

# PatchLink™ Horizontal Cable Managers

## specifications

Horizontal cable managers shall be capable of managing cables on the front and rear of any 19" EIA rack. The manager shall consist of a 1-piece construction that is molded out of plastic. Horizontal managers shall have pass through holes that incorporate integral bend radius control as well as fingers with rounded edges. The manager shall have rigid end fingers that incorporate integral bend radius control. Hinged covers shall allow access to the cable pathway without having to completely remove the cover from the manager.

## key features and benefits

<b>Integral bend radius control</b>	Maintains bend radii as cables transition to and from horizontal and vertical pathways
<b>Dual hinged cover</b>	Opens upward or downward to provide easy access to cables in horizontal pathway without having to completely remove cover
<b>Increased finger spacing</b>	Provides larger area for high performance Category 6 cables
<b>One piece, plastic construction</b>	Provides durability and easy installation
<b>Flexible fingers</b>	Provide for easy installation and organizes cables simplifying moves, adds, and changes
<b>Rounded edges on fingers</b>	Protect cables from snags and damage to cable
<b>Cable pass through holes</b>	Provide ease of installation and cable maintenance

## applications

Panduit® PatchLink™ Horizontal Cable Managers provide a neat and efficient way to manage patch cables on any EIA 19" rack. They can be used in multimedia applications to manage copper, fiber optic, and coax cables. Flexible fingers organize the patch cords simplifying moves, adds, and changes while the integral bend radius control and "closed" design protects the patch cables in the pathway. All of these features combine to provide the user with a horizontal

cable management solution that simplifies cable routing in a finished, professional appearance. When used with the Panduit® Mini-Com® patch panels, patch cords, vertical cable managers, and racks, the user receives a total system that satisfies functional and aesthetic requirements for telecommunications rooms.
