R2A20152NS/SP

8-bit 2ch D/A Converter with Buffer Amplifiers for I²C BUS (Corresponds to Fast mode)

R03DS0013EJ0100
Rev.1.00
2011.09.05

Description

The R2A20152 is an integrated circuit semiconductor of CMOS structure with 2 channels of built in D/A converters with output buffer operational amplifiers. It is the characteristic improvement version of M62332.

The input interface is I²C Bus serial data method, and connects with a microcomputer with minimum wiring. It conforms FAST-MODE of I²C BUS Specifications.

The output circuit is composed of buffer operational amplifier with sync and source drive capacity of 1.0 mA or more, and it operates in the whole voltage range from VCC to ground.

Features

- Guarantee Differential nonlinearity error : +/-0.7LSB, Nonlinearity error : +/-1.0LSB
- Digital data transfer format: I²C BUS serial data method (Corresponds to Fast mode: 400kHz)
- Output buffer operational amplifier: It operates in the whole voltage range from VCC to ground.
- High output current drive capacity: +/-1.0 mA over
- Very small size SON-8 package

Application

Conversion from digital data to analog control data for home-use and industrial equipment.
Signal gain control or automatic adjustment of LCD-TV, PDP-TV, LCD-monitor, or etc.
Blurring correction control or various control of the interchangeable lens of digital camera.

Pin Description

Pin No.	Pin Name	Function
1	Ao1	8-bit resolution D-A converter output terminal (After power on, analog output of every channel is set in DAC data "00h")
2	Ao2	
3	N.C.	Not connected
4	N.C.	
5	GND	GND terminal
6	SDA	Serial data input terminal
7	SCL	Serial clock input terminal
8	Vcc	Power supply terminal

Absolute Maximum Ratings

Ta= 25deg, unless otherwise noted)

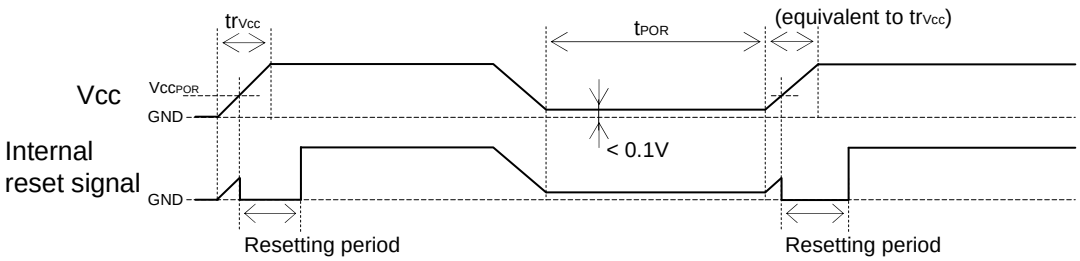
Item	Symbol	Condition	Ratings	Unit
Supply Voltage	Vcc		-0.3 to +6.5	V
Input Voltage	Vin		-0.3 to Vcc+0.3 < +6.5	V
Output Voltage	Vo		-0.3 to Vcc+0.3 < +6.5	V
Buffer amp. Output current	I_{AO}	Continuous	-2.0 to +2.0	mA
Power dissipation	Pd	Ta = +85deg	270(NS) / 272(SP)	mW
Thermal derating factor	K theta	Ta > +25deg	6.75(NS) / 6.8(SP)	mW/deg
Operating temperature	Topr		-30 to +85	deg
Storage temperature	Tstg		-40 to +125	deg

Electrical Characteristics

(Vcc= +5V +/-10%, GND=0V, Ta= -30 to +85deg, unless otherwise noted)

Item	Symbol	Test Condition	Ratings			Unit
			Min.	Typ.	Max.	
Supply voltage	Vcc		2.7	5.0	5.5	V
Supply current	Icc	CLK = 500kHz, I_{AO} = 0µA, DATA: 6Ah (at maximum current)	0	0.5	1.5	mA
		SDA = SCL = GND, I_{AO} = 0µA	0	0.3	1.0	mA
Rise time of supply voltage *1	tr_{Vcc}	Vcc = 0 to 2.7V	100	-	-	µs
Internal reset operating voltage *1	Vcc_{POR}	Vcc = 0 to 2.7V	-	1.5	1.9	V
Power supply restart interval (Power supply OFF → ON) *1	t_{POR}	Vcc < 0.1V	1	-	-	ms
Input leak current	I_{ILK}	V_{IN} = 0 to Vcc	-10	-	10	µA
Input low voltage	V_{IL}		0	-	0.2Vcc	V
Input high voltage	V_{IH}		0.8Vcc	-	Vcc	V
Hysteresis of Schmitt trigger input (SDA, SCL)	Vhys		0.5	0.8	-	V
Output low voltage (SDA)	V_{OL}	Isink =3mA	-	-	0.4	V
Pulse width of spike noise	t_{SP}		0	-	50	ns
Buffer amplifier output voltage range	V_{AO}	I_{AO} = 100µA	0.1	-	Vcc – 0.1	V
		I_{AO} = 500µA	0.2	-	Vcc – 0.2	
Buffer amplifier output Drive range	I_{AO}	Upper side saturation voltage = 0.3V, Lower side saturation voltage = 0.2V	-1.0	-	1.0	mA
Differential nonlinearity	S_{DL}	Vcc = 5.12V (20mV/LSB), without load (I_{AO} = 0µA)	-0.7	-	0.7	LSB
Nonlinearity	S_L		-1.0	-	1.0	LSB
Zero code error	S_{ZERO}		-2.0	-	2.0	LSB
Full scale error	S_{FULL}		-2.0	-	2.0	LSB
Output capacitate load	C_O		-	-	0.1	µF
Buffer amplifier output impedance	R_O		-	5.0	-	ohm

*1 : When power supply is turned on, internal circuit is initialized by power on reset circuit. But, if re-powered on quickly, initialize is not operate. So, keep the time period of re-powered on (t_{POR}).



I²C BUS Line Characteristics

Item	Symbol	STANDARD MODE		FAST MODE		Unit
		Min.	Max.	Min.	Max.	
SCL clock frequency	f_{SCL}	0	100	0	400	kHz
Time the bus must be free before a new transmission can start	t_{BUF}	4.7	-	1.3	-	µs
Hold time (repeated) START condition After this period, the first clock pulse is generated.	$t_{HD:STA}$	4.0	-	0.6	-	µs
LOW period of the SCL clock	t_{LOW}	4.7	-	1.3	-	µs
HIGH period of the SCL clock	t_{HIGH}	4.0	-	0.6	-	µs
Set-up time for a repeated START condition	$t_{SU:STA}$	4.7	-	0.6	-	µs
Data hold time	$t_{HD:DAT}$	0	3.45	0	0.9	µs
Data set-up time	$t_{SU:DAT}$	250	-	100	-	ns
Rise time of both SDA and SCL signals	t_R	-	1000	-	300	ns
Fall time of both SDA and SCL signals	t_F	-	300	-	300	ns
Set-up time for STOP condition	$t_{SU:STO}$	4.0	-	0.6	-	µs
Capacitive load of bus line	C_b	-	400	-	400	pF

Above values correspond with input level (V_{IH}min / V_{IL}max).

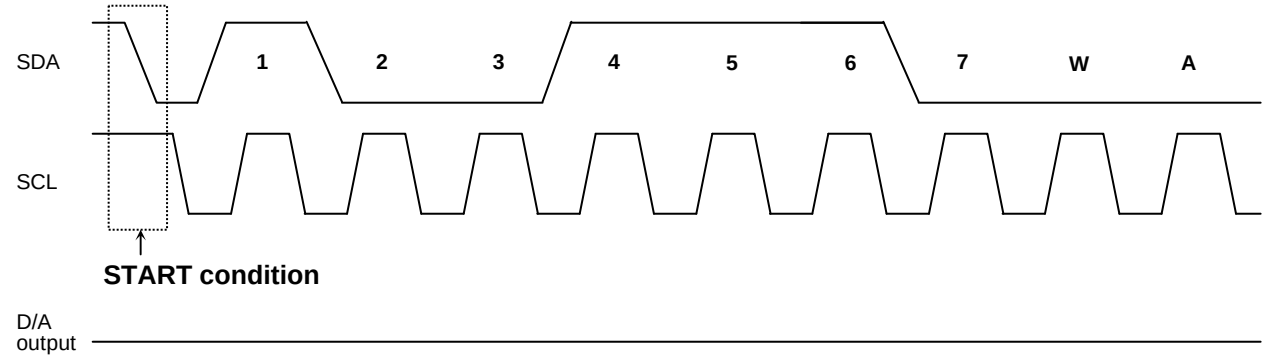
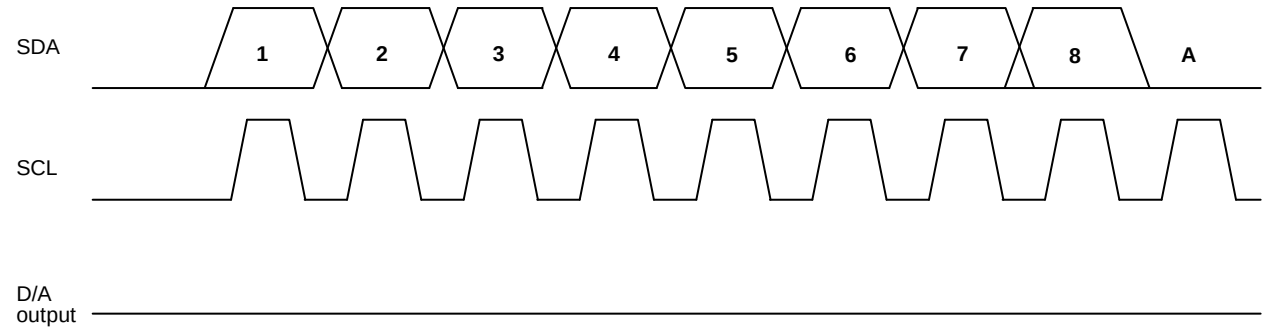
Data Timing Chart SCL and SDA (Model)

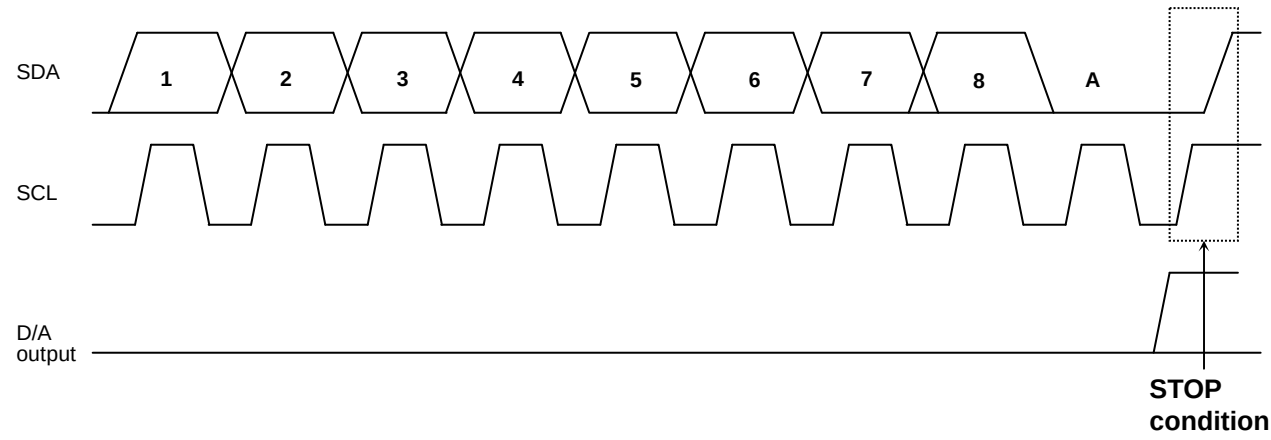
< START condition to sleve address bit >



< Sub address bit >

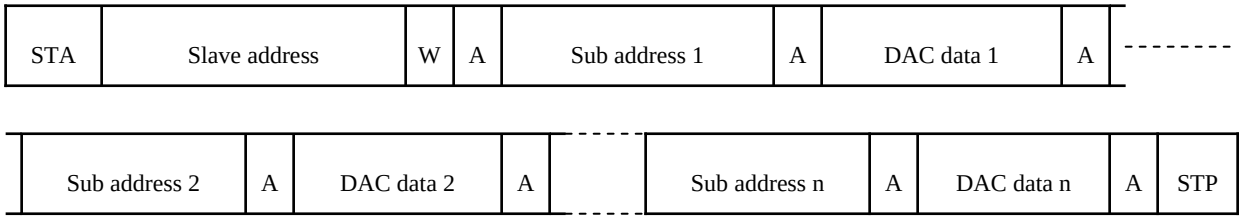


< DAC data bit to STOP condition >



- START condition With SCL at High, SDA goes from High to Low.
- STOP condition With SCL at High, SDA goes from Low to High.
  (Under normal condition, SDA must be changed, when SCL is Low.)
- Acknowledge bit The receiving IC has to pull down SDA line whenever receive slave data
  (Transmitting IC releases the SDA line just then transmit 8-bit data.)

Digital Data Formats



Note: After START condition, the master IC (MCU etc.) accesses the slave IC by slave address, and transmits the data to each channel by two bytes (sub address and DAC data).

Precaution for Use

1. Supply voltage terminal (VCC) is also used for D/A converter upper reference voltage setting. If ripple or spike is input this terminal, accuracy of D/A conversion is down. So, when use this device, please connect capacitor among VCC to GND for stable D/A conversion.
2. This IC's output amplifier has an advantage to capacitive load. So it's no problem at device action when the capacitor (0.1µF Max) is connected among output to GND for every noise elimination.

Standard Application Circuit

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
   "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

Компания «ЭлектроПласт» предлагает заключение долгосрочных отношений при поставках импортных электронных компонентов на взаимовыгодных условиях!

Наши преимущества:

- Оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов;
- Поставка более 17-ти миллионов наименований электронных компонентов;
- Поставка сложных, дефицитных, либо снятых с производства позиций;
- Оперативные сроки поставки под заказ (от 5 рабочих дней);
- Экспресс доставка в любую точку России;
- Техническая поддержка проекта, помощь в подборе аналогов, поставка прототипов;
- Система менеджмента качества сертифицирована по Международному стандарту ISO 9001;
- Лицензия ФСБ на осуществление работ с использованием сведений, составляющих государственную тайну;
- Поставка специализированных компонентов (Xilinx, Altera, Analog Devices, Intersil, Interpoint, Microsemi, Aeroflex, Peregrine, Syfer, Eurofarad, Texas Instrument, Miteq, Cobham, E2V, MA-COM, Hittite, Mini-Circuits,General Dynamics и др.);

Помимо этого, одним из направлений компании «ЭлектроПласт» является направление «Источники питания». Мы предлагаем Вам помощь Конструкторского отдела:

- Подбор оптимального решения, техническое обоснование при выборе компонента;
- Подбор аналогов;
- Консультации по применению компонента;
- Поставка образцов и прототипов;
- Техническая поддержка проекта;
- Защита от снятия компонента с производства.
