## 36Mb, PIPELINE 'NO WAIT' STATE BUS SRAM

### FEATURES

- 100 percent bus utilization
- No wait cycles between Read and Write
- Internal self-timed write cycle
- Individual Byte Write Control
- Single R/W (Read/Write) control pin
- Clock controlled, registered address, data and control
- Interleaved or linear burst sequence control using MODE input
- Three chip enables for simple depth expansion and address pipelining
- Power Down mode
- Common data inputs and data outputs
- $\overline{\text{CKE}}$  pin to enable clock and suspend operation
- JEDEC 100-pin TQFP package
- Power supply:  
NVP:  $V_{\text{DD}} 2.5\text{V} (\pm 5\%)$ ,  $V_{\text{DDQ}} 2.5\text{V} (\pm 5\%)$   
NLP:  $V_{\text{DD}} 3.3\text{V} (\pm 5\%)$ ,  $V_{\text{DDQ}} 3.3\text{V}/2.5\text{V} (\pm 5\%)$
- Industrial temperature available
- Lead-free available

### DESCRIPTION

The 36 Meg 'NLP/NVP' product family feature high-speed, low-power synchronous static RAMs designed to provide a burstable, high-performance, 'no wait' state, device for networking and communications applications. They are organized as 1M words by 36 bits and 2M words by 18 bits, fabricated with ISSI's advanced CMOS technology.

Incorporating a 'no wait' state feature, wait cycles are eliminated when the bus switches from read to write, or write to read. This device integrates a 2-bit burst counter, high-speed SRAM core, and high-drive capability outputs into a single monolithic circuit.

All synchronous inputs pass through registers are controlled by a positive-edge-triggered single clock input. Operations may be suspended and all synchronous inputs ignored when Clock Enable,  $\overline{\text{CKE}}$  is HIGH. In this state the internal device will hold their previous values.

All Read, Write and Deselect cycles are initiated by the ADV input. When the ADV is HIGH the internal burst counter is incremented. New external addresses can be loaded when ADV is LOW.

Write cycles are internally self-timed and are initiated by the rising edge of the clock inputs and when  $\overline{\text{WE}}$  is LOW. Separate byte enables allow individual bytes to be written.

A burst mode pin (MODE) defines the order of the burst sequence. When tied HIGH, the interleaved burst sequence is selected. When tied LOW, the linear burst sequence is selected.

### FAST ACCESS TIME

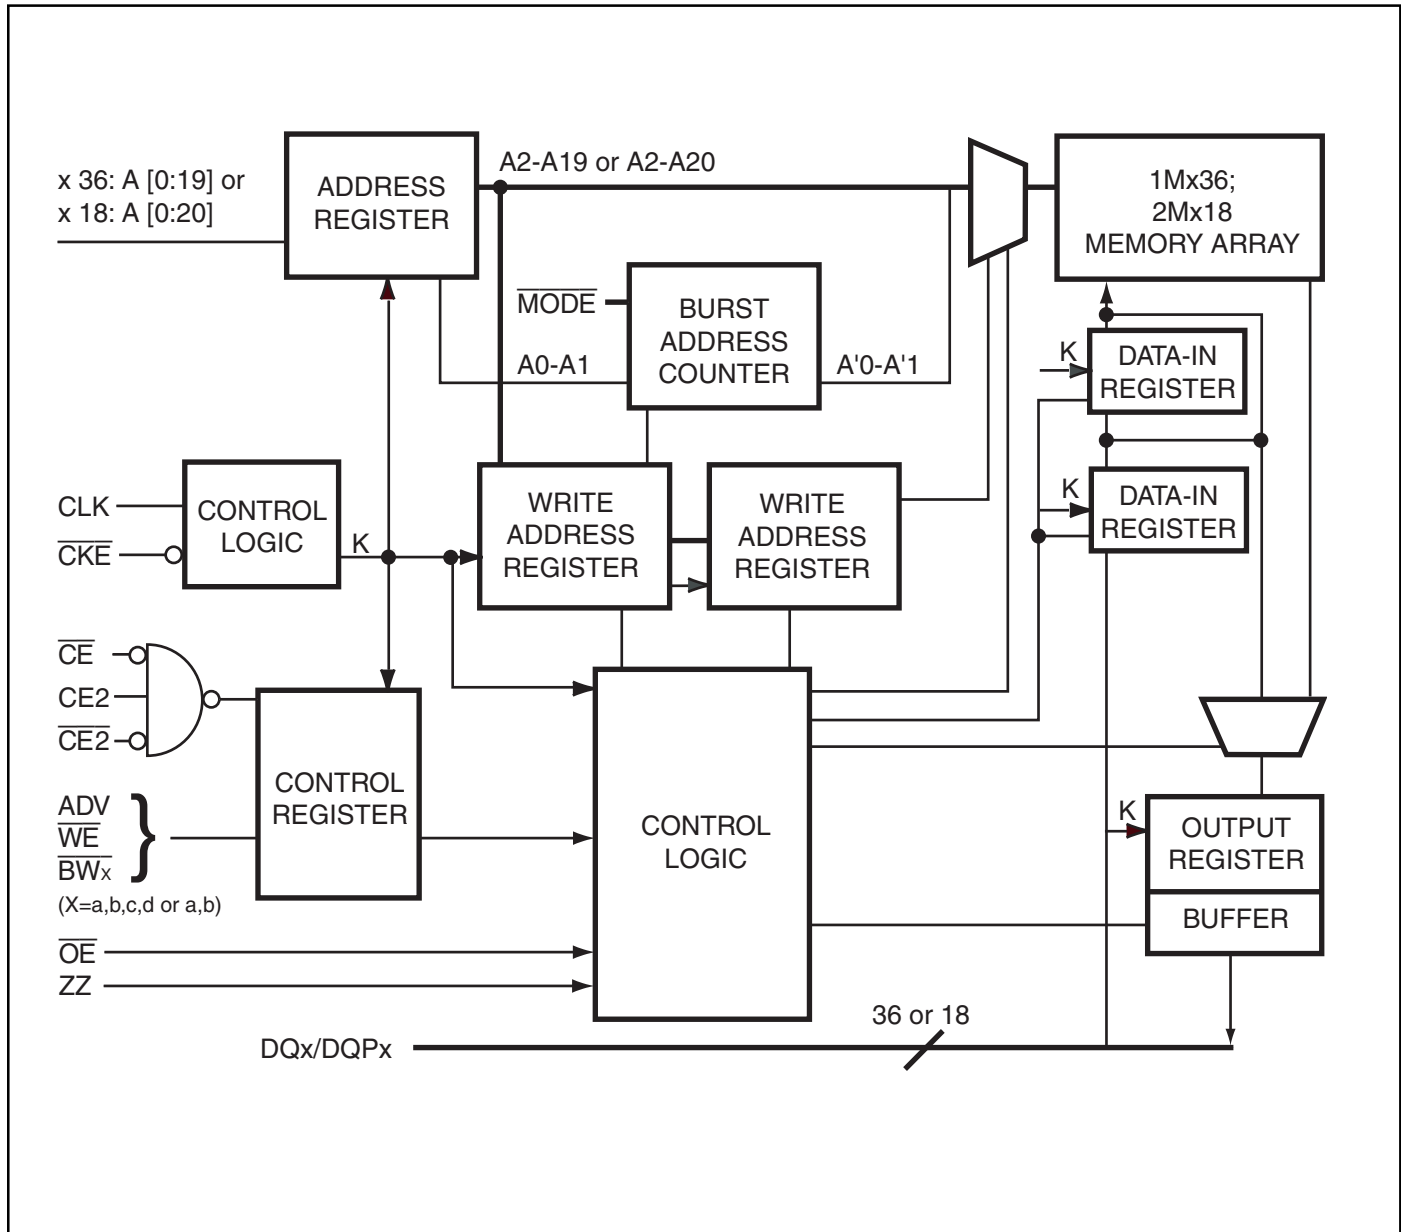

| Symbol          | Parameter         | -200 | -166 | Units |
|-----------------|-------------------|------|------|-------|
| $t_{\text{KQ}}$ | Clock Access Time | 3.1  | 3.5  | ns    |
| $t_{\text{Kc}}$ | Cycle Time        | 5    | 6    | ns    |
|                 | Frequency         | 200  | 166  | MHz   |

| Write Abort           | Next Address     | X               | X   | X                | H   | X               | H                 | X               | L                | ↑   |
| Ignore Clock          | Current Address  | X               | X   | X                | X   | X               | X                 | X               | H                | ↑   |

### Notes:

- "X" means don't care.
- The rising edge of clock is symbolized by ↑
- A continue deselect cycle can only be entered if a deselect cycle is executed first.
- $\overline{WE} = L$  means Write operation in Write Truth Table.  
 $\overline{WE} = H$  means Read operation in Write Truth Table.
- Operation finally depends on status of asynchronous pins ( $\overline{ZZ}$  and  $\overline{OE}$ ).

**ASYNCHRONOUS TRUTH TABLE<sup>(1)</sup>**

| Operation  | ZZ | $\overline{OE}$ | I/O STATUS  |
|------------|----|-----------------|-------------|
| Sleep Mode | H  | X               | High-Z      |
| Read       | L  | L               | DQ          |
|            | L  | H               | High-Z      |
| Write      | L  | X               | Din, High-Z |
| Deselected | L  | X               | High-Z      |

**Notes:**

1. X means "Don't Care".
2. For write cycles following read cycles, the output buffers must be disabled with  $\overline{OE}$ , otherwise data bus contention will occur.
3. Sleep Mode means power Sleep Mode where stand-by current does not depend on cycle time.
4. Deselected means power Sleep Mode where stand-by current depends on cycle time.

**WRITE TRUTH TABLE (x18)**

| Operation       | $\overline{WE}$ | $\overline{BWa}$ | $\overline{BWb}$ |
|-----------------|-----------------|------------------|------------------|
| READ            | H               | X                | X                |
| WRITE BYTE a    | L               | L                | H                |
| WRITE BYTE b    | L               | H                | L                |
| WRITE ALL BYTES | L               | L                | L                |
| WRITE ABORT/NOP | L               | H                | H                |

**Notes:**

1. X means "Don't Care".
2. All inputs in this table must be setup and hold time around the rising edge of CLK.

**WRITE TRUTH TABLE (x36)**

| Operation       | $\overline{WE}$ | $\overline{BWa}$ | $\overline{BWb}$ | $\overline{BWc}$ | $\overline{BWd}$ |
|-----------------|-----------------|------------------|------------------|------------------|------------------|
| READ            | H               | X                | X                | X                | X                |
| WRITE BYTE a    | L               | L                | H                | H                | H                |
| WRITE BYTE b    | L               | H                | L                | H                | H                |
| WRITE BYTE c    | L               | H                | H                | L                | H                |
| WRITE BYTE d    | L               | H                | H                | H                | L                |
| WRITE ALL BYTES | L               | L                | L                | L                | L                |
| WRITE ABORT/NOP | L               | H                | H                | H                | H                |

**Notes:**

1. X means "Don't Care".
2. All inputs in this table must be setup and hold time around the rising edge of CLK.

**INTERLEAVED BURST ADDRESS TABLE (MODE = V<sub>DD</sub> or NC)**

| External Address<br>A1 A0 | 1st Burst Address<br>A1 A0 | 2nd Burst Address<br>A1 A0 | 3rd Burst Address<br>A1 A0 |

**LINEAR BURST ADDRESS TABLE (MODE = V<sub>SS</sub>)**

**ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>**

| Symbol                             | Parameter  | Value                          | Unit |
|------------------------------------|--|--------------------------------|------|
| T <sub>STG</sub>                   | Storage Temperature  | -65 to +150                    | °C   |
| P <sub>D</sub>                     | Power Dissipation  | 1.6                            | W    |
| I <sub>OUT</sub>                   | Output Current (per I/O)   | 100                            | mA   |
| V <sub>IN</sub> , V <sub>OUT</sub> | Voltage Relative to V <sub>SS</sub> for I/O Pins                   | -0.5 to V <sub>DDQ</sub> + 0.3 | V    |
| V <sub>IN</sub>                    | Voltage Relative to V <sub>SS</sub> for Address and Control Inputs | -0.3 to 4.6                    | V    |

**Notes:**

1. Stress greater than those listed under ABSOLUTE MAXIMUM RATINGS may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.
2. This device contains circuitry to protect the inputs against damage due to high static voltages or electric fields; however, precautions may be taken to avoid application of any voltage higher than maximum rated voltages to this high-impedance circuit.
3. This device contains circuitry that will ensure the output devices are in High-Z at power up.

**OPERATING RANGE (IS61NLPx)**

| Range      | Ambient Temperature | V <sub>DD</sub> | V <sub>DDQ</sub> |
|------------|---------------------|-----------------|------------------|
| Commercial | 0°C to +70°C        | 3.3V ± 5%       | 3.3V / 2.5V ± 5% |
| Industrial | -40°C to +85°C      | 3.3V ± 5%       | 3.3V / 2.5V ± 5% |

**OPERATING RANGE (IS61NVPx)**

| Range      | Ambient Temperature | V <sub>DD</sub> | V <sub>DDQ</sub> |
|------------|---------------------|-----------------|------------------|

**Note:**

- MODE pin has an internal pullup and should be tied to V<sub>DD</sub> or V<sub>SS</sub>. It exhibits ±100μA maximum leakage current when tied to ≤ V<sub>SS</sub> + 0.2V or ≥ V<sub>DD</sub> - 0.2V.
- Typical values are measured at V<sub>CC</sub> = 3.3V, T<sub>A</sub> = 25°C and not 100% tested.

## CAPACITANCE<sup>(1,2)</sup>

| Symbol           | Parameter                | Conditions            | Max. | Unit |
|------------------|--------------------------|-----------------------|------|------|
| C <sub>IN</sub>  | Input Capacitance        | V <sub>IN</sub> = 0V  | 6    | pF   |
| C <sub>OUT</sub> | Input/Output Capacitance | V <sub>OUT</sub> = 0V | 8    | pF   |

**Notes:**

1. Tested initially and after any design or process changes that may affect these parameters.
2. Test conditions: T<sub>A</sub> = 25°C, f = 1 MHz, V<sub>DD</sub> = 3.3V.

## 3.3V I/O AC TEST CONDITIONS

| Parameter                                   | Unit                |
|---|---------------------|
| Input Pulse Level                           | 0V to 3.0V          |
| Input Rise and Fall Times                   | 1.5 ns              |
| Input and Output Timing and Reference Level | 1.5V                |
| Output Load                                 | See Figures 1 and 2 |

| t <sub>PDS</sub>                   | ZZ High to Power Down           | —    | 2    | —    | 2    | cyc  |
| t <sub>PUS</sub>                   | ZZ Low to Power Down            | —    | 2    | —    | 2    | cyc  |

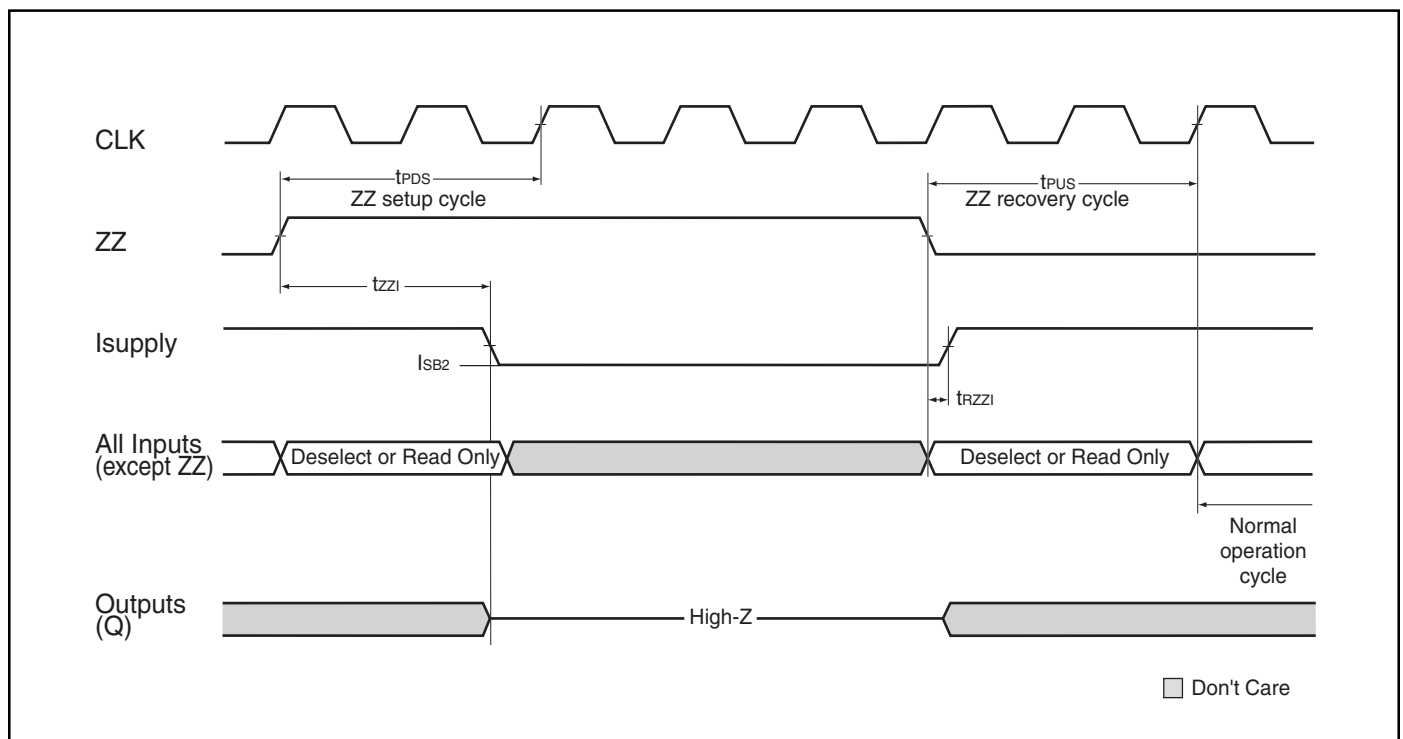

**Notes:**

1. Configuration signal MODE is static and must not change during normal operation.
2. Guaranteed but not 100% tested. This parameter is periodically sampled.
3. Tested with load in Figure 2.

### SLEEP MODE ELECTRICAL CHARACTERISTICS

| Symbol           | Parameter                         | Conditions           | Min. | Max. | Unit  |
|------------------|-----------------------------------|----------------------|------|------|-------|
| I <sub>SB2</sub> | Current during SLEEP MODE         | ZZ ≥ V <sub>IH</sub> |      | 75   | mA    |
| t <sub>PDS</sub> | ZZ active to input ignored        |                      | 2    |      | cycle |
| t <sub>PUS</sub> | ZZ inactive to input sampled      |                      | 2    |      | cycle |
| t <sub>ZZI</sub> | ZZ active to SLEEP current        |                      | 2    |      | cycle |
| t <sub>ZZI</sub> | ZZ inactive to exit SLEEP current |                      | 0    |      | ns    |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
