

Conforms to EN954-1, EN1088, EN60204-1  
UL and C-UL listed

## ■ Description

The MC-S Series is a tamper resistant non-contact safety interlock switch that operates with its own control unit. As a fully monitored dual channel system, a single MC-S Series switch and MC-S Series control units 1 or 2 combine to fulfill Category 3 requirements. Control Unit 6 with 2 to 6 MC-S switches fulfills Category 4 requirements for the 3 N/O outputs and Category 3 for the N/O delayed output.

The MC-S Series control units provide EDM (External Device Monitoring, also called MPCE monitoring) with an automatic or manual reset. This allows the MC-S Series control units to replace a safety relay in some applications.

The NEMA 6 encapsulated design of the MC-S Series switch makes it ideal for harsh environments.

The MC-S Series control units can be used with a large number of MC-S Series switches for applications with multiple guard doors. The MC-S6 control unit provides individual monitoring and LED indication for up to six MC-S Series switches. Mechanical switches and MC-S Series switches may be used together with a single MC-S Series control unit for applications requiring both non-contact and mechanical safety interlock switches.

safety interlock switches

# MC-S Series

## Compact Coded Magnetic Safety Interlock Switch and Control Unit

- Dual channel, fully monitored system; meets Category 3 when single MC-S Series switch and control unit are used; MC-S6 meets Category 4
- External Device Monitoring (EDM) with automatic or manual reset
- NEMA 6 switch enclosures in plastic or stainless steel with connector satisfy most application requirements
- Magnetically coded switches are tamper resistant to common magnets
- Misalignment tolerance of (5 and 9 mm) reduces nuisance tripping
- A large number of switches may be used with a MC-S Series control unit
- MC-S6 control unit provides individual monitoring and indication for up to 6 switches and a N/O delayed output
- Mechanical interlock switches may be used with a MC-S Series control
- MC-S Series controls may replace a safety relay in some applications
- Auxiliary contacts available for individual guard door monitoring on MC-S switches

Actual Size

Type 1 Sensor

Type 2 Sensor

Operation

Operating Principle

On presenting the actuator to the switch, the coded, high intensity magnetic field from the actuator causes the contacts to close. On removing the actuator (opening the door), the safety contacts open, isolating the machine.

Mounting Examples

Contact Arrangements

NOTE: ACTUATOR MUST NOT STRIKE SENSOR

Recommended gap between sensor and actuator.

Connector Configurations

MC-SS2 Stainless Steel

8-Pin Male, Micro DC, M12

MC-S3

4-Pin Male, Micro DC, M12

Universal Mounting Brackets can be used with this product. See page G241 for details.

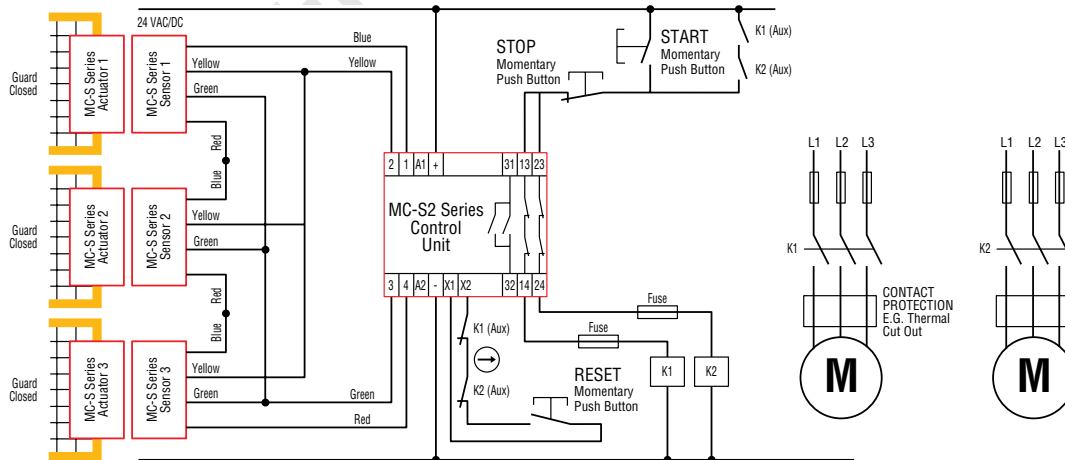

## ■ Applications

Typical applications are on sliding guard doors or swinging guard doors.

Single sensor and two contactors with manual reset and EDM (External Device Monitoring). Machine will start when guard is closed, auxiliary contacts at K1 and K2 are closed (i.e. both contactors are off), reset button is pressed and then start button is pressed.

Three sensors and two contactors with manual reset and EDM (External Device Monitoring). Machine will start when all guards are closed, reset button is pressed and then start button is pressed. NOTE: The use of multiple sensors connected to a single control unit is only suitable in applications where each guard door is always opened and then shut individually. Otherwise some single faults may not be detected and unintentional lockout reset may occur if two or more guard doors are open at the same time.

## ■ Specifications

Electrical	MC-S Series Control Units	MC-S Series Switches
<b>Power Supply:</b>	24 VAC/DC $\pm$ 10% - Control 1 24 VDC $\pm$ 10% or 24/110/220 VAC - Control 2 & 6	—
<b>Power Consumption:</b>	< 2 VA Control 1; < 4 VA - Control 2 & 6	—
<b>Safety Inputs:</b>	1 N/O + 1 N/C for controls 1 & 2 (x6 for Control 6)	—
<b>Max Input Resistance:</b>	Red/Blue - 200 $\Omega$ ; Green/Yellow - 150 $\Omega$	—
<b>Min. Approach Speed:</b>	Typically 10-17 mm/sec.	—
<b>Safety Contacts:</b>	—	1 N/C + 1 N/O
<b>Auxiliary Contacts:</b>	—	1 N/C or 1 N/O
<b>Auxiliary Contact Rating:</b>	—	100 mA, 24 VDC and 230 VAC
<b>Relay Outputs:</b>	1 N/O + 1 Semi Aux. - Control 1 2 N/O + 1 N/C Aux. - Control 2	Control 6 Delayed Output (0.6-30 s) 3 N/O + 1 N/O Delayed, 1 N/C Aux. - Control 6
<b>Auxiliary Contact of Controls:</b>	100 mA, 24 VDC and 230 VAC - Control 1 2 A, 24 VDC and 230 VAC - Control 2 and 6	—
<b>N/C Operating Distance:</b>	—	On = 5 mm; Off = 11 mm Type 1 and Type 3 On = 9 mm; Off = 12 mm Type 2 On = 10 mm; Off = 13 mm Type 2 stainless
<b>Max Switched AC:</b>	4 A/250 VAC	100 mA/230 VAC
<b>Max Switched DC:</b>	2 A/30 VDC	100 mA/24 VDC
<b>Min Switched Current/Voltage:</b>	10 mA/10 V AC/DC	—
<b>Impulse Withstand Voltage:</b>	2500 V	—
<b>Max Drop-Out Time:</b>	25 m/sec	—
<b>Max Output Fuse:</b>	5 A quick acting on AC, 3 A quick acting on DC (3 A quick acting on AC/DC control 6)	—
<b>Reset Mode:</b>	Automatic/Manual	—
<b>External Device Monitoring:</b>	N/C loop between x <sub>1</sub> and x <sub>2</sub>	—
<b>Mechanical</b>		
<b>Mounting:</b>	35 mm (1.38 in.) DIN Rail	4 x M4 screws, M18 x 1 mm pitch for MC-S3
<b>Case Material:</b>	Polycarbonate	ABS plastic - Type 1 & 2; nylon - Type 3; stainless steel - Type 2 stainless
<b>Max Wire Size:</b>	2 x 1 mm (20 AWG) stranded 2 x 1.5 mm (15 AWG) solid	Pre-wired cable to 10 m MC-S1, S2, Connector MC-SS2, MC-S3
<b>Weight:</b>	147 g (5.2 oz.) - Control 1, 590 g (21 oz.) - Control 2, 990 g (35 oz.) - Control 6	100 g (3.5 oz.) plastic, 600 g (1-lb. 5-oz.) steel
<b>Color:</b>	Red	Red or Stainless steel
<b>Indication:</b>	LED 1: Green = Output Closed LED 2: Red = Power On Controls 1 & 2 LED 2: Green = Power on Control 6	— —
<b>Mechanical Life:</b>	1 x 10 <sup>6</sup>	1 x 10 <sup>6</sup>
<b>Environmental</b>		
<b>Protection:</b>	IP40 (NEMA 1)	IP67 (NEMA 6); (IP68 for stainless)
<b>Operating Temperature:</b>	-10 to 55°C (14 to 131°F)	-10 to 55°C (14 to 131°F) Plastic -25 to 125°C (-13 to 257°F) Stainless
<b>Humidity:</b>	90% RH at 50°C (122°F)	90% RH at 50°C (122°F)
<b>Compliance</b>		
<b>Standards:</b>	EN954-1, EN1088, EN60204-1	
<b>Approvals/Listings:</b>	CE marked for all applicable directives, UL and C-UL	

Specifications are subject to change without notice.

Note: The safety contacts of the Omron STI switches are described as normally closed (N/C) i.e., with the guard closed, actuator in place, and the machine able to be started.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
