

### FEATURES

- RoHS compliant
- Efficiency up to 78%
- Wide temperature performance at full 1 Watt load, -40°C to 85°C
- UL 94V-0 Package material
- Footprint over pins 1.64cm<sup>2</sup>
- Lead frame technology
- 3.3V, 5V & 12V Input
- 3.3V, 5V, 9V, 12V & 15V Output
- Internal SMD construction
- Toroidal magnetics
- 1kVDC Isolation
- MTTF up to 2.1 Million hours
- Power density 1.36W/cm<sup>3</sup>
- No heatsink required
- Custom solutions available
- Multi-layer ceramic capacitors

### PRODUCT OVERVIEW

The NTA series of miniature surface mounted DC/DC Converters employ leadframe technology and transfer moulding techniques to bring all of the benefits of IC style packaging to hybrid circuitry. Co-planarity of the lead positions is based upon IEC 191-6:1990. The devices are suitable for all applications where high volume production is envisaged.

### SELECTION GUIDE

| Order Code <sup>1</sup> | Nominal Input Voltage | Output Voltage | Output Current | Input Current at Rated Load | Efficiency | Isolation Capacitance | MTTF <sup>2</sup> |
|-------------------------|-----------------------|----------------|----------------|-----------------------------|------------|-----------------------|-------------------|
|                         | V                     | V              | mA             | mA                          | %          | pF                    | kHrs              |
| NTA0303MC               | 3.3                   | ±3.3           | ±152           | 402                         | 75         | 29                    | 1005              |
| NTA0305MC               | 3.3                   | ±5             | ±100           | 388                         | 78         | 30                    | 399               |
| NTA0309MC               | 3.3                   | ±9             | ±55            | 405                         | 75         | 34                    | 827               |
| NTA0312MC               | 3.3                   | ±12            | ±42            | 390                         | 77         | 40                    | 375               |
| NTA0315MC               | 3.3                   | ±15            | ±33            | 392                         | 77         | 42                    | 206               |
| NTA0503MC               | 5                     | ±3.3           | ±152           | 259                         | 77         | 31                    | 964               |
| NTA0505MC               | 5                     | ±5             | ±100           | 290                         | 69         | 33                    | 1697              |
| NTA0505MEC              | 5                     | ±5             | ±100           | 251                         | 80         | 42                    | 367               |
| NTA0509MC               | 5                     | ±9             | ±55            | 267                         | 75         | 38                    | 682               |
| NTA0512MC               | 5                     | ±12            | ±42            | 260                         | 77         | 44                    | 343               |
| NTA0515MC               | 5                     | ±15            | ±33            | 256                         | 78         | 43                    | 188               |
| NTA1205MC               | 12                    | ±5             | ±100           | 121                         | 69         | 50                    | 559               |
| NTA1209MC               | 12                    | ±9             | ±55            | 113                         | 74         | 72                    | 375               |
| NTA1212MC               | 12                    | ±12            | ±42            | 111                         | 75         | 89                    | 243               |
| NTA1215MC               | 12                    | ±15            | ±33            | 110                         | 76         | 100                   | 154               |

### INPUT CHARACTERISTICS

| Parameter                | Conditions                            | Min. | Typ. | Max. | Units  |
|--------------------------|---------------------------------------|------|------|------|--------|
| Voltage range            | Continuous operation, 3V input types  | 2.97 | 3.3  | 3.63 | V      |
|                          | Continuous operation, 5V input types  | 4.5  | 5    | 5.5  |        |
|                          | Continuous operation, 12V input types | 10.8 | 12   | 13.2 |        |
| Reflected ripple current |                                       |      | 41   | 50   | mA p-p |

### ISOLATION CHARACTERISTICS

| Parameter         | Conditions                | Min. | Typ. | Max. | Units |
|-------------------|---------------------------|------|------|------|-------|
| Isolation voltage | Flash tested for 1 second | 1000 |      |      | VDC   |
| Resistance        | Viso= 1000VDC             | 10   |      |      | GΩ    |

### GENERAL CHARACTERISTICS

| Parameter           | Conditions                      | Min. | Typ. | Max. | Units |
|---------------------|---------------------------------|------|------|------|-------|
| Switching frequency | 0312MC, 0315MC                  |      | 100  |      | kHz   |
|                     | 0303MC, 0305MC, 0503MC, 0505MEC |      | 110  |      |       |
|                     | All other variants              |      | 115  |      |       |

### ABSOLUTE MAXIMUM RATINGS

|   |       |
|---|-------|
| Lead temperature 1.5mm from case for 10 seconds | 300°C |
| Internal power dissipation                      | 700mW |
| Input voltage V <sub>IN</sub> , NTA03 types     | 5.5V  |
| Input voltage V <sub>IN</sub> , NTA05 types     | 7V    |
| Input voltage V <sub>IN</sub> , NTA12 types     | 15V   |

1. If components are required in tape and reel format suffix order code code with -R, e.g. NTA0505MC-R.

2. Calculated using MIL-HDBK-217F with nominal input voltage at full load.

All specifications typical at T<sub>a</sub>=25°C, nominal input voltage and rated output current unless otherwise specified.

| OUTPUT CHARACTERISTICS       |   |      |      |      |        |
|------------------------------|---|------|------|------|--------|
| Parameter                    | Conditions  | Min. | Typ. | Max. | Units  |
| Rated Power                  | T <sub>A</sub> =-40°C to 85°C                             |      |      | 1.0  | W      |
| Voltage Set Point Accuracy   | See tolerance envelope                                    |      |      |      |        |
| Line regulation              | High V <sub>IN</sub> to low V <sub>IN</sub>               |      | 1.0  | 1.2  | %/%    |
| Load Regulation <sup>1</sup> | 10% load to rated load, 0303MC & 0503MC                   |      | 10   | 15   | %      |
|                              | 10% load to rated load, 5V output types                   |      | 10   | 12   |        |
|                              | 10% load to rated load, 0309MC                            |      | 9.0  | 10   |        |
|                              | 10% load to rated load, 0509MC & 1209MC                   |      | 6.5  | 8.0  |        |
|                              | 10% load to rated load, 0312MC & 0315MC                   |      | 11   | 14   |        |
|                              | 10% load to rated load, 0512MC & 1212MC                   |      | 6.0  | 8.5  |        |
|                              | 10% load to rated load, 0515MC & 1215MC                   |      | 6.0  | 7.0  |        |
| Ripple and Noise             | BW=DC to 20MHz, 3.3V output types, NTA0305MC & NTA0505MEC |      | 40   | 80   | mV p-p |
|                              | BW=DC to 20MHz, all other 5V output types                 |      | 50   | 100  |        |
|                              | BW=DC to 20MHz, 9V output types                           |      | 35   | 80   |        |
|                              | BW=DC to 20MHz, 12V output types                          |      | 50   | 110  |        |
|                              | BW=DC to 20MHz, 15V output types                          |      | 65   | 110  |        |

| TEMPERATURE CHARACTERISTICS         |                                 |      |      |      |       |

**TECHNICAL NOTES**

**ISOLATION VOLTAGE**

'Hi Pot Test', 'Flash Tested', 'Withstand Voltage', 'Proof Voltage', 'Dielectric Withstand Voltage' & 'Isolation Test Voltage' are all terms that relate to the same thing, a test voltage, applied for a specified time, across a component designed to provide electrical isolation, to verify the integrity of that isolation.

Murata Power Solutions NTA series of DC/DC converters are all 100% production tested at their stated isolation voltage. This is 1kVDC for 1 second.

A question commonly asked is, "What is the continuous voltage that can be applied across the part in normal operation?"

For a part holding no specific agency approvals, such as the NTA series, both input and output should normally be maintained within SELV limits i.e. less than 42.4V peak, or 60VDC. The isolation test voltage represents a measure of immunity to transient voltages and the part should never be used as an element of a safety isolation system. The part could be expected to function correctly with several hundred volts offset applied continuously across the isolation barrier; but then the circuitry on both sides of the barrier must be regarded as operating at an unsafe voltage and further isolation/insulation systems must form a barrier between these circuits and any user-accessible circuitry according to safety standard requirements.

**REPEATED HIGH-VOLTAGE ISOLATION TESTING**

It is well known that repeated high-voltage isolation testing of a barrier component can actually degrade isolation capability, to a lesser or greater degree depending on materials, construction and environment. The NTA series has toroidal isolation transformers, with no additional insulation between primary and secondary windings of enameled wire. While parts can be expected to withstand several times the stated test voltage, the isolation capability does depend on the wire insulation. Any material, including this enamel (typically polyurethane) is susceptible to eventual chemical degradation when subject to very high applied voltages thus implying that the number of tests should be strictly limited. We therefore strongly advise against repeated high voltage isolation testing, but if it is absolutely required, that the voltage be reduced by 20% from specified test voltage.

This consideration equally applies to agency recognized parts rated for better than functional isolation where the wire enamel insulation is always supplemented by a further insulation system of physical spacing or barriers.

**TEMPERATURE DERATING GRAPH**

1. 12V input types have typically 3% less load regulation change.

**RoHS COMPLIANCE, MSL AND PSL INFORMATION**

This series is compatible with RoHS soldering systems and is also backward compatible with Sn/Pb soldering systems. The NTA series has a process, moisture, and reflow sensitivity classification of MSL1 PSL R7F as defined in J-STD-020 and J-STD-075. This translates to: MSL1 = unlimited floor life, PSL R7F = Peak reflow temperature 245°C with a limitation on the time above liquidus (217°C) which for this series is 60sec max. The pin termination finish on this product series is Gold with a plating thickness of 0.05 microns minimum.

**APPLICATION NOTES**

**Minimum load**

The minimum load to meet datasheet specification is 10% of the full rated load across the specified input voltage range. Lower than 10% minimum loading will result in an increase in output voltage, which may rise to typically double the specified output voltage if the output load falls to less than 5%.

**Capacitive loading and start up**

Typical start up times for this series, with a typical input voltage rise time of 2.2µs and output capacitance of 10µF, are shown in the table below. The product series will start into a capacitance of 47µF with an increased start time, however, the maximum recommended output capacitance is 10µF.

|            | Start-up time<br>µs |           | Start-up time<br>µs |
|------------|---------------------|-----------|---------------------|
| NTA0303MC  | 1630                | NTA0509MC | 6850                |
| NTA0305MC  | 1359                | NTA0512MC | 11560               |
| NTA0309MC  | 3435                | NTA0515MC | 15640               |
| NTA0312MC  | 6590                | NTA1205MC | 1154                |
| NTA0315MC  | 25340               | NTA1209MC | 4050                |
| NTA0503MC  | 1599                | NTA1212MC | 7995                |
| NTA0505MC  | 2185                | NTA1215MC | 11200               |
| NTA0505MEC | 1395                |           |                     |

Typical Start-Up Wave Form

**Ripple & Noise Characterisation Method**

Ripple and noise measurements are performed with the following test configuration.

|       |  |
|-------|--|
| C1    | 1µF X7R multilayer ceramic capacitor, voltage rating to be a minimum of 3 times the output voltage of the DC/DC converter                                |
| C2    | 10µF tantalum capacitor, voltage rating to be a minimum of 1.5 times the output voltage of the DC/DC converter with an ESR of less than 100mΩ at 100 kHz |
| C3    | 100nF multilayer ceramic capacitor, general purpose  |
| R1    | 450Ω resistor, carbon film, ±1% tolerance  |
| R2    | 50Ω BNC termination  |
| T1    | 3T of the coax cable through a ferrite toroid  |
| RLOAD | Resistive load to the maximum power rating of the DC/DC converter. Connections should be made via twisted wires  |

Measured values are multiplied by 10 to obtain the specified values.

**Differential Mode Noise Test Schematic**

**APPLICATION NOTES (continued)**

**Output Ripple Reduction**

By using the values of inductance and capacitance stated, the output ripple at the rated load is lowered to 5mV p-p max.

**Component selection**

**Capacitor:** It is required that the ESR (Equivalent Series Resistance) should be as low as possible, ceramic types are recommended. The voltage rating should be at least twice (except for 15V output), the rated output voltage of the DC/DC converter.

**Inductor:** The rated current of the inductor should not be less than that of the output of the DC/DC converter. At the rated current, the DC resistance of the inductor should be such that the voltage drop across the inductor is <2% of the rated voltage of the DC/DC converter. The SRF (Self Resonant Frequency) should be >20MHz.

|            | Inductor   |        |              | Capacitor  |
|------------|------------|--------|--------------|------------|
|            | L, $\mu$ H | SMD    | Through Hole | C, $\mu$ F |

**TOLERANCE ENVELOPES**

Tolerance Envelope - 3.3V output types.

All other types.

The voltage tolerance envelope shows typical load regulation characteristics for this product series. The tolerance envelope is the maximum output voltage variation due to changes in output loading.

**PACKAGE SPECIFICATIONS**

**MECHANICAL DIMENSIONS**

**PIN CONNECTIONS**

| Pin | Function          |
|-----|-------------------|
| 1   | -V <sub>IN</sub>  |
| 3   | +V <sub>IN</sub>  |
| 5   | NA                |
| 7   | OV                |
| 9   | -V <sub>OUT</sub> |
| 10  | NA                |
| 12  | +V <sub>OUT</sub> |
| 14  | NA                |
| 16  | NA                |
| 18  | NA                |

NA - Not available for electrical connection.

All dimensions in mm ±0.25mm (inches ±0.01). All pins on a 2.54 (0.1) pitch.

Weight: 1.53g

**RECOMMENDED FOOTPRINT DETAILS**

**TUBE OUTLINE DIMENSIONS**

Unless otherwise stated all dimensions in mm±0.5 (inches ±0.02).  
Tube length : 475±2.0 (18.70±0.07).

Tube Quantity : 25

**TAPE & REEL SPECIFICATIONS**

**REEL OUTLINE DIMENSIONS**

**TAPE OUTLINE DIMENSIONS**

**REEL PACKAGING DETAILS**

**Product Orientation**  
Pin 1, located nearest to carrier drive sprocket.

Reel Quantity : 500

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
