

# NC258 SAC305

## Lead-Free No Clean Solder Paste

### Features:

- Long Pause-to-Print Capabilities
- Enhances Fine Print Definitions
- No Head-in-Pillow
- Excellent Wetting, Even Leadless Devices
- Reduced Voiding
- RoHS Compliant

### Description:

NC258 has been developed to offer long pause-to-print capabilities while enhancing fine print definitions. NC258 reduces such defects as voiding and eliminates head-in-pillow. The superior wetting ability of NC258 results in bright, smooth and shiny solder joints. It also offers very low post process residues, which remain crystal clear even at the elevated temperatures required for today's lead-free alloys.

### Printing:

- Apply sufficient paste to the stencil to allow a smooth, even roll during the print cycle (a bead diameter of 12 to 16 mm (½ to ⅝ inch) is normally sufficient to begin).
- Apply small amounts of fresh solder paste to the stencil at controlled intervals to maintain paste chemistry and workable properties.
- NC258 provides the necessary tack time and force for today's high speed placement equipment, which will enhance product performance and reliability.
- Cleaning of your stencil will vary by application; however, it can be accomplished using AIM DJAW-10 stencil cleaner.

| RECOMMENDED INITIAL PRINTER SETTINGS BELOW ARE DEPENDENT ON PCB AND PAD DESIGN |                              |                         |                              |
|--|------------------------------|-------------------------|------------------------------|
| PARAMETER  | RECOMMENDED INITIAL SETTINGS | PARAMETER               | RECOMMENDED INITIAL SETTINGS |
| Squeegee Pressure  | 0.9 - 1.5 lbs/inch of blade  | PCB Separation Distance | 0.75 - 2.0 mm (.030 - .080") |
| Squeegee Speed   | 0.5 - 6 inches/second        | PCB Separation Speed    | 3.0 - 20.00 mm/second        |
| Snap-off Distance  | On Contact 0.00 mm (0.00")   |                         |                              |

### Reflow Profile:

Two unique profile families are depicted below; both can be used in ramp-spike or ramp-soak-spike applications, and they each have similar reflow temperatures. The two profiles differ in where they reach their respective peak temperatures, as well as the time above liquidus (TAL). The shorter profile of the two would apply to smaller assemblies, whereas the longer profile would apply to larger assemblies, such as backplanes or high-density boards. The shaded area defines the process window. Oven efficiency, board size/mass, component type and density all influence the final profile for a given assembly. These profiles are starting points, and processing boards with thermal-couples attached is recommended to optimize the process.

SAC305 Reflow Profile Window For Low Density Boards

SAC305 Reflow Profile Window For High Density Boards

❖ THE RECOMMENDED REFLOW PROFILE FOR NC258 IS PROVIDED AS A GUIDELINE. OPTIMAL PROFILE MAY DIFFER DUE TO OVEN TYPE, ASSEMBLY LAYOUT, OR OTHER PROCESS VARIABLES. CONTACT AIM TECHNICAL SUPPORT IF YOU REQUIRE ADDITIONAL PROFILING ASSISTANCE.

### Compatible Products:

- AIM Lead-Free Electropure Solder Bar
- NC Paste Flux, No-Clean Tacky Flux
- NC270WR VOC-Free No-Clean Spray Flux
- NC264-5 No-Clean Flux Spray/Foam
- Glowcore No-Clean Cored Wire
- One-Step Underfill FF35
- Epoxy 4044 Chip Bonding Epoxy
- 200AX Stencil Cleaner

### Cleaning:

- NC258 can be cleaned if necessary with saponified water or an appropriate solvent cleaner.
- Please refer to the AIM cleaner matrix for a list of compatible cleaning materials.

### Handling and Storage:

- NC258 is best used within 1 year when stored between -22° and +22° C (-8° and 72° F).
- Allow the solder paste to warm up completely and naturally to ambient temperature (8 hrs.) prior to breaking the seal for use.
- Mix the product lightly and thoroughly (1-2 mins. max) to ensure even distribution of any separated material.
- Do not store new and used paste in the same container, and reseal any opened containers while not in use.
- Replace the internal plug and cap of the 500 gram jars to ensure the best possible seal.

### Physical Properties:

| <i>ITEM</i>   | <i>SPECIFICATION</i>                          |
|---------------|---|
| Appearance    | Gray, Smooth, Creamy                          |
| Alloy         | SAC305  |
| Melting Point | 217° -218° C                                  |
| Particle Size | T3 , T4, T5                                   |
| Metal Loading | 89% (T3), 88.5% (T4, T5)                      |
| Viscosity     | Print/dispense versions available.            |
| Packaging     | Available in all industry standard packaging. |

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
