

US232 User Manual and Installation Guide

Introduction

The US232 evaluation cable can be used for testing the functionality of the FT8U232AM USB UART device and drivers prior to design-in. The electronics are housed in an attractive translucent blue enclosure with a matching 1m clear translucent cable. The US232 evaluation cable includes a Drivers and Utilities CD complete with WHQL certified VCP drivers for Windows XP, installation guides and the FTDI Product Data CD, which contains an off-line version of the data sheets, schematics and application notes from FTDI's web site.

Features

- Data transfer rates from 300 baud to 460,800 baud
- Internal 128 byte TX buffer and 384 byte RX buffer
- Standard DB-9/M RS232 connector
- Full Modem Support Signal Set
- Hardware assisted RTS/CTS , DSR/DTR and X-On/X-Off handshaking options
- Transmit and Receive LED Indicators
- Integral 1m USB Cable
- Works with USB 1.1 and USB 2.0 Host Controllers
- Full Speed USB data transfer rates
- USB – No IRQ or DMA resources required
- Remote Wakeup Capable
- Uses FTDI's FT8U232AM USB UART i.c.
- Powered from USB – no external power adapter required
- Windows '98 / ME / 2000 / XP drivers
- MAC OS-8, OS-9 and OS-X drivers
- Drivers included in Linux release 2.40 and greater

Application Areas

- Modems
- ISDN Terminal Adapters
- Serial PDA Interfacing
- Digital Cameras
- Smart Card Readers
- Terminals
- Serial Printers
- Serial Point of Sale (P.O.S.) devices
- Industrial Control Devices
- RS232 Peripheral Upgrades

Installation Instructions (P.C.)

Before plugging the adapter into the PC's USB port, please insert the US232 Driver and Utility CD into the CD drive of the PC. The PC will then display a menu (pictured above) showing the installation guides for the different versions of Windows. These guides are written in HTML and will display on the internet browser of your PC. We recommend that you review the installation guide for your versions of Windows prior to proceeding.

Plug the adapter into a USB (or USB hub) port on your PC and follow the procedure outlined in the installation guide. Installation usually only takes a few seconds if you are already familiar with the procedure. Should you wish to uninstall the drivers at a later date, please consult the uninstall guide on the CD which explains the correct procedure. For your convenience, the US232 CD also includes installable versions of WINZIP 8.0 and Adobe Acrobat Reader 5.0 should you not already have these on your system. Also included is the FTDI Product Data CD which contains data sheets, application notes and schematics for FTDI's USB UART and USB FIFO USB devices. For the most up to date information, visit FTDI's web site – a convenient button is provided to launch your Internet browser and take you directly to the web site.

Installation Instructions (MAC / Linux)

MAC drivers should be downloaded from the "Drivers and Utilities" page of the FTDI web site. Instructions on installation can be found there. Linux systems with an O.S. version of 4.20 and higher already have the driver included with the O.S. – no installation is required – just plug the device into the PC.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
