SV MICROWAVE®

Blindmate Connectors & Components

BLINDMATE CONNECTORS AND COMPONENTS

SV Microwave, Inc. is a world leader in the RF/microwave industry. We design and manufacture coaxial connectors, cable assemblies, attenuators, terminations, and custom signal processing components. We control virtually all of our processes with in-house machining, fabrication, assembly and testing.

SV Microwave is committed to helping customers meet their RF and microwave performance goals. We have invested in a talented engineering staff supported by state-of-the-art design, high-frequency software for 3-dimensional RF simulations and network measurement test equipment, and can provide detailed design assistance for unique applications from DC through millimeter wave frequencies.

SV Microwave supplies products that are electrically and mechanically optimized. We meet cost requirements either by customizing connectors and components for new applications, by supplying products discontinued by other manufacturers or by manufacturing high-volume components.

SV Microwave is a global leader in the development and application of Blindmate connector technology and has been spearheading the use of these connectors in advanced packaging concepts for the defense and telecommunication industries. We are the only manufacturer to obtain DSCC M31031 QPL status.

Selection Guide

Specification	Blindmate Interface			
	BMA	**BMMA**	**BMZ**	**BZ**
Frequency	DC - 22 GHz*	DC - 28 GHz	DC - 18 GHz	DC - 2 GHz**
VSWR (f = Frequency GHz)	1.02 + .008f	1.05 + .01f	1.05 + .01f	1.02 + .05f
Insertion Loss (f = GHz)	$.03(f)^{1/2}$	$.04(f)^{1/2}$	$.06(f)^{1/2}$	$.15(f)^{1/2}$
RF Leakage Min.	–(90–fGHz) dB	–(90–fGHz) dB	–(80–fGHz) dB	–(80–fGHz) dB
RF High Potential @ 5 MHz	1,000 VRMS	675 VRMS	500 VRMS	1,500 VRMS
Radial Float inches (mm)	.020 (.51)	.020 (.51)	.020 (.51)	.020 (.51)
Axial Float inches (mm)	.060 (1.5)	.060 (1.5)	.060 (1.5)	.150 (3.8)
Connector Durability	5,000 Cycles	1,000 Cycles	500 Cycles	500 Cycles
Spring Load: Preload – Minimum Travel	.010 inch (.25 mm)	.010 inch (.25 mm)	.004 inch (.10 mm)	.010 inch (.25 mm)
Preload Force	3.7 lbs. (1.68 kg)	3.7 lbs. (1.68 kg)	1.28 lbs. min. (.5 kg min)	3 lbs. (1.36 kg)
Max. Travel Force	4.5 lbs. (2.04 kg)	4.5 lbs. (2.04 kg)	2.8 lbs. (1.27 kg)	.150 in. travel/ 5 lbs. (3.81 mm travel/ 2.27 kg))
Force to Engage	48 oz. Max. (1361 g)	48 oz. Max. (1361 g)	12 oz. Max. (340 g)	32 oz. Max. (907 g)
Force to Disengage	1.5 lbs. Max. (.675 kg)	1.5 lbs. Max. (.675 kg)	2 oz. Min. (57 g)	2 oz. Min. (57 g)

* 26.5 GHz available for semi-rigid cable and receptacles.
** 12.4 and 18 GHz units available.

BLINDMATE CONNECTOR SYSTEM

Applied Technology

Blindmate connectors are often the solution when mating modular components in rack-and-panel, module-to-module or module-to-motherboard applications. Identifying the appropriate connector for the job is as crucial as pinpointing mounting features such as:

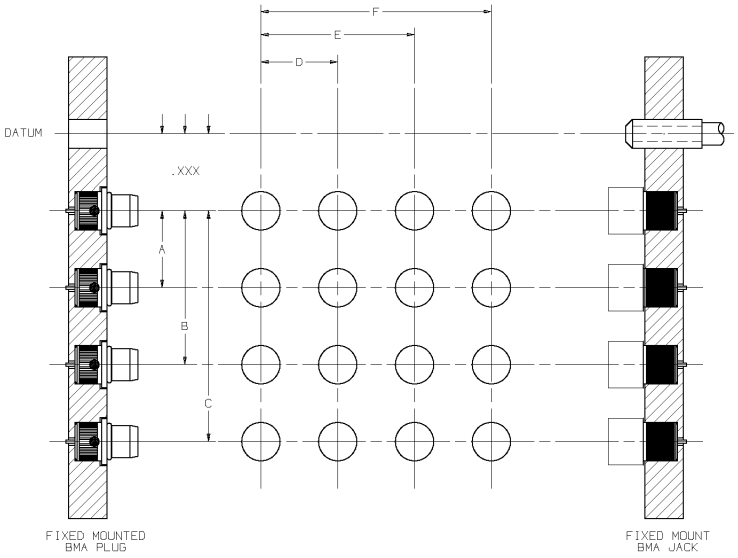
- Fixed and float tolerances, connector-to-connector
- Float mount spring loading and mating forces
- Density of connectors in multi-connector arrays
- Panel deflection

Blindmate connectors are ideally suited for OEMs who need modularity to integrate subsystems and components such as power amplifiers, transceivers and combiners into common racks in wireless/ broadcast and communications systems. Blindmate connectors are also commonly found in satellites, radar and sensor equipment, avionics, missile systems, military electronics, electronic countermeasure systems, navigation and air traffic control, as well automated test equipment.

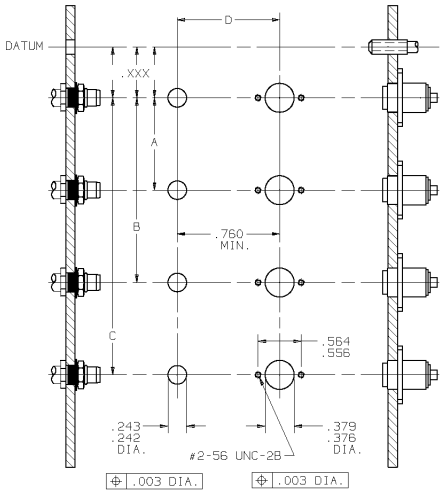
To adapt to this wide assortment of applications, SV Microwave blindmate connectors are configured in various ways:

- Fixed, floating, high-power and hermetic versions
- Flexible and semi-rigid cable connectors
- Low-profile styles
- Stripline and microstrip launchers
- Hermetic launchers
- Between-series adapters
- Terminations

Our blindmates also offer efficiencies in the areas of higher package densities, effective real estate and lower applied cost. They connect and disconnect quickly and offer slide-on mating without sacrificing superior microwave performance. Our unique spring-loading mechanism allows for both axial and radial misalignment.



Fixed-Mount Blindmate



Float-Mount Blindmate

Module-Module and Module-Motherboard Misalignment Tolerances: Fixed Mount

When using fixed mount blindmate connectors, axial and radial float tolerances of the interface accommodate misalignment.

Fixed mount blindmate connectors also tolerate a certain degree of radial misalignment without electrical or mechanical performance degradation.

Axial Misalignment

Interface	Maximum Separation	Design Limit
BMA	.030 in. (.76 mm)	.015 in. (.38 mm)
BMMA	.020 in. (.51 mm)	.010 in. (.25 mm)
BMZ	.020 in. (.51 mm)	.010 in. (.25 mm)
BZ	.030 in. (.76 mm)	.015 in. (.38 mm)

Radial Misalignment

Interface	True Position Mounting Hole Centerline Tolerance	Total Connector Misalignment*
BMA	.003 in. (.08 mm)	.008 in. (.20 mm)
BMMA	.002 in. (.05 mm)	.004 in. (.10 mm)
BMZ	.002 in. (.05 mm)	.004 in. (.10 mm)
BZ	.003 in. (.08 mm)	.008 in. (.20 mm)

*per mated pair, any direction

Rack-and-Panel and Module-Motherboard Misalignment Tolerances: Float Mount

Blindmate float mount jack connectors are ideal for applications, such as multiple mate rack-and-panel, requiring higher axial and radial misalignment tolerances. The external float device provides connection protection beyond the normal blindmate interface misalignment tolerance

Axial Misalignment

Assuming a 0.010-inch min. preload, the float mount design accommodates up to a .050-inch longitudinal misalignment (mounting surface to mounting surface). If semi-rigid cable is needed, a service loop should be used to fully enable the connector's float features.

Radial Misalignment

Our floating connectors accommodate ±.020 radial misalignment with a mounting hole centerline dimensioned from a predesignated datum of ⌖ .006 Dia.. The radial tolerance accommodates mating package misalignment and mounting hole tolerance.

Recommended Preload

Interface	Recommend Preload
BMA	.010 in (.25 mm)
BMMA	.010 in (.25 mm)
BMZ	.004 in (.10 mm)
BZ	.010 in (.25 mm)

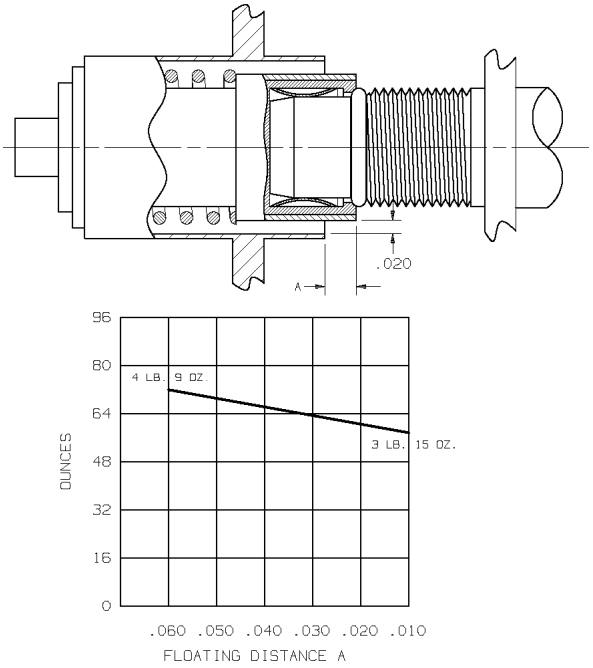
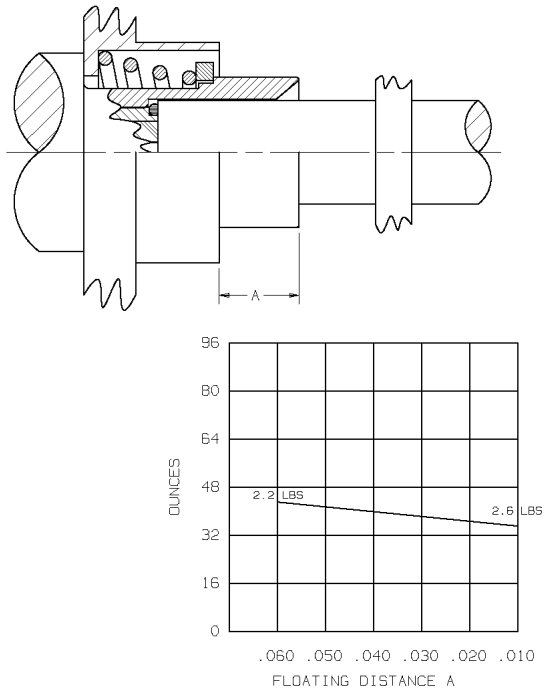
Spring Load Forces

A spring mechanism separates the blindmate connector interface from the flange housing. The floating action that results provides the misalignment tolerance and maintains a solid mating connection. Bear in mind that the spring forces are communicated to the mounting panel; in an extreme, mismate situation, the force of several connectors, without sufficient reinforcement, can cause panels to bow. Illustrated below are the forces commonly exerted upon a mated connector pair in an extreme scenario.

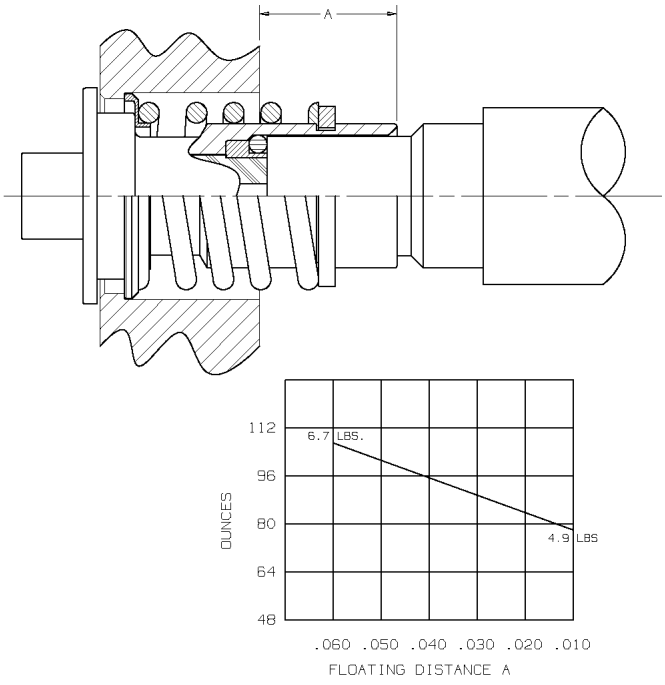
Note: Dimensions are in decimal inches.



BMA Spring Load Forces



BMZ Spring Load Forces



BZ Spring Load Forces

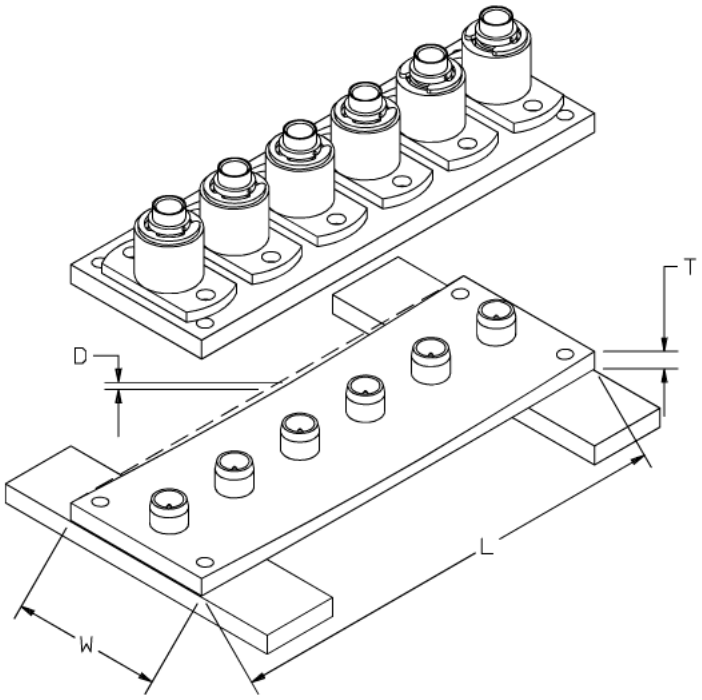
Phone: 561-840-1800 • FAX: 561-842-6277

Deflection Calculation

Interface mating forces and, in the case of float mount connectors, spring preload forces must be considered when mounting several blindmate connectors on a panel. Taking these forces into account in the design stage will prevent distortion (deflection) of the panel and, through proper mating, insure optimum performance. One technique used to estimate the amount of potential distortion is to view the panel as a beam under deflection. These examples illustrate this technique using 6 BMA float mount connectors on an aluminum and a stainless steel panel.



Deflection: $D = \frac{FL^3}{384\ EI}$

Moment of a Beam: $I = \frac{WT^3}{12}$

Material: 6061T6 Aluminum
Modulus of Elasticity: $E = 10 \times 10^6$ PSI

Float Mount Connector Example:

- 6 float mount BMAs with a maximum compression load of 4 lbs. 8 oz. each (F = 27 lbs.)
- Aluminum mounting plate 6061T6
  .090 inch thick (T) x .750 inch wide (W) x 2.00 inch long (L)

$I = 4.56 \times 10^{-5}$ inch^4

$$D = \frac{(27)\ (2.00)^3}{(384)\ (10 \times 10^6)\ (4.56 \times 10^{-5})} = .00123 \text{ inch}$$

Material: Stainless Steel 18-8
Modulus of Elasticity: $E = 27.6 \times 10^6$ PSI
D = .00045 inch

Interface Mating Dimensions

Specifications

General	
Materials	Body, Stainless steel per AMS-5640, UNS S30300, Type I. Contact, Beryllium copper per ASTM-B-196. PFTE per ASTM-D-1710.
Finish	Body, Gold plated per ASTM-B-488 over nickel per SAE AMS-QQ-N-290, Class 1 or passivate. Center Contact, Gold plated per ASTM-B-488 over nickel per SAE AMS-QQ-N-290, Class 1.
Design	Interface dimensions per MIL-STD-348.
Electrical	
	RG 405 (.085) Semi-Rigid
Frequency	DC to 18 GHz
Nominal Impedance	50 Ohms
VSWR	1.05 + .01f (GHz)
RF Transmission Loss	.06 x $\sqrt{f}$ (GHz)
Insulation Resistance	10,000 Megohms Min.
Contact Resistance	
Center Contact	6.0 Milliohms Max.
Outer Contact	3.0 Milliohms Max.
Outer Contact to Cable	0.5 Milliohms Max.
Dielectric Withstanding Voltage	1,000 Volts RMS
Corona Extinction Voltage at 70,000 Ft.	250 Volts Min.
RF High Potential at 5 MHz	500 Volts RMS
RF Leakage Interface Only	–(80-fGHz) dB Min. (fully mated)
Mechanical	
Force to Engage	12 Ounces Max.
Force to Disengage	2 Ounces Min.
Center Contact Retention	6 Pounds Min.
Durability	500 Cycles
Radial Misalignment	
Rigid Mount	± .0025 Inch
Float Mount	± .020 Inch
Environmental	
Temperature Rating	–65°C to +125°C (Semi-Rigid)
Corrosion (Salt Spray)	MIL-STD-202, Method 101, Condition B
Vibration	MIL-STD-202, Method 204, Condition D, 20 Gs
Shock	MIL-STD-202, Method 213, Condition I, 100 Gs
Thermal Shock	MIL-STD-202, Method 107, Condition B, –65°C to +125°C
Moisture Resistance	MIL-STD-202, Method 106, Less Step 7B
Barometric Pressure (Altitude)	MIL-STD-202, Method 105, Condition C, 70,000 Ft.

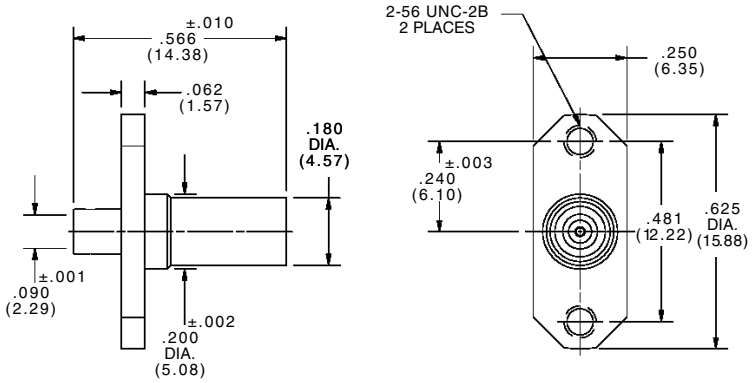
Semi-Rigid Cable • Direct Solder Attachment

Flange Mount Cable Jack • Rear Mount

Cable	RG-405/U (.085)
Part Number	SF8934-6001

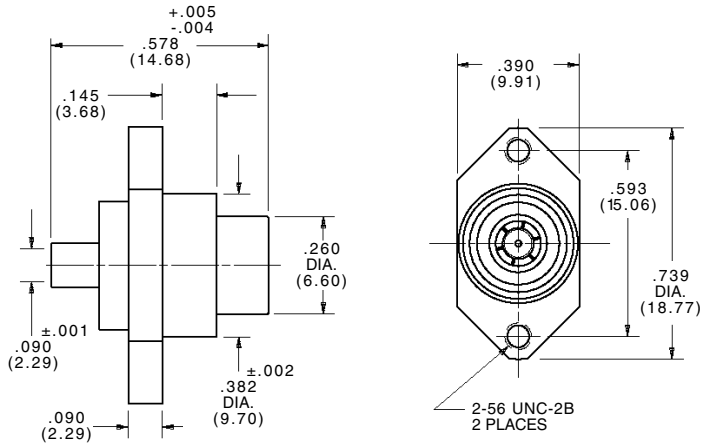
Finish: Inner housing that is soldered to cable is gold plated. Outer housing is passivated stainless steel.
Refer to Recommended Mounting Hole Detail N in Appendix A.



Flange Mount Cable Plug • Floating Rear Mount

Cable	RG-405/U (.085)	RG-402/U (.141)
Part Number	SF8903-6001	SF8901-6003

Flange shroud will rotate a full 360° for optimum alignment prior to mounting.
Finish: Inner housing that is soldered to cable is gold plated. Outer housing is passivated stainless steel.
Refer to Recommended Mounting Hole Detail B in Appendix A.



Flange Mount Right Angle Cable Plug
Floating Rear Mount

Cable	RG-402/U (.141)
Part Number	SF8958-6000

Flange shroud will rotate a full 360° for optimum alignment prior to mounting.
Finish: Inner housing that is soldered to cable is gold plated. Outer housing is passivated stainless steel.
Refer to Recommended Mounting Hole Detail B in Appendix A.

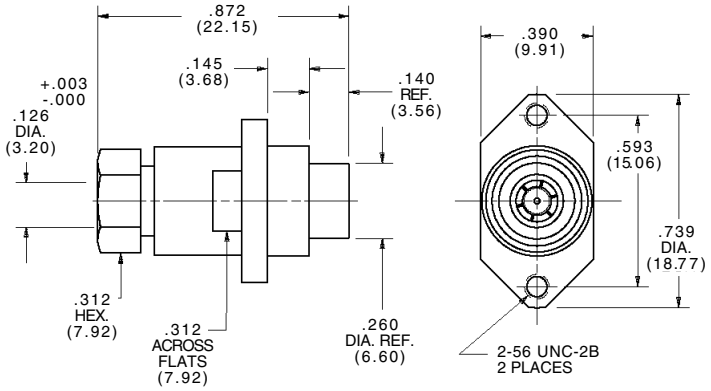
Flexible Cable • Clamp Attachment

Flange Mount Cable Plug • Floating Rear Mount

Cable	RD-316
Part Number	SF8961-6010

Flange shroud will rotate a full 360° for optimum alignment prior to mounting.
Finish: Passivated stainless steel.
Refer to Recommended Mounting Hole Detail B in Appendix A.



Flange Mount Cable Jack • Rear Mount

Cable	RD-316
Commercial Part No.	SF8931-6006
DSCC Drawing 91012ZSP-3	SF8931-6005

Finish: Passivated stainless steel.
Refer to Recommended Mounting Hole Detail N in Appendix A.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits,General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
