Notes

(1) Tolerancing and voltage designation (V_Z). The type numbers shown have a standard tolerance of ± 5 % on the nominal zener voltage.

(2) Maximum zener current ratings (I_{ZM}). Maximum zener current ratings are based on maximum zener voltage of the individual units

(3) Reverse leakage current (I_R). Reverse leakage currents are guaranteed and measured at V_R as shown on the table.

(4) Maximum voltage change (ΔV_Z). Voltage change is equal to the difference between V_Z at 100 µA and V_Z at 10 µA.
