

WFH Series

Aluminum Housed Wirewound Power

Ohmite's new flat core winding technology allows for wirewound heatsinkable resistors affording a very low profile, and superior thermal transfer characteristics when compared to conventional aluminum housed wirewound resistors.

Close mounting of heat sensitive components is possible due to only a slight rise of the temperature on the aluminum profile.

No heat sink compound is required because of large mounting surface.

FEATURES

- Solder lug, wire, and "Fast-on" amp terminations
- Multiple resistors in one profile possible
- Custom wire lengths available

SERIES SPECIFICATIONS

Type	Power Rating* (watts)	Resistance Range (Ω)
WFH90	90	0.22 Ω – 6.8K
WFH160	160	0.47 Ω -18K
WFH230	230	0.82 Ω -27K
WFH330	330	1 Ω - 39K

*at 40°C base plate temperature

CHARACTERISTICS

Power rating	90W-330W
Resistance tolerance	$\pm 5\%$, $\pm 10\%$
Temperature Coefficients	Normal: 50ppm - 150ppm Low ohmic values: 400ppm
Dielectric strength	2500 VAC peak
Working voltage	1200 VAC
Test voltage	6000 VAC
Lead wire	(wire terminal version only): XLPE, 600V, 125C, 18 AWG stranded
Insulation	Silicone Rubber & Mica. The Silicone is UL-recognised (UL 94 HB) to a working temperature of 220°C. Temperatures of up to 300°C can be endured for shorter periods. This may however cause an expansion of the silicone rubber with a possibility of reducing the dielectric strength.
Min. Storage & Operating Temp.	-40°C

Power Dissipation

This graph shows the maximum wattage rating for each possible resistor of standard size corresponding to the heat sink temperature. It is assumed that all resistors are equally loaded.

Thermal Resistances

Thermal Resistance ($^{\circ}\text{C}/\text{W}$) between different measuring points

	WFH90	WFH160	WFH230	WFH330
R_{TH1}	2	1	0.75	0.5
R_{TH2}	6.8	3.9	2.75	2
R_{TH3}	0.1	0.05	0.03	0.02
R_{TH4}	0.3	0.17	0.1	0.085

THIS PRODUCT IS DESIGNED FOR USE WITH PROPER HEATSINKING.

Maximum base plate temperature of the resistor must be monitored and kept within specified limits to establish the power rating. Best technique is to attach a thermocouple to the side of the base plate of the resistor. Temperature of plastic housing or heat sink cannot be used to establish rating of the resistor.

WFH Series

Aluminum Housed Wirewound Power

DESIGN INFORMATION

The following equations are applied in the dimensioning of the resistors at stationary load. If more information is required please consult Ohmite. It is assumed that the air around the resistors is stationary (worst case). See ohmite.com for more examples.

1. WFH is mounted on a heat sink:

A. The thermal resistance R_{TH} of the heat sink is known,

$$T = W_{MAX} \times (R_{TH4} + R_{TH})$$

Check that:

$$T_{MAX} = W_{MAX} \times (R_{TH} + R_{TH3} + R_{TH1}) + T_{AMB} < 220^{\circ}C$$

B. The Temperature of the Heat Sink is known,

$$T = W_{MAX} \times R_{TH4} + T_H$$

Check that:

$$T_{MAX} = W_{MAX} \times (R_{TH1} + R_{TH3}) + T_H < 220^{\circ}C$$

2. WFH is mounted without a heat sink:

Check that:

$$T_{MAX} = W_{MAX} \times (R_{TH1} + R_{TH2}) + T_{AMB} < 220^{\circ}C$$

Where:

W_{MAX} = Maximum required load in resistor

T_{MAX} = Maximum hot spot temperature requested in resistor ($T_{MAX} < 220^{\circ}C$)

The lower T_{MAX} the higher reliability and lifetime.

T_{AMB} = Ambient temperature

R_{TH} = Thermal resistance. Refer to table Thermal resistances

T_H = Heat sink temperature (chassis).

T = Temperature on top of the Aluminum profile.

DIMENSIONS

(mm)	Type	Watts	A	B	L ±2
	WFH90	90	70	39.7	53
	WFH160	160	140	80	123
	WFH230	230	210	2x 80	193
	WFH330	330	280	2x 100	263

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
