

MAX14676/MAX14676A

Wearable Charge Management Solution

General Description

The MAX14676/MAX14676A are battery-charge-management solutions ideal for low-power wearable applications. These devices include a linear battery-charger with a Smart Power Selector™, ModelGauge™ fuel gauge, and several power-optimized peripherals. They feature an ultra-low-power buck regulator with a quiescent current of 900nA (typical) and 74% efficiency with 10μA output.

The battery charger features Smart Power Selector operation, allowing operation with dead battery. It limits input current based on a register setting. If the charger power source is unable to supply the entire system load, the smart power control circuit will supplement the system load with current from the battery.

The MAX14676/MAX14676A embed a Maxim proprietary ModelGauge fuel gauge to provide an accurate estimate of the available capacity for rechargeable lithium batteries.

The MAX14676/MAX14676A include a synchronous high-efficiency step-down converter. The device features a fixed-frequency PWM mode for tighter regulation, and a burst mode for increased efficiency during light-load operation.

The MAX14676/MAX14676A have a boost regulator and three programmable current sinks that can be used to drive a variety of LED configurations. The boost converter is controlled independently from the current sinks, and they can be also used separately.

The MAX14676/MAX14676A feature a power switch controller that allows the device to be turned on and off by a pushbutton. This controller also provides a delayed reset signal and voltage sequencing.

These devices are available in a 42-bump, 0.5mm pitch, 3.497mm x 3.118mm wafer-level package (WLP).

Features and Benefits

- Extend System Use Time Between Battery Charging
 - 1.8V Low-I_Q 200mA Buck Regulator
 - 0.9μA (typ) Quiescent Current
 - Automatic Burst or Forced-PWM Modes
 - ModelGauge with Accurate State-of-Charge
- Easy-to-Implement Li+ Battery Charging
 - Smart Power Selector
 - 28V Tolerant Input
 - Thermistor Monitor
- Minimize Power-Management Footprint through High Integration
 - 3.2V Low-I_Q 100mA LDO
 - 2.0V Always-On 50μA LDO
 - +5V Safe Output LDO
 - 6.6V Low-I_Q 120μA Charge Pump
- Support a Wide Variety of Display Options
 - 5V to 17V Output Boost Converter
 - 3-Channel Adjustable High-Voltage Current Sinks
- Optimize System Control
 - Pushbutton to Enable Ultra-Low-Power Mode and Power-On Voltage Sequencing
 - I²C Control

Applications

- Wearable Electronics
- GPS Watches
- Fitness Monitors
- Portable Medical Devices

Typical Application Circuit

Ordering Information/Selector Guide

PART	BUCK	3.2V LDO	STAY ON BIT DEFAULT*	BUMP-PACKAGE
MAX14676 EW0+T	Forced On	Forced On	0	42 WLP
MAX14676A EW0+T	Forced On	Off (default)	1	42 WLP

+ Denotes lead(Pb)-free/RoHS compliant package.

T = Tape and reel.

Chip Information

PROCESS: BiCMOS

Package Information

For the latest package outline information and land patterns (footprints), go to www.maximintegrated.com/packages. Note that a "+", "#", or "-" in the package code indicates RoHS status only. Package drawings may show a different suffix character, but the drawing pertains to the package regardless of RoHS status.

PACKAGE TYPE	PACKAGE CODE	OUTLINE NO.	LAND PATTERN NO.
42 WLP	W423F3+1	21-0209	Refer to Application Note 1891

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits, General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
