

## Description

The AL5809 is a constant current linear LED driver and provides a cost-effective two pin solution. It has an excellent temperature stability of 20 ppm/°C and current accuracy  $\pm 5\%$  regulated over a wide voltage and temperature range. The AL5809 comes in various fixed output current versions removing the need for external current setting resistors creating a simple solution for the linear driving of LEDs. It supports both the high-side and low-side driving of LED chains.

The AL5809 turns on immediately and can swing from 2.5V up to 60V enabling drive long LED chains. The floating ground, 60V voltage rating between input and output pins designed to withstand the high peak voltage incurred in offline applications.

The AL5809 is available in thermally robust package POWERDI-123 or SOD-123 package.

## Features

- Robust power package up to 1.2W for POWERDI-123
- -40°C to +125°C temperature range
- $\pm 5\%$  LED current tolerance over temperature
- (15mA, 20mA, 30mA, 40mA, 50mA, 60mA, 90mA, 120mA, and 150mA) available in POWERDI-123 package
- (15mA, 20mA, 30mA, 40mA and 50mA) available in SOD-123 package, and other current options available by request
- Constant current with low temperature drift and high power supply rejection ratio
- 2.5V to 60V operating voltage between two terminals.
- Available in PowerDi-123 and SOD-123 in **“Green” Molding Compound (No Br, Sb) (Note 1) with Lead-Free Finish/RoHS Compliant (Notes 2 & 3)**

Notes: 1. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.  
2. No purposely added lead. Fully compliant EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2).  
3. See <http://www.diodes.com> for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.

## Pin Assignments

## Applications

- Offline LED Lamps
- LED Power Supplies
- White Goods
- LED Signs
- Instrumentation Illumination

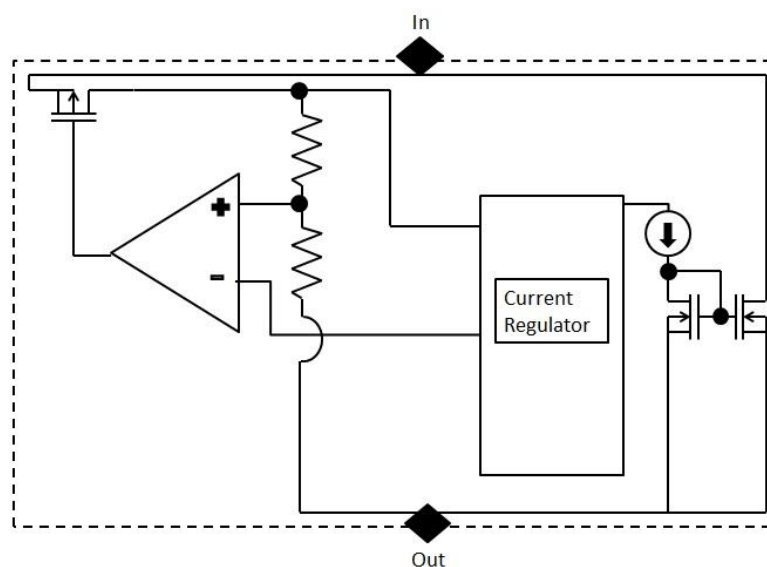

## Typical Applications Circuit

## Pin Descriptions

Pin Name	Pin Number (PowerDi-123)	Function
In	1	LED current input terminal. For low side LED string application, connect the LED cathode terminal to the "In" terminal. For high side LED string application, connect the LED anode terminal to the "Out" terminal.
Out	2	LED Current Output terminal. For low side LED string application, connect the LED anode terminal to the "Out" terminal. For high side LED string application, connect the LED cathode terminal to the "Out" terminal.

## Functional Block Diagram

## Absolute Maximum Ratings

Symbol	Parameters	Ratings	Unit
$V_{In/Out}$	"In" Voltage Relative to "Out" Pin	80	V
$I_{In/Out}$	LED Current from "In" to "Out"	180	mA
ESD HBM	Human Body Model ESD Protection	4	kV
ESD MM	Machine Model ESD Protection	400	V
$T_J$	Operating Junction Temperature	-40 to +175	°C
$T_{ST}$	Storage Temperature	-55 to +150	°C

Caution: Stresses greater than the 'Absolute Maximum Ratings' specified above, may cause permanent damage to the device. These are stress ratings only; functional operation of the device at these or any other conditions exceeding those indicated in this specification is not implied. Device reliability may be affected by exposure to absolute maximum rating conditions for extended periods of time.

Semiconductor devices are ESD sensitive and may be damaged by exposure to ESD events. Suitable ESD precautions should be taken when handling and transporting these devices.

## Package Thermal Data

Package	$\theta_{JC}$ Thermal Resistance Junction-to-Case	$\theta_{JA}$ Thermal Resistance Junction-to-Ambient	$P_{DIS}$ $T_A = +25^\circ\text{C}$ , $T_J = +125^\circ\text{C}$
PowerDi-123	27.15°C/W	148.61°C/W (Note 4)	0.68W
PowerDi-123	17.81°C/W	81.39°C/W (Note 5)	1.24W
SOD-123	69.56°C/W	278.42°C/W (Note 6)	0.36W

Notes: 4. Test condition for PowerDi-123: Device mounted on 25.4mm x 25.4mm FR-4 PCB (10mm x 10mm 1oz copper, minimum recommended pad layout on top layer and thermal vias to bottom layer ground plane). For better thermal performance, larger copper pad for heatsink is needed.  
 5. When mounted on 50.8mm x 50.8mm GETEK PCB with 25.4mm x 25.4mm copper pads.  
 6. Test condition for SOD-123: Device mounted on FR-4 PCB with 50.8mm x 50.8mm 2oz copper, minimum recommended pad layout on top layer and thermal vias to bottom layer with maximum area ground plane. For better thermal performance, larger copper pad for heatsink is needed.

## Recommended Operating Conditions

Symbol	Parameter	Min	Max	Unit
$V_{InOut}$	"In" Voltage Range Relative to "Out" Pin	2.5	60	V
$I_{InOut}$	LED Current (Note 7)	15	150	mA
$T_A$	Operating Ambient Temperature Range (Note 8)	-40	+125	°C

Notes: 7. The LED operating current is determined by the AL5809 current option index XXX, AL5809-XXXS/P1-7.  
 8. The Maximum LED current is also limited by ambient temperature and power dissipation such that junction temperature should be kept less than or equal to +125°C.

## Electrical Characteristics ( $V_{InOut} = 3.5\text{V}$ ) (Note 9)

Symbol	Parameter	Conditions	Min	Typ	Max	Unit
$V_{InOut}$	In-Out Supply Voltage	$T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	2.5	—	60	V
$I_{InOut}$	$I_{InOut}$ Current Accuracy (±5% for over temperature)	AL5809-15S1-7 AL5809-15P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	14.25	15	15.75	mA
		AL5809-20S1-7 AL5809-20P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	19	20	21	
		AL5809-30S1-7 AL5809-30P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	28.5	30	31.5	
		AL5809-40S1-7 AL5809-40P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	38	40	42	
		AL5809-50S1-7 AL5809-50P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	47.5	50	52.5	
		AL5809-60P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	57	60	63	
		AL5809-90P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	85.5	90	94.5	
		AL5809P-1201-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	114	120	126	
		AL5809-150P1-7 $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	142.5	150	157.5	
$I_{LINE}$	$I_{InOut}$ Current Line Regulation	$V_{InOut} = 2.5\text{V}$ to $60\text{V}$ (Note 10) $T_A = +25^\circ\text{C}$	—	1	—	%/V
$V_{MIN}$	Minimum Power Up Voltage	Increase $V_{InOut}$ (Note 11) $T_A = -40^\circ\text{C}$ to $+125^\circ\text{C}$	1	1.5	2	V
$T_{SHDN}$	Thermal Shutdown	—	—	145	—	°C
$T_{HYS}$	Thermal Shutdown Hysteresis	—	—	30	—	°C

Notes: 9. All voltages unless otherwise stated are measured with respect to OUT pin.  
 10. Measure the percentage degree of LED current variation when  $V_{InOut}$  varies from 2.5V to 60V for each current option.  
 11. Apply the power linearly to the chip until the device starts to turn on.

## Application Information

### Description

The AL5809 is a constant current linear LED driver and can be placed in series with LEDs as a High Side or a Low Side constant current regulator. The AL5809 offers various current settings from 15mA up to 150mA and different current settings available upon request (contact: Diodes local sale office at <http://www.diodes.com>).

### Simple LED String

The AL5809 can be placed in series with LEDs as a Low Side/High Side constant current regulator. The number of LEDs can vary from one to as many as supported by the input supply voltage. The designer needs to calculate the maximum voltage between In and Out by taking the maximum input voltage less the voltage across the LED string (Figures 1 and 2).

**Figure 1 Low Side LED String Tapping**

**Figure 2 High Side LED String Tapping**

The AL5809 can also be used on the high side of the LEDs, see Figure 2. The minimum system input voltage can be calculated by:

$$V_{IN(min)} = V_{LED\_CHAIN} + 2.5V \quad \text{Where } V_{LED\_CHAIN} \text{ is the LED chain voltage.}$$

The LED current can be increased by connecting two or more AL5809 in parallel shown in Figure 3.

**Figure 3 Higher LED current by parallel configuration of AL5809**

### PWM Dimming

The AL5809 can be used to provide LED current dimming driving the Out pin via the MOSFET switch to ground (Figure 4). The Out pin current is then effectively switched on and off causing the LED current to turn on and off.

**LIFE SUPPORT**

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
