Proven Products for Demanding Applications

For over 50 years, the Magnum name has stood for proven products, custom solutions, quality commitment and superior service – core strengths that help build long-term relationships with our customers.

Magnum quality products support a broad range of electronic and electrical OEM applications. Our product line offers the most comprehensive selection of barrier-style terminal blocks in the industry – as well as:

- North American-style terminal blocks — single row, double row and tri-barrier
- European-style terminal blocks — PCB mount (spring, cage, tiered, high current), screwless, and pluggable
- Power distribution blocks — barrier and dead front, splicer, stud type, multi-line, and power blocks
- Rail and base mount terminal blocks
- DIN rail sectional blocks
- Junction blocks — stud type and feed through
- Edge connectors — vertical and right angle mount

Electronic: Our electronic products, including PCB mountable North American and Euro-Mag® terminal blocks, are found in a variety of demanding applications:

- Industrial and environmental controls
- Instrumentation
- Security and alarm systems
- Traffic signals and controls
- Telecom
- Process logic control (PLC)
- Test and measurement
- Power supplies
- Elevators and conveyors

European-Style PCB Terminal Blocks: Magnum Euro-Mag® blocks come in a variety

of terminal options to make connections easy and in different wire-entry orientations to

solve wire routing issues. These high high-

current terminal blocks handle up to 115

amps right on the circuit board and are

available in mold-to-length designs to

provide the exact number of poles for a

specific application.

Mounting Options

Inches (Millimeters)

Right Angle Bends (A1 only)

Right angle terminals are offered on the A1000 Series. Configurations are defined in these dimensions: X = pin extension beyond the block base; Z = length from block base to centerline of the terminal tip. Standard bends consist of the X and Z dimensions shown in the chart. Specify by adding the selected Bend Option Code to the terminal part number.

Bend Option Code	X (minimum)	Z
R26 (04 terminal only)	0.14 (3.5)	0.09 (2.3)
R45 (07 terminal only)	0.33 (8.4)	0.09 (2.3)

Dimensions in inches. To convert to millimeters, multiply by 25.4.

Angle Brackets (A1 only)

Option AB
Angle brackets enable block to be fastened at right angles to normal mount position. Bulk part number **1AB-J**.

Drilled Right Angle (A1 only)

Option DR
Counterbored holes across mount ends of block enable fastening with two screws at right angles to normal mount position.

Mounting Plates

Options MP & MT
MP Metal inserts with 0.150" (3.8) dia. hole accept #6 screw. **MT** Metal inserts with tapped hole accept #6-32 screw. Bulk part numbers **1MP-J** & **1MT-J**.

Right Angle Bends (A2, LP2 only)

Right angle terminals are offered on the A2000 & LP2000 Series. Configurations are defined in these dimensions: X = pin extension beyond the block base; Z = length from block base to centerline of the terminal tip. Standard bends consist of the X and Z dimensions shown in the chart. Specify by adding the selected Bend Option Code to the terminal part number.

04 Terminal Bend Configurations

Bend Option Code	X (minimum)	Z	Available w/insulator base

Dimensions in inches. To convert to millimeters, multiply by 25.4.

Angle Brackets (A2, LP2 only)

Option AB

Angle brackets enable block to be fastened at right angles to normal mount position. Bulk part number **2AB-J**.

Drilled Right Angle (A2, LP2 only)

Option DR

Counterbored holes across mount ends of block enable fastening with two screws at right angles to normal mount position.

Mounting Plates

Options MP, MP8 & MT

MP Metal inserts with 0.150" dia. hole accept #6 screw. **MP8** Metal inserts with 0.187" dia. hole accept #8-32 screw. **MT** Metal inserts with tapped hole accept #6-32 screw.

Standoffs

Option SO

Standoff mounts are tubes molded to the mounting positions. Available with insulator bases only.

Retaining Clip

Option RC

Use on standoff tubes. Fit panels up to 0.125" thick. Two clips for every five positions. Supplied unassembled. Bulk part number **H541-J**.

Single Row Terminal Blocks

Marking Options & Accessories

Standard Marking

Markings are applied directly to the sides of Series 1000, 2000, 3000, and 4000. Standard characters are white and 1/8" high. Factory may substitute 3/32" high characters.

Blocks to be marked on both sides require a different code for each side. Example: "L1" on one side of the block requires "L2" on the other side to ensure common terminal marking. Specify by adding suffix to part number.

Special Marking

Special markings are available for Series 1000, 2000, 3000, 4000 & 5000 at an additional charge for preparation. Production charges for setup, handling and marking are the same as for standard marking and the same quantity discounts apply. Consult factory for price and delivery.

Closed Barrier Terminal Block Marking Options

L1 & LT1 = Upright numerals, numbered from left to right
 L2 & LT2 = Upright numerals, numbered from right to left
 L3 = Left lying numerals, numbered from left to right
 L4 = Right lying numerals, numbered from right to left
 L5 & LT5 = Upside down numerals, numbered from right to left
 L6 & LT6 = Upside down numerals, numbered from left to right

Marker Strips

Black marker strips with white numerals mount beneath the terminal blocks to clearly identify terminal and wire positions. Available with forward or reverse markings, top or bottom of strip. If special markings are required, submit a drawing.

Terminal Block Covers

Available for Series A1000, A2000, A3000, A4000, CB2000, CB3000, LP2000, & LP3000.

Three styles of UL 94V0 thermoplastic covers are offered in black. Covers are ordered separately and supplied with two clips each, unless ordered without clips. Optional markings may be specified (black on yellow; white on black).

Notes: Covers can not be used with:

- mounting plate options MP & MT.
- certain quick connect terminals.
- 0, 6, & 9 base/end styles on A2 or A3

Bulk Cover Clips: Series 1000 = **CC1-J**; Series 2000 & 3000 = **CC2-J**; Series 4000 = **CC4-J**.

FEATURES

- Rugged integrated construction of filtering elements around a solid brass pin provides excellent EMI/RFI filtering
- Filter element provides high insertion loss for EMI/RFI filtering of AC and DC power and control lines
- 2 to 8 terminals standard – up to 16 poles available
- Cost-effective EMI solution for industrial interconnection filtering
- Termination options are straight lead, male or female quick connect
- Custom and special options available including:
 - Different capacitance values on each position
 - Wire assemblies added to pins

Double Row Terminal Blocks

Marking Options

Standard Marking

Standard markings are applied directly to the side(s) of a block. Standard color is white. Standard height is 0.125".

Note: Blocks marked on both sides require a different code for each side. Example Style L1 on one side of the block requires Style L2 on the other side to ensure common terminal marking. To order, add appropriate suffix (L1, L2, L3, L4, L5 and/or L6) to block part number in the proper sequence.

Special Marking

Special markings are available at an additional charge for preparation. Production charges for setup, handling and marking are the same as for standard marking. Drawing(s) must be submitted to ensure accuracy of part required. Consult factory for price and delivery.

Note: Marking is not available on TB400 Series

Covers

Covers prevent personnel, screws and foreign items from contacting live terminals. Available in white or clear plastic. Two cover clips supplied with each cover. Cover width is 1.31 inches.

All covers must be ordered separately. Consult factory for special legends.

Example: 10 position cover, white, TB100 Series, no legends . . . Part number is X12010.

Bottom Marker Strips

Bottom mounting marker strips are made of black PVC, 0.030" thick. Space is available to handle most marking situations. All marker strips must be ordered separately.

To order, specify part number, required legends and (BF) bottom forward, (BR) bottom reverse, (TF) top forward, or (TR) top reverse. Consult factory for specials.

Example: 13 position strip, TB100 with no legends, space for marking one side . . . Part number is X10513.

Position for legends (one side, two sides) can be specified standard. Standard legend height is 0.125". Standard legends are 0-99 and A-Z. Special legends are available on special order. Drawing(s) must be submitted to ensure accuracy of part required.

EUROMAG (EM) SERIES

Aside from the collection covered in the next section, MAGNUM also offers a variety of other standard European style PCB terminal blocks. Configurations include straight to board, plug and header, screwless, insulation displacement connectors (IDC), 2-tiered, 3-tiered, mold-to-length, modular (stackable) design, and terminal blocks with horizontal, vertical, 35 and 45 degree wire entry orientations. Available center spacings range from 2.54 mm to 15.00 mm.

SPECIFICATIONS

High Density Design: Up to 48 circuits per foot

Clamping Collar: Secures wires

Large, Captive, Wire-Ready Screws: Speeds assembly

Snap-on Installation to DIN Rail: Fast, easy assembly

Fully Shielded Construction: 600V spacings

Unique One-Piece Construction: Increases reliability

Thermoplastic Moldings: Strong and impact resistant

Material: UL Recognized 94V2 thermoplastic

Collars: Heat treated stainless steel

Terminals: Tin plated copper alloy

Screws: zinc-plated steel

Power Distribution Blocks

Feature/Benefits

- Enclosed, safer installation; IP-20 finger-safe under specific conditions
- High Short-Circuit Current Ratings up to 200,000A: PDBs do not have to be the weak link in achieving high SCCR for an industrial control panel
- Small footprint saves panel space
- Listed to UL1953 which has minimum spacing requirements at 600V of at least 1" through air and 2" over surface required for feeders in UL UL508A Industrial Control Panels
- For 2D CAD drawings visit www.cooperbussmann.com

Agency/Standards

- UL Listed 1953, Guide QPQS, File E256146
- CSA Certified, Class 6228-01, File 15364
- CE component IEC 60947-7-1
- IEC 60529, IP-20 (Finger Safe) under specific wiring conditions

Electrical

- 600Vac or dc (UL 1953), 690Vac or dc (IEC)
- IP-20 Finger Safe under specific conditions
- Short-Circuit Current Ratings up to 200,000kA, see table
- Ampacities up to 760 Amps
- CU Wire range 14 AWG to 500 kcmil or 2.5 to 240 mm²

Mechanical

- DIN rail or panel mount; PDBFS330 & PDBFS504 panel mount only
- Captive termination screws; screws do not get misplaced
- Wire ready: captive termination screws shipped backed out to save time on conductor installations
- Sliding DIN rail latch for easy mounting
- Single pole, gang mountable for multiple pole applications with interlocking dovetail accessory (optional)
- Flammability, UL 94V0
- Tin-plated AL connectors suitable for CU conductors
- Elongated hole for panel mounting; easier mounting with greater flexibility in matching up with drilled panel holes
- Part 2A1279: Interlocking dovetail pin accessory
One pin interlocks two units, two pins to interlock three units
- DIN rail end anchors required to prevent damage to block when torquing

Wire Management Products

- 3-pole, 3-wire receptacles for plug-in, locking type photo controls used in outdoor areas and roadway lighting.
- Receptacle configuration, terminals and limiting dimensions are in accordance with Figure 3 of EE Pub. No. TDJ-146, NEMA Pub. No. SH 16-1962 and UL 773.
- Wire types and sizes ranging from #12 AWG through 16 AWG rated at 600V with temperature ratings from 105° to 200°C. Consult factory for other wire colors.
- Hook-up wires are an integral part of the assembly with lengths furnished to customer specification.
- UL Recognized under file E65288 for a rating of 1kW or 1800VA for potentials up to 480V.
- CSA certified under file LR21295 for 15 amps at 125V.
- CE Certified.

SPECIFICATIONS

Material: Studs on non-feed-thrus are steel plated; feed-thrus are copper alloy.

Applications: Heavy-duty ground or power connection points in AC or DC circuits. Feed-thru or stand alone mount options available for transformers, communication and computer power sections along with various vehicle electrical systems.

Benefits: Modular design offers design and manufacturing flexibility.

Series C7021**Power Feed Thru Terminal Block****APPLICATIONS**

The C7021 terminal block is intended for use in applications requiring up to 175A utilizing a 2-hole compression lug on 5/8" centers. It is ideal for use as an input/output block for telecommunications power panels, or anywhere in which eliminating busbars would be an advantage.

SPECIFICATIONS

Ratings: 175A* per pole, 300V.

Center Spacing: 0.690" (17.5mm)

Wire Range: AWG #2/0-8

Material: UL 94V0 Thermoplastic

Number of Poles: 2- to 6-pole

Bolt Hole Spacing: 0.625" (15.88mm)

Stud: Standard 1/4-20 stud or optional M6 stud.

Mounting: Optional mounting ears.

Stud Material: Brass, Tin-Plated.

Torque Rating: 36 lb-in

Operating Temperature: 130°C

Accessories: Dead-Front covers (CSB7021-XX)

Agency Information: UL File E62622

APPLICATIONS

The 15133 is a series of input/output circuit board connectors. Available in a 1-piece or 2-piece design, they stack side-by-side with self-aligning housings to prevent incorrect mating. Both designs feature an integral, living hinge cover that saves the labor of attaching a separate cover. The cover provides a dead front for prevention of electrical contact, yet it also has test probe holes for easy circuit testing.

The 1-piece design is for applications not requiring unplugging the connector. It solders to the printed circuit board. Molded stand-offs ensure good solderability.

The 2-piece design enables quick connect and disconnect of several circuits at once. It allows fast board changing in the field without shutting down the entire system. The bottom section of the connector solders to the board. Male contacts are shrouded while the female has stand-offs; both are molded into the block. The top section of the connector plugs into the bottom section.

Cooper Bussmann Compliance References

UL1059 & CSA 22.2 No. 158 Voltage Rating

Voltage ratings of terminal blocks are based on the minimum spacing between electrically conductive parts and a minimum withstand voltage. The spacings are measured under two conditions: 1) through air, defined as the shortest distance an arc must travel through an air path from one electrically conductive part to another at opposite polarity or from an electrically conductive part to a grounded surface; and 2) over surface, defined as the shortest distance an arc must travel as it tracks along the surface of an insulating material from one electrically conductive part to another at opposite polarity or from an electrically conductive part to a grounded surface. The withstand voltage, termed dielectric withstand, is dependent on the voltage rating. The value is 1000V plus twice the rated voltage for one minute. This is tested under both conditions listed above. The following chart shows the UL 1059 and CSA 22.2 No. 158 spacing requirements, in inches.

IEC Compliance

Some Magnum Terminal Blocks comply with the requirements in IEC Publication 60947-7-1 Terminal Blocks for Copper Conductors. These blocks are concurrently recognized and certified under the UL Classification Program. Ratings, except where indicated, are concurrent with UL 1059.

CE

In 1998, Cooper Bussmann received CE certification on all Magnum products. For terminal blocks, CE is a self-certification mark applied to products that have met safety and performance requirements set forth by the European Union (EU). This mark is required for free movement of product in the European market.
