

GENERAL DESCRIPTION

The SP330 is an advanced multiprotocol transceiver supporting RS-232, RS-485, and RS-422 serial standards and featuring a variable low voltage logic interface, down to 1.65V. Full operation requires only four external charge pump capacitors.

The RS-485/RS-232 mode pin selects RS-485 mode when high, and RS-232 mode when low. In RS-485 mode the HALF/FULL pin configures the transceiver as either half or full duplex.

The high speed drivers operate up to 20Mbps in RS-485/422 modes, and up to 1Mbps in RS-232 mode. All drivers can be slew limited to 250kbps in any mode to minimize electromagnetic interference (EMI) by setting the dedicated SLEW pin low.

All transmitter outputs and receiver inputs feature robust electrostatic discharge (ESD) protection to $\pm 15\text{kV}$ IEC 61000-4-2 Airgap, $\pm 15\text{kV}$ Human Body Model (HBM) and $\pm 8\text{kV}$ IEC 61000-4-2 Contact. Each receiver output has full fail-safe protection to avoid system lockup, oscillation, or indeterminate states by defaulting to logic-high output level when the inputs are open, shorted, or terminated but undriven. No external biasing resistors are required.

The RS-232 receiver inputs include a $5\text{k}\Omega$ pull-down to ground when in RS-232 mode. The RS-485/422 receiver inputs are high impedance ($>96\text{k}\Omega$), allowing up to 256 devices on a single communication bus (1/8th unit load).

The SP330 operates from a single power supply, either 3.3V or 5V, with low idle current. The shutdown mode consumes less than $1\mu\text{A}$ in low power standby operation with RS-232 receivers enabled.

FEATURES

- Robust ESD Protection:
 - $\pm 15\text{kV}$ IEC 61000-4-2 Air Gap Discharge
 - $\pm 8\text{kV}$ IEC 61000-4-2 Contact Discharge
 - $\pm 15\text{kV}$ Human Body Model (HBM)
- **20Mbps RS-485** and 1Mbps RS-232 Data Rates
- Pin-Selectable 250kbps Slew Limiting
- **Single Supply Operation from +3V to +5.5V**
- **1.65V to 5.5V Logic Interface V_L pin**
- 2 Drivers, 2 Receivers RS-232/V.28
- 1 Driver, 1 Receiver RS-485/422
 - Full or Half Duplex Configuration
 - 1/8th Unit Load, up to 256 receivers on bus
- RS-485/422 Enhanced Receiver Fail-safe for open, shorted, or terminated but idle inputs
- **10nA Shutdown Supply Current** (typical)
- **Small 24 TSSOP package**

TYPICAL APPLICATIONS

- Software Programmable Serial Ports (RS-232, RS-422, RS-485)
- Industrial and Single Board Computers
- Industrial and Process Control Equipment
- Point-Of-Sale Equipment
- HVAC Controls and Networking Equipment
- Building Security and Automation

ORDERING INFORMATION⁽¹⁾

| PART NUMBER | OPERATING TEMPERATURE RANGE | LEAD-FREE | PACKAGE | PACKAGING METHOD |
|----------------|-----------------------------|--------------------|--------------|------------------|
| SP330EEY-L | -40°C to +85°C | Yes ⁽²⁾ | 24-pin TSSOP | Tube |
| SP330EEY-L/TR | | | | Tape and Reel |
| SP330EEY-0A-EB | SP330E Evaluation Board | | | |

NOTES:

1. Refer to www.exar.com/SP330E for most up-to-date Ordering Information.
2. Visit www.exar.com for additional information on Environmental Rating.

ABSOLUTE MAXIMUM RATINGS

These are stress ratings only and functional operation of the device at these ratings or any other above those indicated in the operation sections to the specifications below is not implied. Exposure to absolute maximum rating conditions for extended periods of time may affect reliability and cause permanent damage to the device.

| | |
|--|-------------------|
| Supply Voltage V_{CC} | -0.3V to +6.0V |
| Logic Interface Voltage V_L | $V_L \leq V_{CC}$ |
| Voltage at TTL Input Pins | -0.3V to +6.0V |
| Receiver Input Voltage (from Ground) | $\pm 18V$ |
| Driver Output Voltage (from Ground) | $\pm 18V$ |
| Short Circuit Duration, TX out to Ground | Continuous |
| Storage Temperature Range | -65°C to +150°C |
| Lead Temperature (soldering, 10s) | +300°C |
| Power Dissipation 24-pin TSSOP (derate 26.0mW/°C above +70°C) | 900mW |

CAUTION:

ESD (ElectroStatic Discharge) sensitive device. Permanent damage may occur on unconnected devices subject to high energy electrostatic fields. Unused devices must be stored in conductive foam or shunts. Personnel should be properly grounded prior to handling this device. The protective foam should be discharged to the destination socket before devices are removed.

ESD RATINGS

PRODUCT SUMMARY

The SP330 is an advanced multiprotocol transceiver supporting RS-232, RS-485, and RS-422 serial standards. The multiple configuration modes allow all three protocols to be used interchangeably over a single cable or connector with no additional switching components. Full operation requires only four external charge pump capacitors.

ENHANCED FAILSAFE

The enhanced failsafe feature of the SP330 guarantees a logic-high receiver output when the receiver inputs are open, shorted, or terminated but idle/undriven. The enhanced failsafe interprets 0V differential as a logic high with a minimum 50mV noise margin, while maintaining compliance with the EIA/TIA-485 standard of $\pm 200\text{mV}$. No external biasing resistors are required, further easing the usage of multiple protocols over a single connector.

$\pm 15\text{kV}$ ESD PROTECTION

ESD protection structures are incorporated on all pins to protect against electrostatic discharges encountered during handling and assembly. The bus pins (driver outputs and receiver inputs) have extra protection structures, which have been tested up to $\pm 15\text{kV}$ without damage. These structures withstand high ESD in all states: normal operation, in shutdown, and when powered off.

ESD protection is tested in various ways. MaxLinear uses the following methods to qualify the protection structures designed into SP330:

- $\pm 8\text{kV}$ using IEC 61000-4-2 Contact Discharge

- $\pm 15\text{kV}$ using IEC 61000-4-2 Airgap Discharge

- $\pm 15\text{kV}$ using the Human Body Model (HBM)

The IEC 61000-4-2 standard is more rigorous than HBM, resulting in lower voltage levels compared with HBM for the same level of ESD protection. Because IEC 61000-4-2 specifies a lower series resistance, the peak current is higher than HBM. The SP330 has passed both HBM and IEC 61000-4-2 testing without damage.

VARIABLE LOGIC LEVEL VOLTAGE

The SP330 includes a V_L pin which reduces the logic level thresholds to interface with processors operating at reduced supply voltages. This pin should be connected to the supply voltage of the processor or UART block, or can be connected to V_{CC} for typical logic levels.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
