

Amphenol Connex

Cable Assemblies

Cable Assemblies

Amphenol Connex offers a full line of pre-assembled, fixed-length cable assemblies. Fixed length assemblies are for use in a variety of commercial and industrial applications that require standard configurations or lengths. Cables are available with AMC, BNC, MMCX, MCX, SMA, SMB and other commercially available RF connector series. Connector styles include straight and right angle plugs, straight jacks, and bulkhead jacks in a variety of configurations. Cable types include miniature and standard flexible cables, and semi-rigid conformable (hand formable) cable. Additional options, not shown in this catalog, may be available. See the Amphenol Connex website for our latest offering.

Benefits of using fixed length assemblies:

- Lower cost than a custom solution
- Faster than a custom solution; many cables are available from distributor stock
- Guaranteed performance

Don't see a configuration that works for you? Amphenol Connex also offers custom cable assemblies using standard RF cable and Amphenol Connex connectors. Common uses for custom cable assemblies include; non-standard lengths, special labeling, testing, or packaging requirements. Please contact us for additional information.

HOW TO CREATE A PART NUMBER

FIXED LENGTH CABLE ASSEMBLIES: Build your Cable Assembly in 4 easy steps.

1 Select **series** from the list below:

Series	Code
BNC	115
TNC	125
SMA	135
SMB	145
N	175
MCX	255
MMCX	265
AMC	335

2 Select **connector configuration**

Style	Code
Straight Plug to Straight Plug	101
Straight Plug to Right Angle Plug	103
Right Angle Plug to Right Angle Plug	104
Straight Plug to Straight Jack	106
Right Angle Plug to Straight Jack	107
Straight Jack to Straight Jack	108
Straight Plug to Bulkhead Jack	110
Right Angle Plug to Bulkhead Jack	111
Straight Jack to Bulkhead Jack	112

3 Select **cable type**

Cable Type	Code
RG 316	01
RG 174	02
RG 316 Double Braid	03
RG 179	05
B8218	06
RG 142	07
RG 178	08
B1855A	09
LMR 400	10
RG 223	11
1.13mm	12
1.32mm	13
1.37mm	14
LMR 200	17
RG 179 DB	18
RG 58	19
RG 59	20
LMR 195	21
LMR 240	22
RG 400	25
B1694A	26
.085 Conformable	R1
.141 Conformable	R2
.250 Conformable	R3

4 Define **Cable Length** (Replace XX.XX with length), for example 06.00 = 6 inches. Standard Lengths are 6, 24, 36, and 48 inches, with some exceptions.

Part Number Example:

AMC BETWEEN SERIES CABLE ASSEMBLIES

Amphenol Connex AMC Between Series Cable Assemblies utilize Amphenol Microcoaxial style connectors on miniature cable types. Due to their small size, AMC assemblies are perfect for applications where space is limited. AMC cable assemblies have a 50 ohm impedance; with a frequency range of DC up to 6 GHz. These assemblies feature a snap on interface and assembly length is dimensioned in millimeters. Standard lengths are 50, 100, 150, 200, 250, and 300 millimeters, custom lengths may also be available. Heat shrink representation may vary.

AMC RIGHT ANGLE PLUG TO TNC BULKHEAD JACK CABLE ASSEMBLIES

Part Number	Cable Type	Connector 1	Connector 2	Impedance

MMCX SERIES CABLE ASSEMBLIES

Amphenol Connex MMCX Cable Assemblies are made with MMCX connectors on both ends. These MMCX assemblies offer a reliable broadband performance from DC to 6 GHz. These 50 Ohm assemblies incorporate the industry approved MMCX interface with a snap-on/quick disconnect interface. These assemblies are often used in high volume cellular, GPS, and wireless base station applications. The MMCX cable assemblies are dimensioned in inches with standard lengths of 6, 12, 18, 24, 36, and 48 inches, and custom lengths may also be available. Heat shrink representation may vary.

MCX CABLE ASSEMBLIES

Amphenol Connex MCX Cable Assemblies are made with MCX connectors on both ends. These MCX assemblies are ideal for applications in the cellular telephone, information systems and communications markets. These assemblies operate in a frequency range of up to 6 GHz and offer a push-on/pull-off mating interface. MCX assemblies are available in both 50 Ohm and 75 Ohm impedance. These cable assemblies are dimensioned in inches with standard lengths of 6, 12, 18, 24, 36, and 48 inches, and custom lengths may also be available. Heat shrink representation may vary.

SMA CABLE ASSEMBLIES

Amphenol Connex SMA Cable Assemblies are made with SMA connectors on both ends. SMA connectors are semi-precision, sub-miniature, high-frequency connectors that offer reliable broadband performance. Amphenol Connex offers SMA assemblies using both flexible and semi-rigid (hand conformable) cable types. SMA assemblies on Semi-Rigid cable are DC to 18 GHz and assemblies using flexible cable perform up to 12.4 GHz, (this varies by cable type), with both cable types offering low reflection and constant 50 Ohm impedance. SMA connectors feature a thread-on interface that offers high mechanical strength, high durability and low VSWR. These cable assemblies are dimensioned in inches with standard lengths of 6, 12, 18, 24, 36, and 48 inches, and custom lengths may also be available. Heat shrink representation may vary. Conformable/semi rigid assemblies have no heat shrink tubing.

SMB CABLE ASSEMBLIES

Amphenol Connex SMB Cable Assemblies offer SMB connectors on both ends. SMB assemblies perform from DC to 4 GHz and are available in both 50 Ohm and 75 Ohm impedance. SMB connectors offer a push-on interface for ease of use. All 75 Ohm SMB connectors used on these cable assemblies are the Mini 75 Ohm SMB type. SMB assemblies are offered in a variety of configurations and are dimensioned in inches with standard lengths of 6, 12, 18, 24, 36, and 48 inches. Custom lengths may also be available. Heat shrink representation may vary.

1.0/2.3 CABLE ASSEMBLIES

Amphenol Connex 1.0/2.3 Cable Assemblies were designed for use in instrumentation and 75 Ohm video applications. The 1.0/2.3 connectors feature an innovative push-pull locking mechanism. The slim coupling nut is ideal for high density applications. These cable assemblies are for applications up to 3 GHz+ and standard lengths are 6, 12, 18, 24, 36, and 48 inches; custom lengths may also be available. Heat shrink representation may vary.

BNC CABLE ASSEMBLIES

Amphenol Connex BNC Cable Assemblies have BNC connectors on both ends. The bayonet coupling style allows for quick connect and disconnect while still offering high reliability. Assemblies are offered for both 50 and 75 ohm impedance applications. The 50 ohm assemblies will function up to 4 GHz, and the 75 ohm assemblies will function up to 3 GHz. These cable assemblies are often used in broadcast applications with standard lengths from 6 inches all the way up to 100 feet. Heat shrink representation may vary.

TNC CABLE ASSEMBLIES

Amphenol Connex TNC Cable Assemblies utilize TNC connectors on both ends. TNC connectors are the same physical size as BNC connectors, but feature a threaded coupling mechanism. The 50 Ohm assemblies function up to 11 GHz while the 75 Ohm assemblies function up to 3 GHz. These assemblies are often used in commercial and military antenna applications. Standard lengths are 6, 12, 18, 24, 36, and 48 inches, and custom lengths may also be available. Heat shrink representation may vary.

N CABLE ASSEMBLIES

Amphenol Connex N Cable Assemblies feature N connectors on both ends. Amphenol Connex N connectors feature Nexcote® (White Bronze) plating to reduce unwanted passive intermodulation distortion. N connectors are medium sized connectors with a rugged threaded coupling mechanism, ideal for high performance telecommunications applications. Assemblies typically perform well up to 11 GHz (varies by cable) and offer 50 Ohm impedance. Standard lengths are 6, 12, 18, 24, 36, and 48 inches, and custom lengths may also be available. Heat shrink representation may vary.

Don't see a configuration that works for you? Amphenol Connex also offers custom cable assemblies using standard RF cable and Amphenol Connex connectors. Common uses for custom cable assemblies include; non-standard lengths, special labeling, testing, or packaging requirements. Please contact us for additional information.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
