

Your Search for Proximity Sensors Starts with the World-leading Performance and Quality of the E2E

- Standard Sensors for detecting ferrous metals.
- Wide array of variations. Ideal for a variety of applications.
- Models with different frequencies are also available to prevent mutual interference.
- Superior environment resistance with standard cable made of oil-resistant PVC and sensing surface made of material that resists cutting oil.
- Useful to help prevent disconnection. Cable protector provided as a standard feature.

Be sure to read *Safety Precautions* on page 25.

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Features

2-Wire Models

Pre-wired Models with Oil-resistant Reinforced PUR Cables Added to the Lineup and Easy Differentiation with Orange Head

Differentiation from standard models: Orange Head

Oil Resistance (Insulation service life): twice or three times that of oil-resistant vinyl chloride

Cable Flexibility: approximately twice that of vinyl chloride cables

More Flexibility at -40°C

Lineup includes models with Smartclick pre-wired connectors for fast connection.

Lineup includes models with self-diagnostic output to provide notification of failures and unstable detection conditions, such as coil burnout.

- Contributes to preventive maintenance to keep the line from stopping.

Reduced wiring, fewer resources, and low power consumption contribute to environmentalism.

- Wiring work and amount of copper wire used reduced to two thirds of that required for 3-wire models.
- Current consumption drastically reduced to less than 10% (when a DC 2-wire model is compared with a DC 3-wire model).

3-Wire Models

Lineup includes models with small diameter (3 dia., 4 dia., 5.4 dia., M5)

- All small-diameter models use sealed construction. Operation is stable even when the Sensor is mounted in a small space or embedded in metal.
- Bright indicators enable easily checking the installation condition.

Wide range of ambient operating temperatures: –40°C to 85°C (M8 to M30 models)

- Wide range of ambient operating temperatures also for small-diameter models: –25°C to 70°C
- Suitable for low-temperature and high-temperature applications, which are troublesome for photoelectric sensors.

Lineup includes models with flexible cable (4-dia. to M30 models)

- Reduced risk of disconnection in applications with moving parts.

E2E Guide to Selection by Purpose

Note: Refer to *Models Not Listed in this Catalog* for Long Body Models, Transmission Couplers, and Power Couplers.

E2E Model Number Legend

E2E- ① ② ③ ④ ⑤ ⑥ ⑦ - ⑧ ⑨ - ⑩ - ⑪ - ⑫ ⑬

| No. | Classification | Code | Meaning | Remarks |
|-----|--|----------|---|---|
| ① | Appearance | C | Cylindrical (not threaded) | Example: R6: 0.6 mm 1R5: 1.5 mm |
| | | X | Cylindrical (threaded) | |
| ② | Sensing distance | Number | Sensing distance (Unit: mm) | |
| | | R | Indication of decimal point | |
| ③ | Shielding | Blank | Shielded Models | Whether D models have polarity is defined by number ⑩. |
| | | M | Unshielded Models | |
| ④ | Power supply and output specifications | B | DC 3-wire PNP open-collector output | |
| | | C | DC 3-wire NPN open-collector output | |
| | | D | DC 2-wire polarity/no polarity | |
| | | E | DC 3-wire NPN collector load built-in output | |
| | | F | DC 3-wire PNP collector load built-in output | |
| | | T | AC/DC 2-wire | |
| | | Y | AC 2-wire | |
| ⑤ | Form of output switching element | 1 | Normally open (NO) | |
| | | 2 | Normally closed (NC) | |
| ⑥ | Oscillation frequency type | Blank | Standard frequency | Used to prevent mutual interference. |
| | | 5 | Different frequency | |
| ⑦ | Self-diagnosis | Blank | No | |
| | | 5 | Yes | |
| ⑧ | Connection method | Blank | Pre-wired | |
| | | M1 | M12-size metal connector | |
| | | M3 | M8-size metal connector | |
| ⑨ | Connector specifications | Blank | Connector Models DC 3-wire and AC 2-wire, DC 2-wire with self-diagnosis output, DC 2-wire with old pin arrangement | |
| | | G | Connector Models DC 2-wire with IEC pin arrangement | |
| | | J | Pre-wired Connector Models DC 3-wire and AC 2-wire, DC 2-wire with old pin arrangement | |
| | | GJ | Pre-wired Connector Models DC 2-wire with IEC pin arrangement | |
| | | TJ | Pre-wired Smartclick Connector Models DC 2-wire | |
| | | TGJ | Pre-wired Smartclick Connector Models DC 2-wire with IEC pin arrangement | |
| ⑩ | DC 2-wire polarity | Blank | Polarity | |
| | | T | No polarity | |
| ⑪ | Cable specifications | Blank | Standard PVC cable (oil resistant) | |
| | | R | Flexible PVC cable (oil resistant) | |
| | | U | Polyurethane cable (oil resistant and reinforced) | |
| ⑫ | New model | N | New model (Applies only to DC 2-wire pre-wired and shielded models.) | This is blank if the cable specification in number ⑪ is R or U. |
| ⑬ | Cable length | Letter M | Cable length (Unit: m) (Applicable to Pre-wired Models and Pre-wired Connector Models.) | Example: 2M 0.3M |

Note: The purpose of this model number legend is to provide understanding of the meaning of specifications from the model number.
Models are not available for all combinations of code numbers.

Ordering Information

2-Wire Models

Shielded DC 2-wire Models with No Self-diagnostic Output [Refer to *Dimensions* on page 27.]

| Appearance | Sensing distance | | | Connection method | Cable specifications | Polarity | Operation mode | Pin arrangement | Applicable connector code *2 | Model | | | | |
|------------------------|---|---------------------|---------------|---|--|----------|-------------------------------|---|-------------------------------|------------------------|----------------------|------------------|---|-----------------------|

*1. Models with different frequencies are also available. The model number is E2E-X □MD15S (example: E2E-X8MD15S 2M).

*2. Refer to page 22 for details.

Connector Pin Assignments of DC 2-Wire Models

- The connector pin assignments of each New E2E DC 2-Wire Model conform to IEC 947-5-2 Table III. (Only DC 2-Wire Models have been changed in comparison to the previous models.)
- The following models with conventional connector pin assignments are available as well. (Only NO Models can be used.)
The cable at the right should also be used if the XW3A-P□45-G11 Connector Junction Box is already being used.

| Cable length | Model |
|--------------|---------------|
| 500 mm | XS2W-D421-BY1 |

Models with conventional connector pin assignments are available as well.

| Appearance | Model | | | | |
|----------------|-------|-----------------------------|----|-----------------------------|---|
| | NO | Applicable connector code * | NC | Applicable connector code * | |

| Leakage current | | 0.8 mA max. | | | | | | | |
| Control output | Load current | 3 to 100 mA, Diagnostic output: 50 mA for -D1(5)S Models | | | | | | | |
| | Residual voltage *3 | 3 V max. (Load current: 100 mA, Cable length: 2 m, M1J-T Models only: 5 V max.) | | | | | | | |
| Indicators | | D1 Models: Operation indicator (red) and setting indicator (green) D2 Models: Operation indicator (red) | | | | | | | |
| Operation mode (with sensing object approaching) | | D1 Models: NO Refer to the timing charts under <i>I/O Circuit Diagrams</i> on page 19 for details. D2 Models: NC | | | | | | | |
| Diagnostic output delay | | 0.3 to 1 s | | | | | | | |
| Protection circuits | | Surge suppressor, Load short-circuit protection (for control and diagnostic output) | | | | | | | |
| Ambient temperature range | | Operating: −25 to 70°C, Storage: −40 to 85°C (with no icing or condensation) | | | | | | | |
| Ambient humidity range | | Operating/storage: 35% to 95% (with no condensation) | | | | | | | |
| Temperature influence | | ±15% max. of sensing distance at 23°C in the temperature range of −25 to 70°C | | ±10% max. of sensing distance at 23°C in the temperature range of −25 to 70°C | | | | | |
| Voltage influence | | ±1% max. of sensing distance at rated voltage in the rated voltage ±15% range | | | | | | | |
| Insulation resistance | | 50 MΩ min. (at 500 VDC) between current-carrying parts and case | | | | | | | |
| Dielectric strength | | 1000 VAC, 50/60 Hz for 1 minute between current carry parts and case | | | | | | | |
| Vibration resistance | | Destruction: 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions | | | | | | | |
| Shock resistance | | Destruction: 500 m/s² 10 times each in X, Y, and Z directions | | Destruction: 1,000 m/s² 10 times each in X, Y, and Z directions | | | | | |
| Degree of protection | | Pre-wired Models: IEC 60529 IP67, in-house standards: oil-resistant Connector Models: IEC 60529 IP67 | | | | | | | |
| Connection method | | Pre-wired Models (Standard cable length: 2 m), Connector Models, or Pre-wired Connector Models (Standard cable length: 0.3 m) | | | | | | | |
| Weight (packed state) | Pre-wired Models | Approx. 60 g | | Approx. 70 g | | Approx. 130 g | | Approx. 175 g | |
| | Pre-wired Connector Models | --- | | Approx. 40 g | | Approx. 70 g | | Approx. 110 g | |
| | Connector Models | Approx. 15 g | | Approx. 25 g | | Approx. 40 g | | Approx. 90 g | |
| Materials | Case | Stainless steel (SUS303) | | Nickel-plated brass | | | | | |
| | Sensing surface | PBT | | | | | | | |
| | Clamping nuts | Nickel-plated brass | | | | | | | |
| | Toothed washer | Zinc-plated iron | | | | | | | |
| Accessories | | Instruction manual | | | | | | | |

*1. Use the E2E within the range in which the setting indicator (green LED) is ON (except D2 Models).

*2. The response frequency is an average value.

Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

*3. The residual voltage of each M1J-T Model is 5 V. When connecting to a device, make sure that the device can withstand the residual voltage. (Refer to page 26 for details.)

| Protection circuits | | Load short-circuit protection, Surge suppressor, Reverse polarity protection | | | | | | | |
| Ambient temperature range *2 | | Operating/Storage: −40 to 85°C (with no icing or condensation) | | | | | | | |
| Ambient humidity range | | Operating/Storage: 35% to 95% (with no condensation) | | | | | | | |
| Temperature influence | | ±15% max. of sensing distance at 23°C in the temperature range of −40 to 85°C ±10% max. of sensing distance at 23°C in the temperature range of −25 to 70°C | | | | | | | |
| Voltage influence | | ±1% max. of sensing distance at rated voltage in the rated voltage ±15% range | | | | | | | |
| Insulation resistance | | 50 MΩ min. (at 500 VDC) between current-carrying parts and case | | | | | | | |
| Dielectric strength | | 1,000 VAC, 50/60 Hz for 1 minute between current carry parts and case | | | | | | | |
| Vibration resistance | | Destruction: 10 to 55 Hz, 1.5-mm double amplitude for 2 hours each in X, Y, and Z directions | | | | | | | |
| Shock resistance | | Destruction: 500 m/s ² 10 times each in X, Y, and Z directions | | Destruction: 1,000 m/s ² 10 times each in X, Y, and Z directions | | | | | |
| Degree of protection | | Pre-wired Models : IEC 60529 IP67, in-house standards: oil-resistant Connector Models : IEC 60529 IP67 | | | | | | | |
| Connection method | | Pre-wired Models (Standard cable length: 2 m) and Connector Models | | | | | | | |
| Weight (packed state) | Pre-wired Models | Approx. 65 g | | Approx. 75 g | | Approx. 150 g | | Approx. 195 g | |
| | Connector Models | Approx. 15 g | | Approx. 25 g | | Approx. 40 g | | Approx. 90 g | |
| Materials | Case | Stainless steel (SUS303) | | Nickel-plated brass | | | | | |
| | Sensing surface | PBT | | | | | | | |
| | Clamping nuts | Nickel-plated brass | | | | | | | |
| | Toothed washer | Zinc-plated iron | | | | | | | |
| Accessories | | Instruction manual | | | | | | | |

*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.

*2. When using an M8 Model at an ambient temperature between 70 and 85°C, supply 10 to 30 VDC to the Sensor and make sure that the Sensor has a control output of 100 mA maximum.

E2E-C□C/B□ and E2E-X1C/B□ DC 3-Wire Models

Refer to Introduction to Sensor I/O Connectors/Sensor Controllers for details.

Safety Precautions

Refer to *Warranty and Limitations of Liability*.

⚠ WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly.
Do not use it for such purposes.

⚠ CAUTION

- Do not short the load. Explosion or burning may result.
- Do not supply power to the Sensor with no load, otherwise Sensor may be damaged.

Applicable Models

E2E-CR6□

E2E-CR8□

E2E-X1□

E2E-C1□

Precautions for Correct Use

Do not use this product under ambient conditions that exceed the ratings.

● Design

Influence of Surrounding Metal

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.

Influence of Surrounding Metal

| DC 3-Wire Models E2E-X□C/B□ E2E-C□C/B□ | Shielded | A | 20 | | | |
| | | B | 15 | | | |

Note: Values in parentheses apply to Sensors operating at different frequencies.

* Mutual interference will not occur for close-proximity mounting if models with different frequencies are used together.

Loads with Large Surge Currents (E2E-X□T□)

If a load with a large surge current is connected, such as a relay, lamp, or motor, the surge current may cause the load short-circuit protection circuit to operate, resulting in operating errors.

● Mounting

Tightening Force

Do not tighten the nut with excessive force.
A washer must be used with the nut.

Shielded Models

Unshielded Models

- Note: 1. The allowable tightening strength depends on the distance from the edge of the head, as shown in the following table. (A is the distance from the edge of the head. B includes the nut on the head side. If the edge of the nut is in part A, the tightening torque for part A applies instead.)
2. The following strengths assume washers are being used.

| Model | Part A | | Torque |
|-------|------------|---|---------|
| | Dimension | | |
| M5 | | | 1 N·m |
| M8 | Shielded | 9 | 9 N·m |
| | Unshielded | 3 | |
| M12 | | | 30 N·m |
| M18 | | | 70 N·m |
| M30 | | | 180 N·m |

Refer to the following to mount the E2E-CR6, E2E-CR8 and E2E-C1 Unthreaded Cylindrical Models.

When using a set screw, tighten it to a torque of 0.2 N·m max.
(E2E-C1: 0.4 N·m max.)

Connecting a DC 2-Wire Proximity Sensor to a PLC (Programmable Controller)

Required Conditions

Connection to a PLC is possible if the specifications of the PLC and the Proximity Sensor satisfy the following conditions. (The meanings of the symbols are given at the right.)

- The ON voltage of the PLC and the residual voltage of the Proximity Sensor must satisfy the following.
 $V_{ON} \leq V_{CC} - V_R$
- The OFF current of the PLC and the leakage current of the Proximity Sensor must satisfy the following.
 $I_{OFF} \geq I_{leak}$
(If the OFF current is not listed in the PLC's input specifications, take it to be 1.3 mA.)
- The ON current of the PLC and the control output of the Proximity Sensor must satisfy the following.
 $I_{OUT} (min.) \leq I_{ON} \leq I_{OUT} (max.)$
The ON current of the PLC will vary, however, with the power supply voltage and the input impedance, as shown in the following equation.
 $I_{ON} = (V_{CC} - V_R - V_{PC}) / R_{IN}$

Example

In this example, the above conditions are checked when the PLC Unit is the C200H-ID212, the Proximity Sensor is the E2E-X7D1-N, and the power supply voltage is 24 V.

- $V_{ON} (14.4 V) \leq V_{CC} (20.4 V) - V_R (3 V) = 17.4 V$: OK
- $I_{OFF} (1.3 mA) \geq I_{leak} (0.8 mA)$: OK
- $I_{ON} = [V_{CC} (20.4 V) - V_R (3 V) - V_{PLC} (4 V)] / R_{IN} (3 k\Omega) = \text{Approx. } 4.5 mA$
Therefore, $I_{OUT} (min.) (3 mA) \leq I_{ON} (4.5 mA)$: OK
Connection is thus possible.

| |
|--|
| V _{ON} : ON voltage of PLC (14.4 V) |
| I _{ON} : ON current of PLC (typically 7 mA) |
| I _{OFF} : OFF current of PLC (1.3 mA) |
| R _{IN} : Input impedance of PLC (3 kΩ) |
| V _{PC} : Internal residual voltage of PLC (4 V) |
| V _R : Output residual voltage of Proximity Sensor (3 V) |
| I _{leak} : Leakage current of Proximity Sensor (0.8 mA) |
| I _{OUT} : Control output of Proximity Sensor (3 to 100 mA) |
| V _{CC} : Power supply voltage (PLC: 20.4 to 26.4 V) |
| Values in parentheses apply to the following PLC model and Proximity Sensor model. |
| PLC: C200H-ID212 |
| Sensor: E2E-X7D1-N |

Dimensions

(Unit: mm)
Tolerance class IT16 applies to dimensions in this data sheet unless otherwise specified.

Protective Covers

Sputter Protective Covers

Refer to Y92□ for details.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

(a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.

(b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See <http://www.omron.com/global/> or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
