PWM Step-up DC/DC Converter
R1210N××1× Series

APPLICATION MANUAL

RICOH

R1210N××1× Series

OUTLINE

The R1210N××1× Series are PWM step-up DC/DC Converter, with high accuracy, low supply current by CMOS process.

Each of the R1210N××1× Series consists of an oscillator, a PWM circuit, a reference voltage unit, an error amplifier, phase compensation circuit, resistors for voltage detection, a chip enable circuit. Further, includes a controller against drastic load transient, a control transistor with low ON-Resistance, 'L$_X$ switch', and a protection circuit for L$_X$ switch and an output voltage detector. R1210N××1A Series contain further a circuit for changeover oscillator frequency each. A low ripple, high efficiency step-up DC/DC converter can be composed of this IC with only three external components, or an inductor, a diode and a capacitor.

The R1210N Series can detect drastic change of output voltage with a circuit controller. The load transient response is improved compared with current model, furthermore the R1210N××1A Series have another function, that is, when the load current is small, oscillator frequency is decreased by a circuit for switching oscillator frequency from TYP. 100kHz to 35kHz, therefore, supply current is reduced.

The built-in chip enable circuit can make the standby mode with ultra low quiescent current.

Since the package for these ICs is small SOT-23-5, high density mounting of the ICs on board is possible.

FEATURES

- External Components .... Only an inductor, a diode, and a capacitor
- Standby Current .... TYP. 0μA
- Low Temperature-Drift Coefficient of Output Voltage.............. TYP. ±100ppm/°C
- Output Voltage... Stepwise Setting with a step of 0.1V in the range of
  2.2V to 6.0V (××1C/D)
  2.2V to 3.5V (××1A)
- Two choices of Basic Oscillator Frequency............................... 100kHz (××1A/C), 180kHz (××1D)
- Small Package .... SOT-23-5 (Mini-mold)
- High Efficiency .... TYP. 88%
  (V$_{IN}$=Set Output Voltage×0.6 [V], I$_{OUT}$=10mA)
- Low Ripple, Low Noise
- Built-in a driver transistor with low on-resistance
- Start-up Voltage.. MAX. 0.9V
- Basic Frequency change-over circuit (only for ××1A type)....... from TYP. 100kHz to 35kHz

APPLICATIONS

- Power source for battery-powered equipment.
- Power source for portable communication appliances, cameras, VCRs
- Power source for appliances of which require higher voltage than battery voltage.

BLOCK DIAGRAM
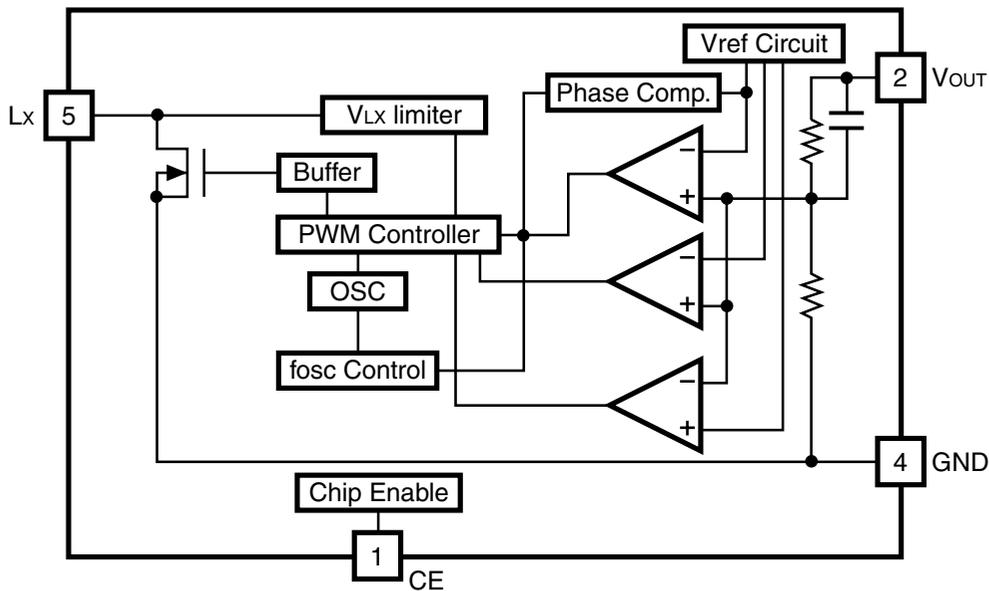

SELECTION GUIDE

In the R1210N Series, the output voltage, the oscillator frequency, the optional function, and the taping type for the ICs can be selected at the user's request.

The selection can be made by designating the part number as shown below ;

R1210N<u>××</u>1<u>×</u>-<u>××</u>
　　　↑　↑　↑
　　　a　b　c

Code	Contents
a	Setting Output Voltage (V_{OUT}) : Stepwise setting with a step of 0.1V in the range of 2.2V to 6.0V (for ××1C/D version) or 2.2V to 3.5V (for ××1A version) is possible.
b	Designation of Oscillator Frequency A : 100kHz with a Frequency Change-over circuit C : 100kHz without a Frequency Change-over circuit D : 180kHz without a Frequency Change-over circuit
c	Designation of Taping Type; Ex. :TR, TL (refer to Taping Specification) "TR" is prescribed as a standard.

PIN CONFIGURATION

SOT-23-5
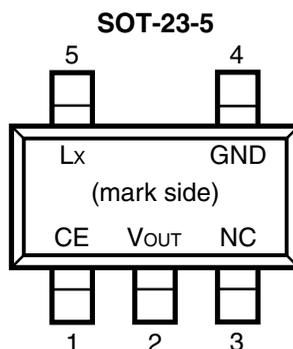

PIN DESCRIPTION

Pin No.	Symbol	Description
1	CE	Chip Enable Pin
2	V_{OUT}	Pin for Monitoring Output Voltage
3	NC	No Connection
4	GND	Ground Pin
5	L_X	Switching Pin (Nch Open Drain)

ABSOLUTE MAXIMUM RATINGS

Symbol	Item	Rating	Unit
V_{OUT}	V_{OUT} Pin Output Voltage	9.0	V
V_{LX}	L_X Pin Output Voltage	9.0	V
V_{CE}	CE Pin Input Voltage	9.0	V
I_{LX}	L_X Pin Output Current	400	mA
P_D	Power Dissipation	250	mW
Topt	Operating Temperature Range	-40~+85	°C
Tstg	Storage Temperature Range	-55~+125	°C

ELECTRICAL CHARACTERISTICS

- **R1210N××1×** (Topt=25°C)

Symbol	Item	Conditions	MIN.	TYP.	MAX.	Unit
V_{OUT}	Output Voltage	$V_{IN}=V_{SET}\times0.6$, $I_{OUT}=1mA$	×0.975		×1.025	V

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits,General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
