

## Power CMOS Drivers With Voltage Tripler

### Features

- Power Driver With On Board Voltage Booster
- Low  $I_{DD}$  – <4mA
- Small Package – 8-Pin PDIP
- Under-Voltage Circuitry
- Fast Rise-Fall Time – <40nsec @ 1000pF
- Below-Rail Input Protection

### Applications

- Raises 5V to drive higher –  $V_{GS}$  (ON) MOSFETs
- Eliminates one system power supply

### Device Selection Table

Part Number	Package	Temp. Range
TC4626COE	16-Pin SOIC (Wide)	-55°C to +125°C
TC4626CPA	8-Pin PDIP	-40°C to +85°C
TC4626EOE	16-Pin SOIC (Wide)	-40°C to +85°C
TC4626EPA	8-Pin PDIP	0°C to +70°C
TC4626MJA	8-Pin CERDIP	0°C to +70°C
TC4627COE	16-Pin SOIC (Wide)	-55°C to +125°C
TC4627CPA	8-Pin PDIP	-40°C to +85°C
TC4627EOE	16-Pin SOIC (Wide)	-40°C to +85°C
TC4627EPA	8-Pin PDIP	0°C to +70°C
TC4627MJA	8-Pin CERDIP	0°C to +70°C

### Package Type

### General Description

The TC4626/TC4627 are single CMOS high speed drivers with an on-board voltage boost circuit. These parts work with an input supply voltage from 4 to 6 volts. The internal voltage booster will produce a  $V_{BOOST}$  potential up to 12 volts above  $V_{IN}$ . This  $V_{BOOST}$  is not regulated, so its voltage is dependent on the input  $V_{DD}$  voltage and output drive loading requirements. An internal undervoltage lockout circuit keeps the output in a low state when  $V_{BOOST}$  drops below 7.8 volts. Output is enabled when  $V_{BOOST}$  is above 11.3 volts.

### Functional Block Diagram

# TC4626/TC4627

## 1.0 ELECTRICAL CHARACTERISTICS

### Absolute Maximum Ratings\*

Supply Voltage .....	6.2V
Input Voltage, Any Terminal .....	$V_S + 0.3V$ to $GND - 0.3V$
Package Power Dissipation ( $T_A \leq 70^\circ C$ )	
PDIP .....	730mW
CERDIP .....	800mW
SOIC .....	760mW
Derating Factor   PDIP .....	5.6 mW/ $^\circ C$ Above $36^\circ C$
CERDIP .....	6.0mW/ $^\circ C$
Operating Temperature Range (Ambient)	
C Version .....	$0^\circ C$ to $+70^\circ C$
E Version .....	$-40^\circ C$ to $+85^\circ C$
M Version .....	$-55^\circ C$ to $+125^\circ C$
Storage Temperature Range .....	$-65^\circ C$ to $+150^\circ C$

\*Stresses above those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions above those indicated in the operation sections of the specifications is not implied. Exposure to Absolute Maximum Rating conditions for extended periods may affect device reliability.

### TC4626/TC4627 ELECTRICAL SPECIFICATIONS

Electrical Characteristics: $T_A = +25^\circ C$ , $V_{DD} = 5V$ , $C_1 = C_2 = C_3 = 10\mu F$ unless otherwise noted.						
Symbol	Parameter	Min	Typ	Max	Units	Test Conditions
<b>Input</b>						
$V_{IH}$	Logic 1, High Input Voltage	2.4	—	—	V

**FIGURE 3-1: INVERTING DRIVER SWITCHING TIME**

**FIGURE 3-2: NONINVERTING DRIVER SWITCHING TIME**

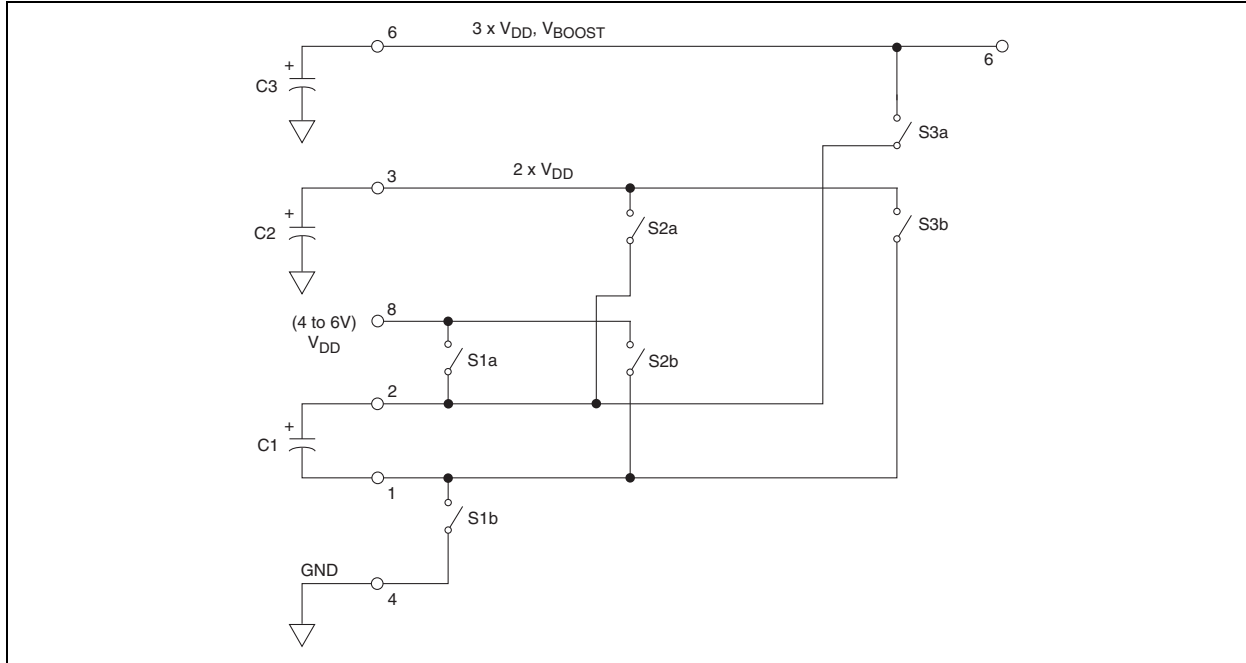

# TC4626/TC4627

## 3.1 BOOSTER FUNCTION

The voltage booster is an unregulated voltage tripler circuit. The tripler consists of three sets of internal switches and three external capacitors. S1a and S1b charge capacitor C1 to  $V_{DD}$  potential. S2a and S2b add

C1 potential to  $V_{DD}$  input to charge C2 to  $2 \times V_{DD}$ . S3a and S3b add C1 potential to C2 to charge C3 to  $3 \times V_{DD}$ . The position of the switches is controlled by the internal 4 phase clock.

## 4.0 TYPICAL CHARACTERISTICS

**Note:** The graphs and tables provided following this note are a statistical summary based on a limited number of samples and are provided for informational purposes only. The performance characteristics listed herein are not tested or guaranteed. In some graphs or tables, the data presented may be outside the specified operating range (e.g., outside specified power supply range) and therefore outside the warranted range.

## **Sales and Support**

### **Data Sheets**

Products supported by a preliminary Data Sheet may have an errata sheet describing minor operational differences and recommended workarounds. To determine if an errata sheet exists for a particular device, please contact one of the following:

1. Your local Microchip sales office
2. The Microchip Worldwide Site ([www.microchip.com](http://www.microchip.com))

Please specify which device, revision of silicon and Data Sheet (include Literature #) you are using.

### **New Customer Notification System**

Register on our web site ([www.microchip.com/cn](http://www.microchip.com/cn)) to receive the most current information on our products.

NOTES:

---

**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as “unbreakable.”

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

**QUALITY MANAGEMENT SYSTEM**  
**CERTIFIED BY DNV**  
**== ISO/TS 16949 ==**

*Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC<sup>®</sup> MCUs and dsPIC<sup>®</sup> DSCs, KEELOQ<sup>®</sup> code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.*

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
