

RFLA9003

Dual Low Noise Amplifier Module 1710MHz to 2180MHz

RFMD's RFLA9003 is a dual Low Noise Amplifier module with external connections to both LNAs. These LNAs feature a shutdown mode to turn off the LNA and provide up to 15dBm drive level without gain expansion and self-biasing in shutdown mode. Noise figure of 1.2dB and input P1dB of -3.5dBm make this component ideal for receiver input lineups. The RFLA9003 is packaged in a small 4.0mm x 4.0mm leadless laminate MCM. This module is internally matched to 50Ω on all RF ports making it easy to use with no external matching components required.
