

Push-Pull connectors

Introduction

This catalog presents the push-pull connectors ranges for industrial applications.

These products are particularly suitable for high reliability and high quality applications where a simple yet fast method to connect/disconnect is required. Also suitable for high endurance and ease of operation in very limited spaces. The aesthetics of the product allows for perfect integration on front panel equipments.

SOURIAU offers 3 main series of metallic circular connectors :

- JBX series : basic push-pull series for signal transmission
- JKX series : environmental version of the JBX series sealed to IP68
- JAX series : complementary range including coaxial contact layouts.

Push-pull locking system

The locking of the plug into the receptacle is achieved by a simple axial push on the outer shell.

Connection cannot be broken by pulling the cable or any other parts of the plug than the outer shell.

To unmate the plug from the receptacle, just pull axially the outer shell.

JBX Series

Key features

- Mechanically keyed : ensures correct polarisation and alignment.
- Contact layouts from 2 to 30 contacts.
- Wire gauges range from 30 AWG to 12 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

User advantages

Blister packaging

6-collet cluster

Allows a wide range of cable diameter applications for a single connector.
Reduces inventory variations

Removable contacts

Available crimp versions allow easier wiring and maintenance.

Part number system

Basic series	JBX	FD	1	G	05	M	C	S	D	S	M
Shell type	FD-FC-ER-EA-SR-PC-ED-EP-EZ										
Shell size	00 - 0 - 1 - 2 - 3										
Keying	G - J - A - B & customs are available										
Contact layout	02 ----- 30										
Contact type	M : pin F : socket										
Contact termination	C : crimp ; S : solder ; P* : straight PCB tails ; Q* : 90° PCB tails ; W : 0.7 mm clipped solder										
Material & surface plating	S : Outer shell in brass alloy with chrome over nickel										
	N : Outer shell in brass alloy with black plating										
	D : Obligatory suffix										
	S : Insulator in PPS P : insulator in PEEK										
Options	M : Connector with backnut for protective boot - Protective boot to order separately page 13 R : Red dot (possible for FD, FC, PC, SR, ER, ED, EZ only)										

* For receptacles with female contacts only

JBX Series

Keying

• Keying angles

JBX Series are mechanically keyed to ensure correct alignment of the inserts before the contacts mate.

«G» : standard keying

«J» : standard reverse gender keying ; plugs with socket contacts, receptacles with pin contacts.

*G & J are standard keying, but all keying configurations can use standard or reverse gender.

		30	S	C	P		0.7	26	26	3.5	800	400/260

 Inserts with fixed contacts (non removable contacts).

* For receptacles with female contacts.

Note : Contacts are numbered counter clock wise in the plug and clock wise in the receptacle.

• Voltage Test Procedure

- **The testing voltage** corresponds to the maximum voltage the connector is able to withstand in normal climatic conditions. The value is about 75% of the electrical breakdown voltage. The testing voltage level can be reached several times in connectors life, but never applied for a continuous duration.
- **The working voltage** corresponds to the maximum voltage the connector is able to withstand continuously during its life time, in real environmental conditions, even with high temperature. The value is around 1/3 of the testing voltage.

• Maximum current rating

- This indicated maximum current rating corresponds to the maximum current that can be continuously applied to the connector mated pair, in normal climatic conditions.

Remark : If the current is applied on only one contact of the layout, then an increased current value can be achieved over a long duration.

JBX Series

Options

• Protective boot

Part number	Shell size	Dimensions			
		Ø A	L	Ø Câble	
				min	Max.
JBX 00 MPN	00	1.5	15	1	3.5
JBX 0 MP*	0	2.2	20	1.5	5.5
JBX 1 MP*	1	2.6	25	2	7.5
JBX 2 MP*	2	4	30	3.5	9.7
JBX 3 MP*	3	5	35	4.9	12

* Color code / In size 00, available only in black

Color code	Colors
A	blue
B	white
G	grey
J	yellow
M	brown
N	black
R	red
V	green
O	orange

Material :

ELASTOLLAN (PUR)

Working temperature :

- 40°C ; + 80°C
- 40°F ; + 176°F

Parts that require a protective boot need to be ordered with an M suffix, see page 5. Protective boots are ordered separately.

With each JBX connector, one protective boot can accept multiple cable diameters thus the end-user can use various cable diameters without the need of multiple part numbers.

• Receptacle caps : an effective protection against dust

Part number	Ø
JBX BR0	12 mm
JBX BR1	14 mm
JBX BR2	17 mm
JBX BR3	20 mm

Wiring and assembly instructions :

STRAIGHT PLUG

- **Connector preparation**

- 1 - Select the proper collet. (see page 19)
- 2 - Slide the protective boot ③ the backnut ② and the collet ① over the cable. Strip end of cable (see pg. 17).
- 3 - If a shielded cable is used fold the braid back over the collet.

- **Contacts wiring : crimp contacts**

- 1 - Select the proper crimping tool and locator. (see page 48)
- 2 - Adjust the crimping tool based on wire size "AWG". (See wire size and crimp tool settings on the back of the locator)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

- **Contacts wiring : solder contacts**

Fixed solder contacts 0.5 mm and 0.7 mm	Removable solder contacts from 0.9 mm to 2 mm
1 - Insert wire into solder cup and solder.	1 - Insert wire into solder cup and solder. 2 - Insert contact into the insulator until the clip is fully seated and cannot be removed.

- **Connector assembly**

- 1 - Position 2 half bushings ⑥ on either side of the insulator.
- 2 - Confirm that the key on the insulator ⑤ appears through the window in the one half bushing.
- 3 - Align the key slot on the collet with the keys on the half bushings.
- 4 - Insure the cable shield is still folded back and under the collet.
- 5 - Insert the insulator subassembly ① ④ ⑤ & ⑥ into the connector housing ⑦.
- 6 - Make sure the window on the half bushing ⑥ is aligned with the key way on the connector housing ⑦.
- 7 - Apply thread lock to back nut ②.
- 8 - Attach the back nut to the connector housing ⑦
- 9 - Use the correct size wrench, see page 19.
- 10 - Place the wrenches on the flats A and B. Tighten the back nut ② per the torque spec on page 19.
- 11 - Install the protective boot if applicable.

JBX Series

Wiring and assembly instructions : 90° ELBOW PLUG

• Connector preparation

- 1 - Select the proper collet (see page 19).
- 2 - Slide the protective boot ④, the backnut ③, the collet ② and the elbow outlet ① over the cable. Strip end of cable (see pg. 17).
- 3 - If a shielded cable is used, fold the braid back over the collet ②.
- 4 - Align the keys in the elbow outlet ① with the key slot in the collet.
- 5 - Apply thread lock to the backnut ③.
- 6 - Install the back nut ③ and tighten until it bottoms.

• Contacts wiring : crimp contacts

- 1 - Select the proper crimping tool and locator. (see page 48)
- 2 - Adjust the crimping tool based on wire size "AWG". (See wire size and crimp tool settings on the back of the locator)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

• Contacts wiring : solder contacts

Fixed solder contacts 0.5 mm and 0.7 mm	Removable solder contacts from 0.9 mm to 2 mm
1 - Insert wire into solder cup and solder.	1 - Insert wire into solder cup and solder. 2 - Insert contact into the insulator until the clip is fully seated and cannot be removed.

• Connector assembly : 90 degree plug

- 1 - Position the ring ⑦ over the insulator.
- 2 - Align the key on the insulator ⑤ with the key way on the spacer ⑧ and insert the insulator into the spacer.
- 3 - Insert the insulator sub-assembly into the connector housing ⑨ insuring the flats on the elbow outlet ① are facing the retaining nut ⑩.
- 4 - Apply thread lock to retaining nut ⑩.
- 5 - Tighten the retaining nut ⑩ to the recommended torque on page 19.

JBX Series

Wiring and assembly instructions

• Collet selection according to cable diameters

4 or 6 collets per shell size are supplied to allow the use of a wide range of cable diameters for each connector. The cable diameters given on this chart are the minimum and maximum diameters of cable jacket.

Collet number	Cable diameter				
	Shell size 00	Shell size 0	Shell size 1	Shell size 2	Shell size 3
1	1.1 - 1.9	1.5 - 2.5	2.0 - 2.5	3.5 - 4.7	4.9 - 6
2	2 - 2.8	2.6 - 3.5	2.6 - 3.5	4.8 - 5.7	6.1 - 7.2
3	2.9 - 3.5	3.6 - 4.5	3.6 - 4.5	5.8 - 6.7	7.3 - 8.4
4	-	4.6 - 5.5	4.6 - 5.5	6.8 - 7.7	8.5 - 9.6
5	-	-	5.6 - 6.6	7.8 - 8.7	9.7 - 10.8
6	-	-	6.7 - 7.5	8.8 - 9.7	10.9 - 12.0

*Cable jacket must be inserted at least halfway through the collet.

Metal collets are available as an option in size 0, 1, 2, & 3.

• Coupling torques

Tools (jaw dimensions)	7 x 0.5	9 x 0.6	12 x 1	15 x 1	18 x 1	Advised torques* in Nm				
Size	00	0	1	2	3	00	0	1	2	3
	7	11	14	17	21	0.5	0.7	1.3	1.7	2
	6	8	10	13	15	0.7	0.8	1	1.5	2
	6	9	11	14	16	0.7	0.8	1	1.5	2
	-	10	12	15	17	-	0.4 to 0.5		0.5 to 0.7	
	-	10	13	17	20	0.5	0.7	1.3	1.7	2
	-	9	13	15	-	-	-	-	-	-

Torque values are the maximum allowable for each connector size.

Torque values will vary due to the type and size of the cable used

*Apply thread lock to back nut prior to assembly.

Note : All the tooling numbers refer to the drawings pages 7 and 8.

• Shielding

Tested according to MIL-STD 1344 A, method 3007

Metal collet available for all sizes

Discreet application based on cable diameter.

Shell size	Electrical continuity (mΩ)
00	4.5
0	4
1	3
2	2.5
3	2.5

JAX Series

Key features

- Hermaphroditic insert : prevents mismatings.
- Multipin connectors : contact layouts from 1 to 14.
- Wire gauges range from 26 AWG to 16 AWG.
- High contact density in a small space.
- Coaxial contacts : 50 Ω and 75 Ω impedance.

User advantages

Large range of blind mate coaxial connectors

Part number system

Basic series	JAX	F	2	M3	D080	B

JAX Camac Series

These 2 pages describe the JAX Camac series, size 00. These connectors are often used on jumpers for delay lines in Nuclear Physics due to their size and simple handling in congested areas. For Nuclear Physics, our connectors meet the standard NIM-CAMAC*. Moreover, JAX coaxial connectors are suitable for many other industrial and scientific applications such as medical, microwave communications, pocket transmitters, input/output on electronic modules.

NIM-CAMAC* configuration (4 GHz - 50 Ω)

* NIM-CAMAC : Nuclear Instrumentation Module / Computer Automated Measurement and Control

JAX Series

Wiring and assembly instructions : MULTIPIN PLUGS SIZES 0, 1, 2, 3

• **Cable stripping** : see page 27

• **Connector preparation and contacts wiring**

1 - Slide the backnut and the collet onto the cable.

2 - Terminate the bucket contacts using solder method.

• **Connector assembly**

3 - For shielded cable : pull back the collet up to external sheath extremity.

4 - Comb out the screen and fold back over the collet end.

5 - Position two half bushes on the insert, taking care of a proper positioning of the key.

6 - Slide in the insert assembly into the plug (or the free receptacle) shell.

Note : the collet key may be properly set into shells key ways.

7 - Install the backnut and screw it.

JAX Series

Wiring and assembly instructions : COAXIAL PLUGS

• **Cable stripping** : see page 27

• **Connector assembly**

Note :

- Take care to align cone key inside the sub-assembly rear key way.
- The stripped core end may be visible inside pin contact front window.

Remark : For size 00, no cone existing : sub-assembly directly onto collet.

- 1 - Slide the backnut and the collet onto the cable.
- 2 - Position the intermediate cone in abutment on external sheath extremity
- 3 - Brush back the screen around the cone
- 4 - Pull back the collet onto the cone
- 5 - Position the rear insulator sub-assembly on the cone

- 6 - Solder inner core thru the pin window
- 7 - Set in place the front insulator, taking care of the key/keyway positioning between the two half insert sub-assembly

- 8 - Slide in the insert assembly into the plug (or free receptacle shells)
- 9 - Install the nut and screw it

Wiring and assembly instructions : SINGLE PIN PLUGS

• **Cable stripping** : see page 27

• **Connector assembly**

Monolithic insert is directly soldered onto the inner core.

JAX Camac Series

Wiring and assembly instructions : Crimp contact (NIM-CAMAC configuration)

• Wiring preparation

- 1 - Slide the protective boot and the crimping ferrule onto the cable

• Coaxial cable stripping

- 1 - Strip the coaxial cable according to the lengths given on the drawing

• Contact crimping

- 1 - Take the crimping tool P/N : JX2 W 1010 A9
- 2 - Crimp the contact

• Connector assembly

- 1 - Position the crimp contact then engage the insert cavity until it bottoms
- 2 - Fold the screen over the connector outlet
- 3 - Position the ferrule on the screen then crimp it

- 4 - Slide the protective boot and then position on the connector outershell

JKX Series

Key features

- Sealed IP 68 (mated connectors)
- Mechanically keyed : ensures correct polarization and alignment.
- Contact arrangements : from 2 to 10 contacts.
- Wire gauge range from 28 AWG to 14 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

User advantages

Temporary immersion IP 68

6-collet cluster

Allows a wide range of cable diameter applications for a single connector.
Reduces inventory variations.

Removable contacts

Crimp versions allow easier wiring and maintenance.

Part number system

• Watertightness design (mated connectors)

- ① : O'ring for sealing between receptacle and plug shell
- ② : O'ring for sealing between receptacle and panel
- ③ : O'ring for sealing between plug body and backshell
- ④ : seals to accomodate variety of cable diameters

JKX Series

Wiring and assembly instructions : STRAIGHT PLUG

- **Cable stripping** : see page 37

- **Connector preparation**

- 1 - Select the proper collet ④ and the cable seal ③ (see page 39).
- 2 - Slide protective boot ⑥, the backnut ⑤, the collet ④, the cable seal ③, the outershell ② and the taper seat ① onto the cable. Strip end of cable (see pg. 16)

- **Contacts wiring : crimp contacts**

- 1 - Select the proper crimping tool (see page 48)
- 2 - Adjust the crimping tool based on the wire size "AWG". (See wire size and crimp tool settings on the back of this locator.)
- 3 - Crimp the contacts ④ then insert the contact into the insulator until the clip is fully seated and cannot be removed.

- **Contacts wiring : solder contacts**

Fixed solder contacts 0.5 mm and 0.7 mm	Removable solder contacts from 0.9 mm to 1.3 mm
1 - Insert wire into solder cup and solder	1 - Insert wire into solder cup and solder 2 - Insert the contact into the insulator until the clip is fully seated and cannot be removed.

- **Connector assembly**

- 1 - In case of shielded cable, comb out the shield and fold back over the taper seat ①.
- 2 - Position 2 half bushes ⑨, making sure that the insert key appears through the windows of one bush.
- 3 - Position the taper seat ① on the half bushes ⑨.
- 4 - Position all the sub-assembly in connector housing ⑩, making sure to keep the sub-assembly well aligned.
- 5 - Screw the outershell ② following the torque values on page 39. Install the cable seal ③ and the collet ④ into the outershell ② then screw the backnut ⑤ till bottoming. Use 2 wrenches well positioned on the flats A and B. Place a wrench to grip flats B, use the other wrench to tighten the backnut at the flats A following the torque values on page 39.
- 6 - Install the protective boot ⑥ if applicable.

JKX Series

Wiring and assembly instructions

• Collets selection according to cable diameters

3 or 5 collets per shell size allow a wide range of cable diameters for a single connector. Cable out diameters are for information only, since values will change with each cable construction.

Collet number	Cable diameter			
	Shell size 0	Size 0, option G	Shell size 1	Size 1, option G
1	1.5 - 2.5	-	2 - 2.5	-
2	2.6 - 3.5	-	2.6 - 3.5	-
3	3.6 - 4.5	-	3.6 - 4.5	6.1 - 6.7
4	-	4.6 - 5.5	4.6 - 5.5	6.8 - 7.7
5	-	5.6 - 6	5.6 - 6	7.8 - 8

Collet number 4 in shell size 0 and collet number 6 in shell size 1 are not used.

• Cable seal selections according to cable size Discreet application based on cable diameter

Cable gland Ø A	Cable diameter			
	Shell size 0	Size 0, option G	Shell size 1	Size 1, option G
2	1.5 - 2.9			
3.5	3 - 4.5			
2.5			2 - 3.4	-
4		4.6 - 4.9	3.5 - 4.9	-
5.5		5 - 6	5 - 6	6.1 - 6.4
7				6.5 - 8

• Shielding

Tested according to MIL-STD 1344 A, method 3007

Shell size	Electrical continuity (mΩ)
0	4
1	3

• Coupling torques

Advised torque* in Nm				
Size mm	0	0 (option G)	1	1 (option G)
	1.6	/	1.8	/
1	1.5	2	2	2.5
2	0.8	0.8	1	1

Torque values are the maximum allowable for each connector size. Torque values will vary due to the type and size of the cable used

*Apply thread lock to back nut prior to assembly.

Tool dimensions

2	10	11	12	14

Tool numbers can be found on page 32

JBX Series sealed version size 2

Key features

- Sealed IP 67 (mated connectors)(FE, EC, SE, & PC)
- Watertight receptacles IP68 (HC & HH)
- Mechanically keyed : ensure correct polarisation and alignment.
- Contact arrangements : from 2 to 19 contacts.
- Wire gauge range from 26 AWG to 12 AWG.
- High contact density in a small space.
- Contact termination in either crimp, solder or PCB contacts.

User advantages

Wet environment IP67

6-collet cluster

Allows a wide range of cable diameter applications for a single connector.
Reduces inventory variations.

Removable contacts (EC, FE, SE & PE)

Crimp versions allow easier wiring and maintenance.

Part number system

Basic series	JBX	FE	2	G	12	M	C	S	D	S	R
Shell type	FE-HH-HC-EC-PE-SE										
Shell size	2										
Keying	G										
Contact layouts	02 ----- 19										
Contact type	M : pin F : socket (in relation with keying)										
Contact termination	C : crimp ; S : solder ; P* : straight PCB tails ; Q* : 90° PCB tails										
Material & surface plating	S : Outer shell in brass alloy with chrome over nickel										
	N : Outer shell in brass alloy with black plating (consult us)										
	D : Obligatory suffix										
	S : Obligatory suffix										
Option	R : FE, PE, HH, & HC N/A for EC & SE										

* For receptacles with female contacts only.

JBX Series sealed version size 2

Shell type

• Available sealed JBX, Size 2

• Dimensions

FE : Straight plug supplied with protective boot, sealed mated IP67.

EC : Double nut receptacle. Sealed mated IP67 not sealed unmated.

HC : Fixed receptacle, back panel mount. Sealed unmated IP68, not available in crimp, 4-position minimum.

SE : Cable clamp receptacle, sealed mated IP67, supplied with protective boot.

PE : Cable mounted supplied with protective boot sealed mated IP67.

JBX Series sealed version size 2

Keying

Only G keying is available in standard version (0° keying angle, plugs with pin contacts, receptacles with female contacts) for the different types of shells.

Contact layouts

• Multi contact inserts

Shell size	Male insulator viewed from wiring side	Contact layout	Available Contact types				Ø Contact	AWG		Max. current rating (A)*	Testing voltage (Vrms)*	Working voltage (Vdc / Vrms)*

		12	S	C	P	Q	0.7	26	22	7	1700	830/560
		16	S	C	P	Q	0.7	26	22	6	1500	730/500
		18	S	C	P		0.7	26	22	5.5	1400	660/460
		19	S	C	P		0.7	26	22	5	1400	660/460

Inserts with fixed contacts (non removable contacts).

* For EC and HC receptacles with female contacts only.

HH & HC fixed contacts only.

JBX Series sealed version size 2

Technical characteristics

The technical characteristics are the same as for the standard JBX series except the following ones:

• Material - Specific additional elements

Component	Material	Color	Working temperature	
Seals	Nitrile	O'ring seal = black	- 30°C ; + 250°C	- 58°F ; + 482°F
Protective boot	Elastollan (PUR)	Black	- 40°C ; + 80°C	- 40°F ; + 176°F

• Mechanical and climatics - Specific additional elements

Characteristics	Values	
Protection index	IP 67 (Splashproof - 1/2 hour under 1 m of water)	
Operating temperature	- 40°C ; + 80°C	- 40°F ; + 176°F

Options

- **Cap: Part-number = JBX BR2 022** : an efficient protection against water

Wiring and assembly instructions

• Panel cutout

The panel cutout is the same as for the JBX size 2 shells except for the HC.

• Operation to add during the plug assembly:

Deposit of watertight thread glue between the backnut (② on the drawing p17) and the connection shell (⑦ on the drawing p17).
Advised glue = Loctite 542.

• Sealed Panel cutout

Push-Pull connectors

Accessories JAX - JBX

• Insulating washer

Part number	Shell size	Ø A	B	L	M	N	T	E
JBX 00 RIN	00	10	8.8	1.8	1	0.8	8	4.4

Examples of custom designs derivated from standard connectors lines

- **Watertight receptacles**

- **JBX series:**

Custom watertight receptacles designed to customer requirements

- **Black finish plating**

- **JBX and JKC series, black chrome plating**

Applications: Military radiocommunication

Push-Pull connectors

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
