

High-Bandwidth, Quad DPDT Switches

General Description

The MAX4760/MAX4760A/MAX4761/MAX4761A (DPDT) analog switches operate from a single +1.8V to +5.5V supply. These switches feature a low 54pF (typ) capacitance for high-speed data switching applications.

The MAX4760/MAX4760A are quad double-pole/double-throw (DPDT) switches, and the MAX4761/MAX4761A are octal single-pole/double-throw (SPDT) switches. They have eight 2.0Ω (typ) on-resistance, low-capacitance switches to route audio and data signals. The MAX4760/MAX4760A have four logic inputs to control the switches in pairs. The MAX4761/MAX4761A have one logic control input and an enable input (EN) to disable the switches.

The MAX4760/MAX4760A/MAX4761/MAX4761A are available in a small 36-pin (6mm x 6mm) TQFN and 36-bump (3mm x 3mm) chip-scale package (UCSP™).

Applications

USB Signal Switching
Audio-Signal Switching
Cellular Phones

PDA's/Handheld Devices
Notebook Computers

Functional Diagrams

UCSP is a trademark of Maxim Integrated Products, Inc.

Features

- ◆ USB 1.1 and USB 2.0 (Full Speed 12Mbps) Signal-Switching Compliant
- ◆ Data and Audio Signal Routing
- ◆ Low-Capacitance Data Switches
- ◆ Less than 0.2ns Skew
- ◆ -3dB Bandwidth: 150MHz (typ)
- ◆ 0.2Ω (typ) Channel-to-Channel Matching
- ◆ 0.8Ω (typ) On-Resistance Flatness
- ◆ Rail-to-Rail Signal Handling
- ◆ 0.03% (typ) THD
- ◆ +1.8V to +5.5V Supply Range
- ◆ Low Supply Current with 1.8V Logic Threshold (MAX4760A/MAX4761A)
- ◆ Tiny 36-Bump UCSP (3mm x 3mm)
- ◆ 36-Pin TQFN (6mm x 6mm)
- ◆ -40°C to +85°C Operating Temperature Range

Storage Temperature Range	-65°C to +150°C
Lead Temperature (soldering, 10s)	+300°C
Bump Temperature (soldering)	
Infrared (15s)	+220°C
Vapor Phase (60s)	+215°C

Note 1: Signals on NO₋, NC₋, COM₋ exceeding V+ or GND are clamped by internal diodes. Limit forward-diode current to maximum current rating.

Stresses beyond those listed under “Absolute Maximum Ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

ELECTRICAL CHARACTERISTICS

(V+ = +2.7V to +5.25V, T_A = -40°C to +85°C, unless otherwise noted. Typical values are at V+ = 3V, T_A = +25°C.) (Notes 2, 3)

		V+ = 5.5V, V _{IN_} = 0V or V+ (MAX4760A/MAX4761A)	+25°C		0.01		
			T _{MIN} to T _{MAX}			1.0	
		V+ = 5.5V, V _{IN_} = 1.8V (MAX4760A/MAX4761A)	+25°C		5.5		
			T _{MIN} to T _{MAX}			12	

Note 2: The algebraic convention is used in this data sheet; the most negative value is shown in the minimum column.

Note 3: UCSP packages are 100% tested at +25°C and limits across the full temperature range are guaranteed by correlation and design. TQFN packages are 100% tested at +85°C and limits across the full temperature range are guaranteed by correlation and design.

Note 4: R_{ON} and ΔR_{ON} matching specifications are guaranteed by design.

Note 5: ΔR_{ON} = R_{ON}(MAX) - R_{ON}(MIN).

Note 6: Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured over the specified analog signal ranges.

Note 7: Guaranteed by design, not production tested.

Note 8: Off-isolation = 20log₁₀ [V_{COM_}/(V_{NO_} or V_{NC_})], V_{COM_} = output, V_{NO_} or V_{NC_} = input to off switch.

Note 9: Between any two switches.

MAX4760/MAX4760A/MAX4761/MAX4761A

High-Bandwidth, Quad DPDT Switches

Detailed Description

The MAX4760/MAX4760A quad double-pole/double-throw (DPDT) and the MAX4761/MAX4761A octal single-pole/double-throw (SPDT) analog switches operate from a single +1.8V to +5.5V supply. These devices are fully specified for +3V applications.

The MAX4760/MAX4760A/MAX4761/MAX4761A have a guaranteed 2.0Ω (typ) on-resistance to switch data or audio signals. The low 54pF (typ) capacitance and 0.2ns change in skew makes them ideal for data switching applications. The MAX4760/MAX4760A have four logic inputs to control two switches in pairs and the MAX4761/MAX4761A have one logic control input and an enable input ($\overline{EN}$) to disable the switches.

Applications Information

Digital Control Inputs

The MAX4760/MAX4760A/MAX4761/MAX4761A logic inputs accept up to +5.5V regardless of the supply voltage. For example, with a +3.3V supply, IN_{-} can be driven low to GND and high to +5.5V, which allows mixed logic levels in a system. Driving the control logic inputs rail-to-rail also minimizes power consumption.

For the MAX4761/MAX4761A, drive $\overline{EN}$ low to enable. When $\overline{EN}$ is high, COM_{-} is high impedance.

Analog Signal Levels

Analog signal inputs over the full voltage range (0V to V_{+}) are passed through the switch with minimal change in on-resistance (see the *Typical Operating Characteristics*). The switches are bidirectional so NO_{-} , NC_{-} , and COM_{-} can be either inputs or outputs.

Power-Supply Bypassing

Power-supply bypassing improves noise margin and prevents switching noise from propagating from the V_{+} supply to other components. A 0.1 μ F capacitor connected from V_{+} to GND is adequate for most applications.

Figure 1. Overvoltage Protection Using an External Blocking Diode

Power-Supply Sequencing

CMOS devices require proper power-supply sequencing. Always apply V_{+} before the analog signals, especially if the input signal is not current limited. If sequencing is not possible, and the input signal is not current limited to less than 20mA, add a small-signal diode (Figure 1). Adding the diode reduces the analog range to a diode drop (0.7V) below V_{+} and increases the on-resistance slightly. The maximum supply voltage must not exceed +6V at any time.

UCSP Applications Information

For the latest application details on UCSP construction, dimensions, tape carrier information, printed circuit board techniques, bump-pad layout, and recommended reflow temperature profile, as well as the latest information on reliability testing results, refer to the Application Note 1891: *Wafer-Level Packaging (WLP) and Its Applications* available on Maxim's website at www.maxim-ic.com/ucsp.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
