

FEATURES

Conversion loss: 9 dB typical
LO to RF isolation: 40 dB typical
LO to IF isolation: 35 dB typical
RF to IF isolation: 22 dB typical
Input IP3: 18 dBm typical
Input P1dB: 11 dBm typical
Input IP2: 55 dBm typical
Passive double balanced topology
8-lead, 3 mm × 3 mm, MINI_SO_EP

APPLICATIONS

Microwave radios
**High performance radio local area network (HiperLAN) and
unlicensed national information infrastructure (U-NII)**
Industrial, scientific, and medical (ISM)

GENERAL DESCRIPTION

The **HMC219B** is an ultraminiature, general-purpose, double balanced mixer in an 8-lead plastic surface mini small outline package with exposed pad (MINI_SO_EP). This passive monolithic microwave integrated circuit (MMIC) mixer is fabricated in a gallium arsenide (GaAs) metal semiconductor field effect transistor (MESFET) process and requires no external components or matching circuitry. The device can be used as an upconverter, downconverter, biphase demodulator, or phase comparator from 2.5 GHz to 7.0 GHz.

FUNCTIONAL BLOCK DIAGRAM

Figure 1.

The **HMC219B** provides excellent local oscillator (LO) to radio frequency (RF) isolation and LO to intermediate frequency (IF) isolation due to optimized balun structures. The RoHS compliant **HMC219B** eliminates the need for wire bonding and is compatible with high volume surface-mount manufacturing techniques. The consistent MMIC performance improves system operation and assures regulatory compliance with HiperLAN, U-NII, and ISM.

| Input Second-Order Intercept (IP2) | | 55 | | dBm |
| LO to RF Isolation | 34 | 40 | | dB |
| LO to IF Isolation | 29 | 35 | | dB |
| RF to IF Isolation | | 22 | | dB |
| Input 1 dB Compression Point (P1dB) | | 11 | | dBm |
| RF Return Loss | | 10 | | dB |
| LO Return Loss | | 25 | | dB |
| IF Return Loss | | 12 | | dB |

ABSOLUTE MAXIMUM RATINGS

Table 2.

| Parameter | Rating |
|--|---|
| RF Input Power | 25 dBm |
| LO Input Power | 27dBm |
| IF Input Power | 25 dBm |
| IF Source and Sink Current | 6 mA |
| Continuous Power Dissipation, P_{DISS} ($T_A = 85^\circ\text{C}$, Derate 10.81 mW/ $^\circ\text{C}$ Above 85°C) | 972 mW |
| Maximum Junction Temperature | 175°C |
| Maximum Peak Reflow Temperature (MSL1) ¹ | 260°C |
| Operating Temperature Range | -40°C to $+85^\circ\text{C}$ |
| Storage Temperature Range | -65°C to $+125^\circ\text{C}$ |
| Electrostatic Discharge (ESD) Sensitivity | |
| Human Body Model (HBM) | 1500 V (Class 1C) |
| Field Induced Charged Device Model (FICDM) | 750 V (Class C4) |

¹ See the Ordering Guide.

Stresses at or above those listed under Absolute Maximum Ratings may cause permanent damage to the product. This is a stress rating only; functional operation of the product at these or any other conditions above those indicated in the operational section of this specification is not implied. Operation beyond the maximum operating conditions for extended periods may affect product reliability.

THERMAL RESISTANCE

Thermal performance is directly linked to printed circuit board (PCB) design and operating environment. Careful attention to PCB thermal design is required.

Table 3. Thermal Resistance

| Package Type | θ_{JA} | θ_{JC} | Unit |
|--------------|---------------|---------------|---------------------------|
| RM-8 | 194.9 | 92.5 | $^\circ\text{C}/\text{W}$ |

¹ See JEDEC standard JESD51-2 for additional information on optimizing the thermal impedance (PCB with 3×3 vias).

ESD CAUTION

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

Figure 2. Pin Configuration

Table 4. Pin Function Descriptions

| Pin No. | Mnemonic | Description |
|------------|----------|--|
| 1, 3, 6, 8 | GND | Ground. Connect the package bottom to RF/dc ground. See Figure 3 for the GND interface schematic. |
| 2 | LO | Local Oscillator. This pin is dc-coupled and matched to 50 Ω. See Figure 4 for the LO interface schematic. |
| 4 | NIC | Not Internally Connected. Leave this pin floating. |
| 5 | IF | Intermediate Frequency. This pin is dc-coupled. For applications not requiring operation to dc, externally block this pin using a series capacitor with a value chosen to pass the necessary IF frequency range. For operation to dc, this pin must not source or sink more than 6 mA of current or device nonfunction and possible device failure results. See Figure 5 for the IF interface schematic. |
| 7 | RF | Radio Frequency. This pin is dc-coupled and matched to 50 Ω. See Figure 6 for the RF interface schematic. |

THEORY OF OPERATION

The [HMC219B](#) is a general-purpose, double balanced mixer in an 8-lead, MINI_SO_EP, RoHS-compliant package that can be used as an upconverter or a downconverter from 2.5 GHz to 7.0 GHz.

When used as a downconverter, the [HMC219B](#) downconverts RF between 2.5 GHz and 7.0 GHz to IF between dc and 3 GHz.

When used as an upconverter, the mixer upconverts IF between dc and 3 GHz to RF between 2.5 GHz and 7.0 GHz.

The mixer provides excellent LO to RF and LO to IF isolation due to optimized balun structures. The [HMC219B](#) requires no external components or matching circuitry. The RoHS compliant [HMC219B](#) eliminates the need for wire bonding and is compatible with high volume, surface-mount manufacturing techniques.

APPLICATIONS INFORMATION

TYPICAL APPLICATION CIRCUIT

Figure 83 shows the typical application circuit for the [HMC219B](#). The [HMC219B](#) is a passive device and does not require any external components. The LO and RF pins are internally dc-coupled. When IF operation is not required until dc, use an ac-coupled capacitor at the IF port. When IF operation to dc is required, do not exceed the IF source and sink the current rating specified in the Absolute Maximum Ratings section.

Figure 83. Typical Application Circuit

EVALUATION PCB INFORMATION

RF circuit design techniques must be implemented for the evaluation board PCB shown in Figure 84. Signal lines must have 50 Ω impedance, and the package ground leads and exposed pad must connect directly to the ground plane, similar to what is shown in Figure 84. Use a sufficient number of via holes to connect the top and bottom ground planes. The evaluation circuit board shown in Figure 84 is available from Analog Devices, Inc., upon request. Reference [EV1HMC219BMS8G](#) when ordering the evaluation PCB assembly. The bill of materials for the evaluation PCB is shown in Table 5.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
