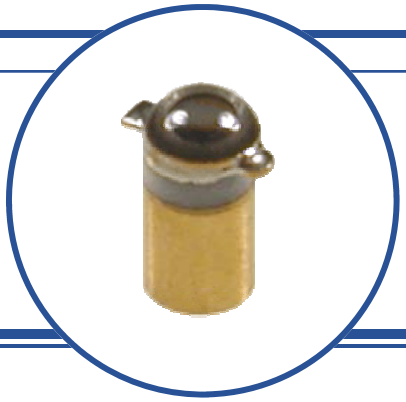
NPN Silicon Photodarlington
OP300SL Series

TT electronics
OPTEK Technology

Features:

- Narrow receiving angle
- Variety of sensitivity ranges
- Enhanced temperature range
- PCBoard mounting
- Mechanically and spectrally matched to OP123 and OP223 LEDs



Description:

Each device in this series is a NPN silicon photodarlington in a hermetically sealed pill package with a narrow receiving angle that provides excellent on-axis coupling. Photodarlingtons are normally used in applications with low light signal levels, where more current gain is needed than phototransistors can provide.

Components in the OP300 series are mechanically and spectrally matched to the OP123 and OP223 series.

Please refer to Application Bulletins 208 and 210 for additional design information and reliability (degradation) data, and to Application Bulletin 202 for pill-type soldering to PCBoard.

Applications:

- Non-contact reflective object sensor
- Assembly line automation
- Machine automation
- Machine safety
- End of travel sensor
- Door sensor
