### Description

The B126-1P0-WP-1 HDMI over Cat5/Cat6 Passive Remote Receiver works with Tripp Lite's [B126-002](#) or [B126-004](#) transmitter to extend an HDMI signal to a projector, monitor or television. It's ideal for digital signs, trade shows, presentations, classrooms, churches, retail settings and other applications where the video source is located farther than conventional cables allow.

The receiver uses HDMI cable (see Tripp Lite's P568-Series) to connect to the monitor and a single Cat5e/6 cable to receive the signal from the transmitter (for best results, use 24 AWG solid-wire Cat5e/6 cable, such as Tripp Lite's N202-Series). No 110 punchdown connection is required.

The B126-1P0-WP-1 can extend a 1080i (60 Hz) signal up to 100 feet (30.5 m) or a 1080p (60 Hz) signal up to 50 feet (15.2 m) with a single Cat5e/6 cable between it and the transmitter. No external power is needed.

In addition to crystal-clear video, the B126-1P0-WP-1 delivers full, rich stereo and 7.1-channel surround sound (multi-channel or PCM) audio when paired with a [B126-002](#) or [B126-004](#) transmitter unit. Supports 24-bit True Color (8 bits per channel) and HDCP compatibility. Easy to set up with no software or drivers to install. Works with all operating systems and HDMI video sources.
