

DS14C232 Low Power +5V Powered TIA/EIA-232 Dual Driver/Receiver

Check for Samples: [DS14C232](#)

FEATURES

- Pin Compatible with Industry Standard MAX232, LT1081, ICL232 and TSC232
- Single +5V Power Supply
- Low Power— I_{CC} 3.0 mA Maximum
- DS14C232C Meets TIA/EIA-232-E (RS-232) and CCITT V.28 Standards
- CMOS Technology
- Receiver Noise Filter
- Package Efficiency—2 Drivers and 2 Receivers
- Available in Plastic DIP, Narrow and Wide SOIC Packages
- TIA/EIA-232 Compatible Extended Temperature Range Option:
 - DS14C232T –40°C to +85°C
 - DS14C232E/J: –55°C to +125°C

DESCRIPTION

The DS14C232 is a low power dual driver/receiver featuring an onboard DC to DC converter, eliminating the need for $\pm 12V$ power supplies. The device only requires a +5V power supply. I_{CC} is specified at 3.0 mA maximum, making the device ideal for battery and power conscious applications. The drivers' slew rate is set internally and the receivers feature internal noise filtering, eliminating the need for external slew rate and filter capacitors. The device is designed to interface data terminal equipment (DTE) with data circuit-terminating equipment (DCE). The driver inputs and receiver outputs are TTL and CMOS compatible. DS14C232C driver outputs and receiver inputs meet TIA/EIA-232-E (RS-232) and CCITT V.28 standards.

Functional Diagram

Figure 2. Functional Block Diagram

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

Absolute Maximum Ratings⁽¹⁾⁽²⁾

Supply Voltage, V_{CC}	-0.3V to 6V
V^+ Pin	$(V_{CC} - 0.3)V$ to +14V
V^- Pin	+0.3V to -14V
Driver Input Voltage	-0.3V to $(V_{CC} + 0.3V)$
Driver Output Voltage	$(V^+ + 0.3V)$ to $(V^- - 0.3V)$
Receiver Input Voltage	$\pm 25V$
Receiver Output Voltage	-0.3V to $(V_{CC} + 0.3V)$
Junction Temperature	+150°C
Maximum Package Power Dissipation @ 25°C ⁽³⁾	
NFG Package	1698 mW
D Package	1156 mW
Short Circuit Duration, D_{OUT}	Continuous
Storage Temp. Range	-65°C to +150°C
Lead Temp. (Soldering, 4 sec.)	+260°C
ESD Rating	
(HBM, 1.5 k Ω , 100 pF)	≥ 2.5 kV

- (1) "Absolute Maximum Ratings" are those values beyond which the safety of the device cannot be guaranteed. They are not meant to imply that the devices should be operated at these limits. The tables of "Electrical Characteristics" specify conditions for device operation.
- (2) Specifications for the 883 version of this product are listed separately on the following pages.
- (3) Ratings apply to ambient temperature at +25°C. Above this temperature derate: NFG Package 15.6 mW/°C, and D Package 10.6 mW/°C.

Recommended Operating Conditions

	Min	Max	Units
Supply Voltage, V_{CC}	4.5	5.5	V
Operating Free Air Temp. (T_A)			
DS14C232C	0	+70	°C
DS14C232T	-40	+85	°C

Electrical Characteristics⁽¹⁾

Over recommended operating conditions, unless otherwise specified

Symbol	Parameter	Conditions	Min	Typ ⁽²⁾	Max	Units
DC TO DC CONVERTER CHARACTERISTICS						
V^+	Positive Power Supply	$R_L = 3$ k Ω , C_1 - $C_4 = 1.0$ μ F, $D_{IN} = 0.8V$		9.0		V
V^-	Negative Power Supply	$R_L = 3$ k Ω , C_1 - $C_4 = 1.0$ μ F, $D_{IN} = 2.0V$		-8.5		V
I_{CC}	Supply (V_{CC}) Current	No Load		1.0	3.0	mA
DRIVER CHARACTERISTICS						
V_{IH}	High Level Input Voltage		2		V_{CC}	V
V_{IL}	Low Level Input Voltage		GND		0.8	V
I_{IH}	High Level Input Current	$V_{IN} \geq 2.0V$	-10		+10	μ A
I_{IL}	Low Level Input Current	$V_{IN} \leq 0.8V$	-10		+10	μ A
V_{OH}	High Level Output Voltage	$R_L = 3$ k Ω	5.0	8.0		V
V_{OL}	Low Level Output Voltage	$R_L = 3$ k Ω		-7.0	-5.0	V

- (1) Current into device pins is defined as positive. Current out of device pins is defined as negative. All voltages are referenced to ground unless otherwise specified.
- (2) All typicals are given for $V_{CC} = 5.0V$.

Electrical Characteristics⁽¹⁾ (continued)

Over recommended operating conditions, unless otherwise specified

Symbol	Parameter	Conditions		Min	Typ ⁽²⁾	Max	Unit s
I _{OS+}	Output High Short Circuit Current	V _O = 0V, V _{IN} = 0.8V	See ⁽³⁾	-30	-15	-5.0	mA
I _{OS-}	Output Low Short Circuit Current	V _O = 0V, V _{IN} = 2V		5.0	11	30	mA
R _O	Output Resistance	-2V ≤ V _O ≤ +2V, V _{CC} = 0V = GND		300			Ω
RECEIVER CHARACTERISTICS							
V _{TH}	Input High Threshold Voltage	V _{CC} = 5.0V			1.9	2.4	V
		V _{CC} = 5.0V ±10%			1.9	2.6	V
V _{TL}	Input Low Threshold Voltage			0.8	1.5		V
V _{HY}	Hysteresis			0.2	0.4	1.0	V
R _{IN}	Input Resistance		-15V ≤ V _{IN} ≤ +15V	3.0	4.7	7.0	kΩ
I _{IN}	Input Current	V _{IN} = +15V		+2.14	+3.75	+5.0	mA
		V _{IN} = +3V		+0.43	+0.64	+1.0	mA
		V _{IN} = -3V		-1.0	-0.64	-0.43	mA
		V _{IN} = -15V		-5.0	-3.75	-2.14	mA
V _{OH}	High Level Output Voltage	V _{IN} = -3V, I _O = -3.2 mA		3.5	4.5		V
		V _{IN} = -3V, I _O = -20 μA		4.0	4.9		V
V _{OL}	Low Level Output Voltage	V _{IN} = +3V, I _O = +3.2 mA			0.15	0.4	V

(3) I_{OS+} and I_{OS-} values are for one output at a time. If more than one output is shorted simultaneously, the device power dissipation may be exceeded.

Switching Characteristics

Over recommended operating conditions, unless otherwise specified.

Symbol	Parameter	Conditions		Min	Typ	Max	Units
DRIVER CHARACTERISTICS							
t _{PLH}	Propagation Delay Low to High	R _L = 3 kΩ C _L = 50 pF	(Figure 5, Figure 6)		1.0	4.0	μs

PIN DESCRIPTIONS

V_{CC} (Pin 16)

Power supply pin for the device, +5V ($\pm 10\%$).

V₊ (Pin 2)

Positive supply for TIA/EIA-232-E drivers. Recommended external capacitor: C4-1.0 μ F (6.3V). Capacitor value should be larger than 1 μ F. This supply is not intended to be loaded externally.

V₋ (Pin 6)

Negative supply for TIA/EIA-232-E drivers. Recommended external capacitor: C3-1.0 μ F (16V). Capacitor value should be larger than 1 μ F. This supply is not intended to be loaded externally.

C1₊, C1₋ (Pins 1, 3)

External capacitor connection pins. Recommended capacitor: 1.0 μ F (6.3V). Capacitor value should be larger than 1 μ F.

C2₊, C2₋ (Pins 4, 5)

External capacitor connection pins. Recommended capacitor: 1.0 μ F (16V). Capacitor value should be greater than 1 μ F.

D_{IN1}, D_{IN2} (Pins 11, 10)

Driver input pins are TTL/CMOS compatible. Inputs of unused drivers may be left open, an internal active pull-up resistor (500 k Ω minimum, typically 5 M Ω) pulls input HIGH. Output will be LOW for open inputs.

D_{OUT1}, D_{OUT2} (Pins 14, 7)

Driver output pins conform to TIA/EIA-232-E levels.

R_{IN1}, R_{IN2} (Pins 13, 8)

Receiver input pins accept TIA/EIA-232-E input voltages (± 25 V). Receivers feature a noise filter and guaranteed hysteresis of 100 mV. Unused receiver input pins may be left open. Internal input resistor 4.7 k Ω pulls input low, providing a failsafe high output.

R_{OUT1}, R_{OUT2} (Pins 12, 9)

Receiver output pins are TTL/CMOS compatible. Receiver output HIGH voltage is specified for both CMOS and TTL load conditions.

GND (Pin 15)

Ground Pin.

The diagram shows the internal structure of the DC to DC Converter (U1). The chip is a square package with pins 1 through 16. Pin 15 is GND. Pin 16 is +5V. Pin 2 is V+. Pin 6 is V-. Pin 11 is Din1. Pin 14 is Dout1. Pin 10 is Din2. Pin 7 is Dout2. Pin 12 is Rout1. Pin 13 is Rin1. Pin 9 is Rout2. Pin 8 is Rin2. External components include: C1 (1.0 μ F, 6.3V) at pin 3; C2 (1.0 μ F, 16V) at pin 5; C3 (1.0 μ F, 16V) at pin 6; C4 (1.0 μ F, 6.3V) at pin 16. The internal structure shows a DC to DC Converter block, two comparators (D1, D2), and two buffers (R1, R2).

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSELETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

⁽⁴⁾ Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
