**Power Factor Characteristic**

**EFFICIENCY vs LOAD (500mA Model)**

ELG-150-C series possess superior working efficiency that up to 92% can be reached in field applications.

**DRIVING METHODS OF LED MODULE**

This LED power supply is suggested to work in constant current mode area (CC) to drive the LEDs.

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.  
Should there be any compatibility issues, please contact MEAN WELL.
