

## DESCRIPTION

Demonstration circuit 1105A is a high efficiency synchronous step-down DC/DC converter with output tracking featuring the LTC3822EDD-1 controller. The demo board is capable of providing 1.8V/8A from 2.75V to 4.5V input. Burst mode/Pulse skipping/Forced continuous operation is selectable. The constant frequency current mode architecture with MOSFET  $V_{DS}$  sensing eliminates the need for a sense resistor and improves efficiency. The maximum peak current sense threshold can easily be selected with the IPRG pin.

Switching frequency is internally set at 550KHz. The frequency can be adjusted using PLLLPF pin. Tying

PLLLPF pin to GND selects 300KHz operation; tying PLLLPF pin to  $V_{IN}$  selects 750KHz operation. The switching frequency can also be externally synchronized from 250KHz to 750KHz using SYNC terminal (JP1 should be selected for Sync).

The demo board has a tracking feature, allowing  $V_{out}$  to track an external voltage signal at TRACK terminal (JP2 selected for Track).

**Design files for this circuit board are available. Call the LTC factory.**

**Table 1. Performance Summary ( $T_A = 25^\circ\text{C}$ )**

PARAMETER	CONDITION	VALUE
Input Voltage Range		2.75V to 4.5V
$V_{OUT}$	$V_{IN} = 2.75\text{-}4.5\text{V}$ , $I_{OUT} = 0\text{A to } 8\text{A}$	1.8V $\pm 2\%$
Maximum load current $I_{OUT}$	$V_{IN} = 2.75\text{-}4.5\text{V}$ , $V_{OUT} = 1.8\text{V}$	8A
Typical Output Ripple Voltage	$V_{IN} = 3.3\text{V}$ , $I_{OUT} = 4\text{A}$ , $F_s = 550\text{KHz}$ (20MHz BW)	12mV <sub>P-P</sub>
Typical Switching Frequency	PLLLPF Pin Floating	550kHz

## QUICK START PROCEDURE

Demonstration circuit 1105A is easy to set up to evaluate the performance of the LTC3822-1. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below: (Initial jumper positions: JP1: PS; JP2: Soft Start)

**NOTE:** When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the  $V_{in}$  or  $V_{out}$  and GND terminals. See Figure 2 for proper scope probe technique.

1. With power off, connect the input power supply to +Vin (2.75V-4.5V) and GND (input return).
2. Connect the 1.8V load between  $V_{out}$  and GND (Initial load: 0 A).
3. Connect DVMs to the input and output.
4. Turn on the input power supply and check for the proper output voltage.  $V_{out}$  should be 1.8V $\pm 2\%$ .
5. Once the proper output voltage is established, adjust the load within the operating range and observe the

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
