

## MPF — Metallized Polypropylene, Oil Filled Motor Run

Flat Oval Style

Round Style

Metallized polypropylene film dielectric capacitors offer a new option for AC applications. All devices have metal cases and four prong quick disconnect terminals.\* These capacitors pack the same capacitance and voltage capabilities of a conventional paper capacitor into a smaller case of considerably lighter weight. In addition, these parts have extremely low dissipation factors. They offer high reliability and long life and meet EIA Standard RS-456 characteristic "E". Allow 1/2" clearance above the terminals on fluid filled capacitors for interrupter operation.
