Design	female connector																																																																																																	
No. of contacts	2-12 pole																																																																																																	
Contact pitch	2,54 mm																																																																																																	
Test voltage	2,5 kV																																																																																																	
Rated voltage	160 V	overvoltage category III / pollution degree 2																																																																																																
Contact resistance	max. 20mOhm																																																																																																	
Insulation resistance	min. 10'0hm																																																																																																	
Working current	7.3 A at 70°C (tested with AWG20, see derating diagram)																																																																																																	
Temperature range	-40°C ... +125°C																																																																																																	
Termination technology	Push-In spring cage																																																																																																	
Reflow processing temperature	20s at 255°C																																																																																																	
Clearance & creepage distance	Clearance: 1,5 mm	Creepage: 1,6 mm																																																																																																
Insertion force	max. 5 N per contact																																																																																																	
Withdrawal force	min. 1 N per contact																																																																																																	
Mating cycles	10 cycles																																																																																																	
Hot plugging	No																																																																																																	
vibration	5-150Hz, 0,35mm, 5g, 2h each axis																																																																																																	
RoHS - compliant	Yes																																																																																																	
UL file	E 102079																																																																																																	
Conductor cross section solid min./max.	0.14mm² / 0.5mm²																																																																																																	
Conductor cross section stranded min./max.	0.2mm² / 0.5mm²																																																																																																	
Conductor cross section stranded, with ferrule, min./max.	0.25mm² / 0.34mm²																																																																																																	
Minimum AWG	26																																																																																																	
Maximum AWG	20																																																																																																	
Stripping length	6 mm																																																																																																	
Reconnection	10 times (only with same or larger cross section)

D	Derating diagram acc. to IEC 60512-5-2 (Current carrying capacity) The current carrying capacity is limited by maximum temperature of materials for inserts and contacts including terminals. The current capacity curve is valid for continuous, non interrupted current loaded contacts of connectors when simultaneous power on all contacts is given, without exceeding the maximum temperature. Control and test procedures according to DIN IEC 60512-5-2 <table><tr><th>Temperature [°C]</th><th>Electrical load [A]</th></tr><tr><td>0</td><td>11.5</td></tr><tr><td>10</td><td>11.0</td></tr><tr><td>20</td><td>10.5</td></tr><tr><td>30</td><td>10.0</td></tr><tr><td>40</td><td>9.5</td></tr><tr><td>50</td><td>9.0</td></tr><tr><td>60</td><td>8.5</td></tr><tr><td>70</td><td>8.0</td></tr><tr><td>80</td><td>7.5</td></tr><tr><td>90</td><td>7.0</td></tr><tr><td>100</td><td>6.5</td></tr><tr><td>110</td><td>6.0</td></tr><tr><td>120</td><td>5.0</td></tr><tr><td>125</td><td>0</td></tr></table> tested with AWG20			Temperature [°C]	Electrical load [A]	0	11.5	10	11.0	20	10.5	30	10.0	40	9.5	50	9.0	60	8.5	70	8.0	80	7.5	90	7.0	100	6.5	110	6.0	120	5.0	125	0	part-number 1431XX13101XXX * only versions with 2 and 3 poles available				D

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
