

Blackfin Low Power Imaging Platform (BLIP)

A Revolutionary Advanced Occupancy Sensing Solution

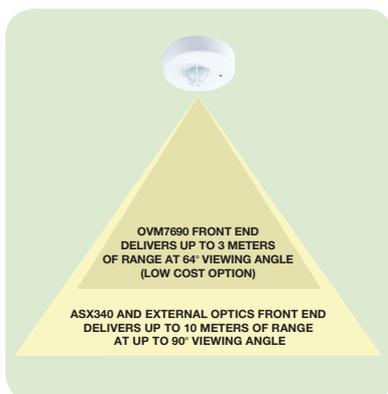

Overview

Analog Devices has developed a low cost, low power embedded computer vision platform targeting a vast array of real-time sensing applications. The Blackfin® Low Power Imaging Platform (BLIP) leverages the latest entry within the industry-leading, low power Blackfin processor family as well as Analog Devices' optimized software library deliverables. This solution offers end equipment manufacturers an out of the box form factor development platform with multiple functional profiles covering intelligent motion sensing, people counting, vehicle detection, and face detection deployable in both indoor and outdoor use cases. The BLIP system includes an intuitive configuration GUI and enables real-time analysis of captured video, as well as video output/display through an on-board USB port, making it a highly valuable tool for product development. Additionally, the associated documentation package is well positioned to help customers accelerate their time to market.

Target Applications Include:

- Indoor/outdoor lighting control
- HVAC system control
- Access control systems
- Premise monitoring systems
- In-vehicle occupancy detection
- Logistics/retail analytics

BLIP Deployment Model

ADI and our partners can facilitate an application specific/custom BLIP implementation.

Video Occupancy Sensor Module

The Analog Devices BLIP hardware platform is delivered with a preloaded occupancy software module that has been optimized to detect the presence and behavior of humans or vehicles within indoor and outdoor environments. This advanced detection operation provides significantly improved performance compared to single pixel PIR sensor solutions targeting lighting control, climate control, and access control applications.

Blackfin Image Processing Toolbox

The Analog Devices video occupancy sensor software module and many other image analysis module deliverables are based upon the Blackfin image processing toolbox. This toolbox is a set of image processing primitives designed to enable faster development of complex image or video processing solutions for use on Blackfin processors. These primitive functions have been highly optimized to achieve the most efficient results possible on the Blackfin ADSP-BF5xx, ADSP-BF60x, and ADSP-BF70x families of devices. This toolbox library is MISRA-C compliant and also includes C reference code for the primitives and wrapper code layers for OpenCV like APIs.

Blackfin Low Power Imaging Platform Specifications and Details

Major Active System Components:

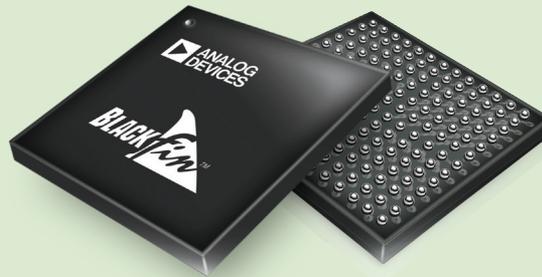

- Processor: ADSP-BF707BBCZ-4
- Imagers: OVM7692 (VGA SoC sensor with integrated lens), ASX-340 (VGA sensor)
- Memory: MT46H128M16LFB7 (256 MB)
- Flash: W25Q32 (32 MB)
- Power management: ADP2370, ADP2230, ADP220, ADP195, ADM6315
- Interface: FT232RQ

Specifications:

- Power consumption: <1 W
- Supply voltage: 3.2 V to 15 V
- Form factor: 2.5 inches × 3.5 inches

Board Support Package:

- Development tool chain: CrossCore® Embedded Studio™
- Application software: VOS 3.2.0 (indoor/outdoor)
- Documentation: user guide, PCB schematics

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
