

POWER DOUBLE LOCK (PDL) CONNECTORS

Quick Reference Guide

The power double lock connectors are available in wire-to-wire (including free-hanging and panel mount) and wire-to-board configurations. This connector system consists of plug and cap housings for wire termination, optional double lock plates, crimp contacts and PC board pin headers, and is available in a contact centerline spacing of 3.96 mm for wire-to-wire and centerline spacing of 3.96 mm, 6.5 mm, and 13.00 mm for wire-to-board. The power double lock connector system accepts 26-16 AWG wire with insulation diameters up to 3.1 mm and is rated up to 14 Amps per line.

FEATURES & BENEFITS

- Discrete wire interconnect available in 1-12 position wire-to-board and wire-to-wire
- Multiple colors available for ease of connector identification during assembly and maintenance
- Audible click when contact is fully inserted into the housing
- Polarizing ribs on plug housing allows for proper mating
- Board-mounted headers are compatible with resin or conformal coatings — No drain holes
- Solder tail kink along with the polarization peg (boss) feature, secures the header on the board during the solder process
- UL recognized, CSA certified, and VDE approved
- **TPA** and **GWT** available

PRODUCT APPLICATIONS

- Household appliances
- Gaming
- Vending
- Garage door openers
- Security systems
- Industrial controls
- HVAC system controls
- Fan modules
- Business equipment
- Small UAV

Power Double Lock (PDL) Connectors

See Application Specification 114-5175 & Instruction Sheet 411-5638

* Part Number suffix -2 represents high contact pressure type

The PDL contacts are phosphor bronze with pre-tin plating and designed without lances to prevent entanglement of contacts with one another. The receptacle contact gets loaded into the plug housings and the tab contact gets loaded into cap housings.

The semi-inner locking system of the PDL design helps eliminate unmating by external force and the audible click helps indicate the connector system is fully latched. The smooth compact design prevents snagging when mated.

*Available without kink, see catalog # 82181 for details

Positive mounting achieved with Double Lock Mechanism:

1. Contact is partially-mounted.
2. Double Lock Plate is set.
3. Contact is fully pushed in as Double Lock Plate is pressed.

The PDL headers offer a kink in the solder tail along with the kink in the mounting boss which secures the header on the board firmly while soldering. Board mounted headers are compatible with resin or conformal coatings (no drain holes).

Power Double Lock (PDL) Connectors

Quick Reference Guide

DESIGN-IN QUESTIONS

1. What are the current and voltage requirements for your application?

The power double lock connector system has a maximum current rating of 14 Amps per line (based on initial t-rise vs. current testing using 16 AWG in a 2 position connector) and is rated for 300 Volts AC/DC wire-to-wire and 50 Volts AC/DC wire-to-board.

2. What are the wire type and size requirements?

The power double lock connector system is approved for use with 26-16 AWG wire with an insulation range between 1.3 mm and 3.1 mm.

3. What are the number of positions and available space?

The power double lock connector system is available in select positions (1-12) on four contact centerline spacings; 3.96 mm, 6.5 mm, 7.92 mm and 13.0 mm. The overall mated length of the free-hanging system is 38.7 mm and the maximum height of the wire-to-board system is 25.5 mm.

4. What are the operating temperature requirements?

The power double lock connector system has a maximum operating temperature of 105°C. For more information regarding operating temperatures refer to Product Specification 108-5410.

5. Is contact back-out a concern?

Do you need confirmation that the contacts are seated? The power double lock connector system offers an optional double lock plate. The purpose of the double lock plate is two-fold: 1) allows contacts to be fully seated in the housing and 2) it helps prevent the possibility of contact disengagement when wires are exposed to external pressure.

6. Do you need to differentiate this connector from other connectors in the application?

The power double lock connector system offers multiple options of colored housings for ease of connector identification during manufacturing and assembly.

7. What is the benefit of choosing a header with a polarization peg (boss)?

The power double lock connector system offers headers with or without polarization pegs. The purpose of this feature is to polarize the headers to the PCB so the header can not be placed on the PCB in the wrong orientation. For more information regarding PCB layout please refer to the header product drawing.

8. What is the benefit of choosing a high force contact?

The power double lock connector system offers high force contacts for use in applications where vibration is prominent. It is important to note that the high force contacts increase the amount of mating force. Refer to Product Specification 108-5410 for more information.

9. What is the benefit of choosing Lock Type II or Lock Type B (non-standard) latch?

- Lock Type II is offered on the 3.96 mm plugs allowing for easier unmating (more finger room to depress the latch).
- Lock Type B is offered on the 6.5 mm plugs providing a slightly lower profile and can be used when the application will not have to be unmated often.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
