Copper to Fiber Ethernet Media Converter

10/100/1000BASE-T to Fiber Optic Ethernet (SX, LX10, EX, FX)

10/100/1000BASE-T to 1000BASE-SX, 1000BASE-LX10, or 100BASE-FX

The Glenair 050-105 is an Ethernet Copper to Fiber media converter that supports 10/100/1000BASE-T copper input/output and can be configured to support 1000BASE-SX, 1000BASE-LX10, 1000BASE-EX or 100BASE-FX protocols. It is designed for harsh environments and incorporates electronics in an environmentally sealed enclosure that incorporates three environmental M38999 connectors. The Glenair Ethernet media converter enables reliable communications over longer distances in harsh environment applications. It extends network link distances between switches, routers, and other Ethernet peripherals. It converts 10/100/1000BASE-T data from twisted pair copper cable to 1000BASE-SX/LX serial data transmitted over a pair of optical fibers. This allows legacy equipment running at 10/100/1000BASE-T to be connected to newer networks, and provides a smooth upgrade path.
