The new TRI 15 is a high isolation, regulated 15 Watt DC/DC converter series which comes in a compact 2"x1" package. The core characteristic of the TRI 15 series is a sophisticated reinforced isolation system which is able to withstand high test voltages (8000 VDC for 1s and 5940 VDC for 60s) and working voltages (1000 VACrms). Complementing this isolation characteristic is a high Common Mode Transient Immunity of 15 kV/μs. The new design allows to fully integrate an EN 55032 class A filter and greatly reduces the no-load power consumption. High efficiencies up to 90% allow safe operation from -40°C to +65°C without derating and up to +85°C with derating. All models have a wide 2:1 input voltage range and precisely regulated, isolated output voltages. With the latest IT safety certifications (IEC/EN/UL 62368-1) the TRI 15 series is the perfect choice for many demanding applications in the industrial, transportation and instrumentation sectors.
