## Overview

Over the later part of 2015, we will be changing the way we sell ITE power supplies thru distribution to no longer include AC cords with the units. During this time of transition you find both versions available for sale. They can be distinguished by the part number, parts ending in -10B will include a cord in the box, parts ending in -10A will not include a cord. If your distributor has not already made a recommendation on a cord, please do not hesitate to ask us for assistance

The FWC080 series is an external, switch mode power supply that offers leading edge converter efficiencies of up to 90% at 115 VAC. This high efficiency results in a compact size, lower internal temperature, and enhanced reliability. The FWC080 offers a power density of 4.2 watts per cubic inch and is ideal for applications requiring high power in a lightweight package. The FWC080 is well suited for IT, data, and telecom equipment and meets IEC 60950-1 standards.

The convection cooled FWC080 series measures 7.09" x 2.27" x 1.52" (180.2mm x 57.5mm x 38.6mm), weighs 1.52 lbs. (0.69kg), comes standard with an LED indicator, and has power factor correction. The 100 watt desktop power supply is available in models ranging from 12VDC to 48VDC. It is comprehensively protected against over-voltage, over-temperature, and short circuit conditions, and its demonstrated mean time between failure exceeds 200,000 hours. Designing with a FWC080 ensures a highly efficient, highly reliable power solution that reduces operating cost and ensures silent, maintenance-free operation.
