

# BGU8061

## low-noise high-linearity amplifier

Rev. 2 — 27 January 2017

Product data sheet

## 1 General description

---

The BGU8061 is, also known as the BTS3001L, a high-linearity bypass amplifier for wireless infrastructure applications, equipped with fast shutdown to support TDD systems. The LNA has a high input and output return loss and is designed to operate between 0.7 GHz and 1.5 GHz. It is housed in a 3 mm × 3 mm × 0.85 mm 10-terminal plastic thin small outline package. The LNA is ESD protected on all terminals.

## 2 Features and benefits

---

- Low-noise performance: NF = 1.1 dB
- High-linearity performance: IP<sub>3O</sub> = 36.5 dBm
- High-input return loss > 10 dB
- High-output return loss > 10 dB
- Unconditionally stable up to 20 GHz
- Small 10-terminal leadless package 3 mm × 3 mm × 0.85 mm
- ESD protection on all terminals
- Moisture sensitivity level 1
- Fast shut down to support TDD systems
- +5 V single supply

## 3 Applications

---

- Wireless infrastructure
- Low noise and high-linearity applications
- LTE, W-CDMA, CDMA, GSM
- General-purpose wireless applications
- TDD or FDD systems
- Suitable for small cells

4 Quick reference data

Table 1. Quick reference data

$f = 900\text{ MHz}$ ;  $V_{CC} = 5\text{ V}$ ;  $T_{amb} = 25\text{ }^{\circ}\text{C}$ ; input and output  $50\text{ }\Omega$ ; unless otherwise specified. All RF parameters are measured on an application board with the circuit as shown in Figure 29 and components listed in Table 9 implemented. This board is optimized for  $f = 900\text{ MHz}$ .

| Symbol              | Parameter                             | Conditions                                        | Min  | Typ  | Max | Unit |
|---------------------|---------------------------------------|---------------------------------------------------|------|------|-----|------|
| I <sub>CC</sub>     | supply current                        | LNA enable; bypass off                            | -    | 70   | 85  | mA   |
|                     |                                       | LNA disable; bypass on                            | -    | 3    | 5   | mA   |
| G <sub>ass</sub>    | associated gain                       | LNA enable; bypass off                            | 19   | 20.5 | 22  | dB   |
|                     |                                       | LNA disable; bypass on                            | -1.6 | -1.0 | -   | dB   |
| NF                  | noise figure                          | LNA enable; bypass off <sup>[1]</sup>             | -    | 1.1  | 1.8 | dB   |
| P <sub>L(1dB)</sub> | output power at 1 dB gain compression | LNA enable; bypass off                            | 19   | 20.5 | -   | dBm  |
| IP <sub>3O</sub>    | output third-order intercept point    | 2-tone; tone spacing = 1 MHz; PL = 5 dBm per tone |      |      |     |      |
|                     |                                       | LNA enable; bypass off                            | 33.5 | 36.5 | -   | dBm  |
|                     |                                       | LNA disable; bypass on                            | -    | 44   | -   | dBm  |

[1] Connector and Printed-Circuit Board (PCB) losses have been de-embedded.

5 Ordering information

Table 2. Ordering information

| Type number | Package |                                                                                                              | Version  |
|-------------|---------|--------------------------------------------------------------------------------------------------------------|----------|
|             | Name    | Description                                                                                                  |          |
| BGU8061     | HVSON10 | plastic thermal enhanced very thin small outline package; no leads; 10 terminals; body 3 mm × 3 mm × 0.85 mm | SOT650-2 |

## 8 Limiting values

**Table 4. Limiting values**

In accordance with the Absolute Maximum Rating System (IEC 60134).

| Symbol                | Parameter                          | Conditions                                                               | Min | Max  | Unit |
|-----------------------|------------------------------------|--------------------------------------------------------------------------|-----|------|------|
| V <sub>CC</sub>       | supply voltage                     |                                                                          | -   | 6    | V    |
| V <sub>i(CTRL1)</sub> | input voltage on pin CTRL1         |                                                                          | -   | 3.6  | V    |
| V <sub>i(CTRL2)</sub> | input voltage on pin CTRL2         |                                                                          | -   | 3.6  | V    |
| P <sub>I(RF)CW</sub>  | continuous waveform RF input power |                                                                          | -   | 20   | dBm  |
| T <sub>amb</sub>      | ambient temperature                |                                                                          | -40 | +85  | °C   |
| T <sub>stg</sub>      | storage temperature                |                                                                          | -40 | +150 | °C   |
| T <sub>j</sub>        | junction temperature               |                                                                          | -   | 150  | °C   |
| P                     | power dissipation                  | T <sub>case</sub> ≤ 125 °C [1]                                           | -   | 510  | mW   |
| V <sub>ESD</sub>      | electrostatic discharge voltage    | Human Body Model (HBM) according to ANSI/ESDA/JEDEC standard JS-001-2010 | -   | 2.0  | kV   |
|                       |                                    | Charged Device Model (CDM) according to JEDEC standard 22-C101B          | -   | 1.0  | kV   |

[1] Case is ground solder pad.

## 9 Recommended operating conditions

**Table 5. Characteristics**

| Symbol          | Parameter                | Conditions | Min  | Typ | Max  | Unit |
|-----------------|--------------------------|------------|------|-----|------|------|
| V <sub>CC</sub> | supply voltage           |            | 4.75 | 5   | 5.25 | V    |
| Z <sub>0</sub>  | characteristic impedance |            | -    | 50  | -    | Ω    |

## 10 Thermal characteristics

**Table 6. Thermal characteristics**

| Symbol                  | Parameter                                | Conditions | Min | Typ | Max | Unit |
|-------------------------|------------------------------------------|------------|-----|-----|-----|------|
| R <sub>th(j-case)</sub> | thermal resistance from junction to case | [1] [2]    | -   | 55  | -   | K/W  |

[1] Case is ground solder pad.

[2] Thermal resistance measured using infrared measurement technique, device mounted on application board and placed in still air.

## 11 Characteristics

**Table 7. Characteristics**

$f = 900\text{ MHz}$ ;  $V_{CC} = 5\text{ V}$ ;  $T_{amb} = 25\text{ °C}$ ; input and output  $50\text{ }\Omega$ ; unless otherwise specified. All RF parameters are measured on an application board with the circuit as shown in [Figure 29](#) and components listed in [Table 9](#) implemented. This board is optimized for  $f = 900\text{ MHz}$ .

| Symbol        | Parameter                             | Conditions                                                  | Min  | Typ  | Max | Unit          |
|---------------|---------------------------------------|-------------------------------------------------------------|------|------|-----|---------------|
| $I_{CC}$      | supply current                        | LNA enable; bypass off                                      | -    | 70   | 85  | mA            |
|               |                                       | LNA disable; bypass on                                      | -    | 3    | 5   | mA            |
| $G_{ass}$     | associated gain                       | LNA enable; bypass off                                      | 19   | 20.5 | 22  | dB            |
|               |                                       | LNA disable; bypass on                                      | -1.6 | -1.0 | -   | dB            |
| $G_{flat}$    | gain flatness                         | within 100 MHz bandwidth; LNA enable; bypass off            |      |      |     |               |
|               |                                       | $700\text{ MHz} \leq f \leq 1500\text{ MHz}$                | -    | 0.9  | -   | dB            |
|               |                                       | $1000\text{ MHz} \leq f \leq 1500\text{ MHz}$               | -    | 0.8  | -   | dB            |
| NF            | noise figure                          | LNA enable; bypass off <sup>[1]</sup>                       | -    | 1.1  | 1.8 | dB            |
| $\Delta G$    | gain variation                        | $700\text{ MHz} \leq f \leq 1500\text{ MHz}$                | -    | 5.5  | -   | dB            |
| $P_{L(1dB)}$  | output power at 1 dB gain compression | LNA enable; bypass off                                      | 19   | 20.5 | -   | dBm           |
| $IP3_O$       | output third-order intercept point    | 2-tone; tone spacing = 1 MHz; $P_L = 5\text{ dBm}$ per tone |      |      |     |               |
|               |                                       | LNA enable; bypass off                                      | 33.5 | 36.5 | -   | dBm           |
|               |                                       | LNA disable; bypass on                                      | -    | 44   | -   | dBm           |
| $RL_{in}$     | input return loss                     | LNA enable; bypass off                                      | -    | 10   | -   | dB            |
|               |                                       | LNA disable; bypass on                                      | -    | 15   | -   | dB            |
| $RL_{out}$    | output return loss                    | LNA enable; bypass off                                      | -    | 10   | -   | dB            |
|               |                                       | LNA disable; bypass on                                      | -    | 15   | -   | dB            |
| ISL           | isolation                             | LNA disable; bypass off                                     | -    | 30   | -   | dB            |
|               |                                       | LNA enable; bypass off                                      | -    | 20   | -   | dB            |

| K             | Rollett stability factor              | both on-state and off-state up to $f = 20\text{ GHz}$       | 1    | -    | -   | -             |

[1] Connector and Printed-Circuit Board (PCB) losses have been de-embedded.

Table 8. Control truth table

 $V_{CC} = 5\text{ V}$ ;  $T_{amb} = 25\text{ }^{\circ}\text{C}$ .

| Control signal setting <sup>[1]</sup> |                | Mode of operation |        |
|---------------------------------------|----------------|-------------------|--------|
| CTRL2 (pin 1)                         | CTRL1 (pin 10) | LNA               | bypass |
| HIGH                                  | LOW            | disable           | on     |
| HIGH                                  | HIGH           | disable           | on     |
| LOW                                   | LOW            | enable            | off    |
| LOW                                   | HIGH           | disable           | off    |

- [1] A logic LOW is the result of an input voltage on that specific pin between  $-0.3\text{ V}$  and  $+0.7\text{ V}$ .  
A logic HIGH is the result of an input voltage on that specific pin between  $1.2\text{ V}$  and  $3.6\text{ V}$ .

13 Application information

Table 9. List of components

See [Figure 29](#) for schematics.

| Component | Description | Value        | Remarks  |
|-----------|-------------|--------------|----------|
| C1        | capacitor   | 100 nF       |          |
| C2, C3    | capacitor   | 100 pF       |          |
| C4        | capacitor   | 1 nF         |          |
| C5        | capacitor   | -            | optional |
| C6        | capacitor   | 10 nF        |          |
| C7        | capacitor   | 1 $\mu$ F    |          |
| L1        | inductor    | 15 nH        |          |
| R1, R2    | resistor    | 1 k $\Omega$ |          |

## 14 Package outline

**HVSON10: plastic thermal enhanced very thin small outline package; no leads; 10 terminals; 3 x 3 x 0.85 mm**

**SOT650-2**

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
