

Series 380, 53/RV4, 485

2 Watt, Conductive Plastic Potentiometer

Description

The Series 380 "Quiet One" is a 2-watt conductive plastic potentiometer offering superior dynamic noise and a long rotational life. And it's manufactured to MIL-R-94 specifications where applicable.

Our 53/RV4 is a dual-marked potentiometer with all the fine features of the Series 380 in a more economical package. And it's built in strict accordance with MIL-R-94.

Series 485 has all the exceptional features of the 380 with a bonus of ten times the rotational life. (Special order only.)

Features

- **Series 380**
1% dynamic noise
100,000 cycle life
Stainless-steel shaft
- **Series 53/RV4**
Economical
Wide range of values and tapers
Shaft and mounting seals available
- **Series 485**
1% dynamic noise
1 million cycle life
Available on special order only

Series 380, 53/RV4, 485, Electrical Specifications

Resistance Range

50 Ω to 5 Megohms, linear.

250 Ω to 2.5 Megohms, tapered.

485 series only, 100 Ω to 2.5 Megohm, linear.

Resistance Tolerance

Linear, up to 1 Megohm $\pm 10\%$, above 1 Megohm $\pm 20\%$.

Tapers, up to 500K Ω $\pm 10\%$; above 500K Ω $\pm 20\%$.

Power Rating (Watts)

2 watts maximum continuous power rating for linear taper, but voltage not to exceed rating. Full rating @ 70°C, derated linearly to zero watts at 120°C. Derate all non-linear tapers by multiplying wattage rating by 0.5. See Chart A, page 44.

Electrical Rotation

312° $\pm 3^\circ$ without switch; 333° $\pm 3^\circ$ with switch.

Effective Rotation

270°, -0°/ +10°

Tapers

Right or left-hand available.

See Chart B, page 45.

End Resistance

Linear units: 4 Ω maximum for total resistances up to 250K; 10 Ω for resistances 250K and higher.

Taper units: High end of element 1% of total resistance or 4 Ω whichever is greater; low end same as for linear units.

Dielectric Strength

1000 Vac for 60 seconds @ ATM pressure.

450 Vac for 60 seconds @ 3.4 in. Hg.

Working Voltage

500 Vdc across end terminals, but power not to exceed rating.

Resistance Temperature Characteristics

See Chart C, page 45.

Dynamic Noise

Linear single controls maximum initial noise level of 1% of total resistance. Measurement made using a constant current source and oscilloscope detection technique.

Static noise

See Chart D, page 45.

Linearity

$\pm 5\%$ independent — linear tapers only

Voltage Coefficient

.005%/Volt, maximum

Switch Characteristics

Rotary

See Chart E, page 47.

Mechanical Rotation

312° ±3° without switch; 333° ±3° with switch

Stop Torque Withstanding Strength

12 lb. in. minimum, single shaft

8 lb. in. minimum, concentric shaft

Torque Range

Single control 1 oz. in. to 4 oz. in., 2 oz. in. variation through mechanical rotation within a control.

Single control with shaft seal 1 oz. in. to 6 oz. in.

Single control with shaft locking feature and jam nut tightened to 10 lb. in. Starting torque is 30 oz. in.

Standard Bushing Lengths

Plain, 1/4 in. (6.35mm), 3/8 in. (9.53mm), 1/2 in. (12.7mm)

Panel Seal, 3/8 in. (9.53mm)

Shaft Locking, 1/2 in. (12.7mm)

Thread, 3/8 in. (9.53mm)-32 NEF-2A

Other bushings available on special order.

Standard Shafts (Single Control Only)

Standard diameter 1/4 in. (6.35mm). Standard lengths every 1/8 in. (3.18mm) from 3/8 in. (9.53mm) minimum to 5 in. (127 mm) maximum. 380, stainless steel.

53/RV4 and 485 brass, nickel-plated.

Available in round, slotted or flatted configurations. All shafts measured from mounting surface. Other shaft configurations available on special order.

Weight

Single .072 lbs. approximate

Hardware

Must be ordered separately.

(a) Hex mounting nut, 3/8 in. (9.53mm) x 32 -NEF-2A thread, 1/2 in. (12.7mm) across flats, 3/32 in. (2.38mm) thick.

(b) Internal tooth lockwasher, 11/16 in. (17.46mm) outer diameter. x .022 in. (0.56 mm) thick.

(c) Jam hex nut, 1/2 in. (12.7mm) across flats, 7/32 in. (5.56mm) thick, supplied on locking-type bushing.

Marking

Will appear on rear surface without switch. On periphery when switch is used. Unless otherwise specified, marking will consist of:

(a) Customer part number or Clarostat part number,

(b) EIA source and date code.

NOTE: SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

Operating Temperature Range

-55°C to +120°C

Rotational Life (Standard)

Series 380: Rotational life for linear control; 100,000 cycles for units up to and including 100,000Ω, change not to exceed 5% R; above 100,000Ω change not to exceed 10% R.

Series 53/RV4: All resistance values: 25,000 cycles.

Series 485: 10% maximum change in total resistance as a result of 1,500,000 shaft rotations life test under full load for resistance values 1K to 2.5 Megohms; 1,000,000 shaft rotations under full load for resistance values 100Ω to 1KΩ

Figure 1

Chart A

Figure 2

Chart B

Curve Standard

The "S" taper is linear, the change in resistance value being directly proportional to the degree of rotation. It can be used either as right-hand or left-hand taper.

The "Z" taper attains 10% resistance value at 50% of clockwise rotation (left-hand).

The reverse "Z" taper attains 10% resistance values at 50% of counter-clockwise rotation (right-hand).

For conformity and special output curves, consult factory.

Series 53 How to Order

Catalog Number	Description
53C1	2 in. (.50.5mm) round shaft FMS; 3/8 in. (9.52mm) long bushing with 3/8 in. (9.52mm) x 32-NEF-2A thread.
53C2	5/8" screwdriver slotted shaft FMS; with a 1/2 in. (.50.5mm) split locking bushing.
53C3	7/8 in (22.22mm) screwdriver slotted shaft FMS; 3/8 in. (9.52mm) long bushing with 3/8 in. (203.2mm) x 32-NEF 2A thread.
53C1SW	Unsealed version of 53C1 available for use with field assembled switches. Order as 53C1 SW see table 1 for switch ordering.
53C1-Z	Same as 53C1 but with Z taper (see chart B, page 45).
53C1-RZ	Same as 53C1 but with Reversed Z taper (see chart B, page 45).
D53C1	Dual ganged. Bushing and shaft same as 53C1.

Table 1
Switches for 53C1 SW only. Must be ordered separately on a made-to-order basis.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
