## Linear LED Light Modules

### Overview

Heatron's Innovation Series LED Modules provide luminaire manufacturers with the key components needed to move LED lighting projects from concept to production. The LED modules were built for design engineers looking for an easy way to prototype new fixture designs. An off-the-shelf platform, these modules move seamlessly from prototype to final design. Innovation Modules are centered on Cree XPG and XTE LEDs. Custom configurations are available for OEM's who prefer other LED packages, flux bins, color temperatures or CRI.

Linear Innovation Series LED Modules are available in three sizes with two, three, or six LED arrays.

Also see our Round Innovation Series LED Modules, available in three versions with three or seven LED arrays.

Innovation Series modules come with easy-to-use connectors, enabling quick prototyping of various light engines.
