

Utilizing the latest Field Stop and Trench Gate technologies, these IGBT's have ultra low $V_{CE(ON)}$ and are ideal for low frequency applications that require absolute minimum conduction loss. Easy paralleling is a result of very tight parameter distribution and a slightly positive $V_{CE(ON)}$ temperature coefficient. A built-in gate resistor ensures extremely reliable operation, even in the event of a short circuit fault. Low gate charge simplifies gate drive design and minimizes losses.

- 1200V Field Stop
- Trench Gate: Low $V_{CE(ON)}$
- Easy Paralleling
- Integrated Gate Resistor: Low EMI, High Reliability
- RoHS Compliant

Applications: Welding, Inductive Heating, Solar Inverters, SMPS, Motor drives, UPS
