction from IP 65 / IP 67 environments into control or distribution cabinets.
- **System cables:** Made-up system cables for quick connection of terminal boxes, distributors or active devices with machines, equipment and controllers.
- **Connectors:** Connector sets to make up specific system cables onsite.
- **Cables:** A comprehensive cable portfolio for the laying out / manufacture of system cables onsite.

The advantages of the HARTING EtherNet/IP cabling system at-a-glance:

- EtherNet/IP conformant cabling infrastructure, usable for EtherNet/IP, DeviceNet™ and ControlNet™ applications
- Supports all safety features and real-time requirements of EtherNet/IP
- Can be expanded and integrated into existing EtherNet/IP infrastructures without problems
- Conformance to ODVA guidelines makes roll-outs easier in firms which have set up EtherNet/IP as the communications platform
- Use of ODVA-recommended connectors reduces the variety of parts and makes purchasing and stocking of components easier
- Closeness to generic cabling allows the use of Gigabit Ethernet or PoE in the network
- The high quality of the cabling system guarantees a long useful life and reliable operations
- Simple planning, installation and reliable operation saves costs and delivers a high ROI
- The EtherNet/IP cabling system is part of HARTING's one-stop Automation IT network solution

Distribution modules and Outlets

HARTING Cabinet Outlet RJ45

RJ45 distribution module for IP 20 environments (top-hat rail mounting)

Sheath material	PVC
Cable sheath diameter	6.7 mm
Transmission performance	Category 5 / Class D up to 100 MHz according to ISO/IEC 11 801:2002, prEN 50 173-1
Transmission rate	10/100/1000 Mbit/s
Shielding	each pair shielded and additional shield for the whole cable
Operating temperature range	– 45 °C to + 60 °C
Standard lengths	20 m / 50 m / 100 m / 500 m
Colour	Black
Advantages	Robust industrial-compatible design Applicable also for outside applications

Identification	Part number	Drawing	Dimensions in mm
Industrial Cat. 5 outdoor cable, 8-wire 20 m ring 50 m ring 100 m ring 500 m drum	09 45 600 0230 09 45 600 0240 09 45 600 0200 09 45 600 0220		

Cables

Industrial Cat. 5 cable, stranded, 8-wire, PUR
to make up flexible connections
(one- or two-sided assembled system cables)

IP 20	☒	IP 65 / IP 67	☒	PUR	Cat. 5	☒	Cat. 6	☐
-------	-------------------------------------	---------------	-------------------------------------	-----	--------	-------------------------------------	--------	--------------------------

Cable structure	4 x 2, Twisted Pair, shielded, PIMF
Core structure	Cord, 4 x 2 x AWG 26/7
Sheath material	PUR
Cable sheath diameter	6.7 mm
Transmission performance	Category 5 / Class D up to 100 MHz according to ISO/IEC 11 801:2002, prEN 50 173-1
Transmission rate	10/100/1000 Mbit/s
Shielding	each pair shielded and additional shield for the whole cable
Operating temperature range	– 45 °C to + 60 °C
Standard lengths	20 m / 50 m / 100 m / 500 m
Colour	Green
Advantages	Robust industrial-compatible design Halogen-free

Tools

Identification	Part number	
HARTING RJ Industrial® Gigalink- Mounting tools for 4-pair HARTING RJ Industrial® Gigalink connectors	09 45 800 0500	 With the RJ Industrial Gigalink Assembly Tool 4-pair connectors can be quickly, easily and reliably connected to flexible cables.
HARTING RJ Industrial® Stripping Tool Stripping tool for 2-pair PROFINET cables including blade cassette	09 45 800 0000 09 45 800 0001	 The RJ Industrial Stripping Tool allows the insulation to be quickly and easily removed from 2-pair Industrial Ethernet cables with diameters between 2.5 - 8 mm. The tool is pre-set for a cable diameter of 6.5 mm. It allows the cable sheath and screening braid to be stripped consistently and simultaneously.
HARTING RJ Industrial® LSA-Punch Down Tool	09 45 800 0020	 The LSA-Punch Down Tool is used to wire RJ45 Industrial Metal Outlets (part no. 09 45 815 1100, see page C-P 6). The various conductors are cut to length and inserted into the insulation displacement contacts in a single pass.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
